Kindly route this communication to Chief Justice Of India Mr. Sharad Arvind Bobde.

Dear Mr. Sharad Arvind Bobde,
Hon'ble Chief Justice of India @ Supreme Court, India

I am an Indian citizen born & raised in India. I am a private inventor to the 'Technology of Vehicle Color Change' which has relevance, importance and most importantly economic benefits to every country in the World. However, all these benefits have been denied by USA, to hold their supremacy and control on Earth and its 192 other countries.

My invention's global rights when factored in as a single sale price is a whopping 93 Trillion $. And this is connecting my IP rights and applications spanning 62 global nations. The USA defendants have already become liable for this wealth to me. They are liable for the full amount of 93 Trillion. Their liability began in mid 2018 (when the Bangalore city Civil Court case was filed) and now are liable with accruing interest. Defendants D2 and D4 in the case are using delay tactics as their fraud is caught red-handed on a global stage fully documented, and not showing up in the court.

It is for us to claim our wealth rightfully. It is for us to get the full liability paid. It is for me and you to "APPOINT A SPECIAL COURT IN INDIA, FOR THIS CASE, AND THE LAWSUIT RESOLVED WITH FULL LIABILITY PAID OUT". I would like to get one hour on your schedule at the earliest to discuss this subject. I would like to add no other case in India or World is more important than this. I WANT YOU TO KNOW THAT I HAVE PLEDGED 90% OF THE FULL WEALTH FOR INDIA, FOR MY VISIONARY GOAL OF 'GOAL YEAR 2050'. You can find all the detail at my website Srinivasdevathi.com.

Once a special court is set-up, I would like to structure the case with the following particulars. I can fight for my rights (as per Patent Cooperation Treaty) and get justice that I deserve, and will bring the full wealth into India.

The suit shall be:

Inventor & Author Srinivas S. Devathi
V/S
Capgemini USA, Hulsey lawyers USA, Janssen Pharmaceuticals USA & HSBC Bank USA.

Allegations:
- Breach of Patent Cooperation Treaty.
- Breach of WIPO guidelines.
- Global fraud pertaining to my invention of Vehicle Color Change Technology.
- Blocking the global economic growth in a deliberate attempt to retain pole position as the richest country and retain power & control on the World nations.
- Blocking economic growth prospects by adopting my technology in 61 Non-USA countries. And as a general remark, all world countries.
- Blocking my global IP rights & royalty prospects from 61 other World nations.
- Blocking economic growth, progress & development prospects of India and its 1.32 billion citizens.

Intellectual Properties (IP) on table:
1. USPTO Patent grant # US 8,910,998 B1 and the continuation application # 14/535,867.
2. USPTO Patent application # 14/610,195 with WIPO publication ID 20160220878, for next generation version of American Football sport.
3. Governing (pilot, market, promote, introduce and launch) rights to the 'Next generation Sports' as defined by me in my WIPO Publication ID WO2016120766 (PCT application # PCT/IB2016/050325), for the ones USA is interested in. I believe those would be American Football, Baseball and Lacrosse. They might also show interest in few other sports like Ice Hockey, Racquetball and Basketball.
4. Hands Free Shopping® Registered Trademark with registration # 5,438,473.
5. I have another WIPO Publication ID WO2017125788, with PCT application # PCT/IB2016/050317. I did not

pursue this application and never entered national stage as I was inspired by prevalent drone technology at the time. If USA is interested, they can procure this publication from me.

My Prayer:
- To withdraw / delete the sabotaging ISR issued on the PCT application # PCT/US2014/046619.
- To issue a correct / new / clean ISR, to the PCT application # PCT/US2014/046619; which is consistent with patent grant US 8,910,998.
- To send out communications to WIPO and all 152 PCT contracting states in the world; to their respective PTO's about the correction as defined in point above.
- To issue a grant on the Inventor's continuation application in USA, application # 14/535,867.
- To procure IP 1 listed above for a non-negotiable sale price of 22.5 Trillion $.
- To procure IP 2 listed above for a non-negotiable sale price of 100 Billion $.
- To procure IP 3 listed. Sale price subjected to discussion in court.
- To procure IP 4 listed above for a non-negotiable sale price of 10 Billion $.
- To procure IP 5 listed. Sale price subjected to discussion in court.
- To endorse the introduction of my authored global macro-economic & global banking reform of 'Project Earthling©' at UNGA and UN – Economic & Social Council, and for it to be subjected to a decisive voting for implementation & roll-out at UNGA.
- To endorse the introduction of my authored new governance model of 'United Nations Global Governance Model 2020©' at UNGA and UN – Economic & Social Council, and for it to be subjected to a decisive voting for implementation & roll-out at UNGA.
- To endorse the execution of 35 other sale agreements to 34 countries and European Commission (covering 27 countries), for a combined sale price of 70.5 Trillion, paid out in Earthlings, with GEC (Global Earthling Council) as the currency printer and payer. This will ensure the systematic disbursement of my invention's global IP rights to all 62 countries.

Let me know your comments. I look forward to our conversations / telecons to get this special court appointed.

I am attaching my executed and legalized living will to clearly show my intent and responsibility for India. I am also attaching the image that shows the 36 deals to be executed (The only way this global subject could be resolved).

Sincerely,
Srinivas Devathi
