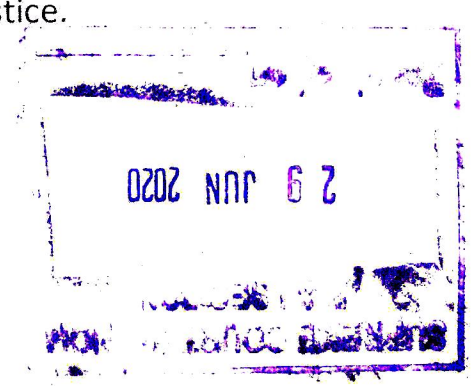
To Hon'ble Chief Justice of India,
Mr. Sharad Arvind Bobde,

I am an Indian citizen and I am the Inventor to Vehicle Color Change Technology. My invention's global IP rights (62 countries where I have sought IP rights protection) sale price is valued at a whopping 93 Trillion $, based on a conservative estimate. There has been a global fraud committed by USPTO and Hulsey PC (USA IP lawyer) deliberately to block my global IP rights by giving two different outcomes on replica patent applications.

This fraud was filed as lawsuit OS 4961 of 2018 in Bangalore city civil court. As per court orders which did not see cause of action on USA corporations, and recommended that I bring USPTO and Hulsey PC as defendants against whom there is defined cause of action, I filed another suit. I filed OS 2613 of 2020; in which I made USPTO and Hulsey PC as defendants. This lawsuit very clearly indicates and points out the fraud committed by defendants which is visible to the world beyond any reasonable doubt. This lawsuit resulted in orders to file the suit in the proper court/forum.

29/6/2020

I am seeking legal advice on when and where to take this lawsuit forward. It may likely go to International court of justice.



I am delivering (attaching) a hard copy of the lawsuit OS 2613 of 2020 as a binder with nearly 300 pages which discloses the entire fact set of the documented fraud. I have also attached the court orders. **I want you to know that USPTO global fraud is documented beyond any reasonable doubt, and that I would win the case in any court where this suit would be contested.**

I want to keep you informed as this lawsuit is the most important lawsuit for all of India as it will bring 93 Trillion wealth into India and will further enable us to retain this wealth as our own national treasury of 93 Trillion in Earthlings currency (refer my website link: https://srinivasdevathi.com/project-earthling/).

As Chief Justice of India I want you to take a close look into this lawsuit as it has 62 country IP rights implications pertaining to my invention of 'Vehicle color change technology'. **It has India's economic and national security implications.** Please refer to my website for more details.
