

LIVING WILL

OF MR. SRINIVAS S. DEVATHI; LIVING AT 63, 11TH B CROSS, 3RD MAIN
PRASHANTH NAGAR, BANGALORE - 560079, INDIA

WILL EXPIRING ON - DEC 31, 2022

A NEXT VERSION WITH UPDATES CAN TAKE EFFECT SOONER. HOWEVER, THE OVERALL ALLOCATIONS WILL REMAIN SAME AS GIVEN IN THIS LIVING WILL.

ENCLOSURES: ID PROOF OF SRINIVAS S. DEVATHI - 2 PAGES. COPYRIGHT OF PROJECT EARTHLING © - 6 PAGES.

CONTEXT:

I, Srinivas S. Devathi, Inventor to 'Vehicle Color Change Technology' with patent grant from USPTO (Patent number US 8,910,998 with issue date of 16-12-2014 which is valued at 22.5 Trillion Earthlings/\$; and the technology's IP rights valuation from the other 61 Non-USA countries (17 national stage applications filed by using PCT international application number PCT/US2014/046619 with filing date of 15-07-2014, the value of which is set at 70.5 Trillion Earthlings/\$)); is valued and worth a total of 93 Trillion Earthlings/\$; as of today at a conservative estimated sale price of the invention global IP rights. This is the most important asset that must be addressed in this Will. It is fair to say that all my property / assets / wealth is intellectual property in the form of patents, patent applications and Trademarks.

Outside of the above listed intellectual property assets; I have some property and income from other regular sources which allows me to live my regular 'Middle class' income life in India. This property is nothing that anyone in India, or certainly USA citizens or their corporations would envy about or look to steal from me.

NO LEGAL HEIRS:

I, Srinivas S. Devathi, do not have any legal heirs. I am single (Divorce concluded in July 2012) with no children. So, I do not have any legal heirs; as all intellectual property in a person's name qualifies as his own earnings and any legal heirs of such property can only be his own family descendants.

Further, my siblings have no legal claim in this wealth either.

My father, who passed away on Jan 1st, 2018; has left enough (of his wealth) for my mother, to ensure her comfortable living for many years to come. Additionally, my mother would not know what to do with crores of rupees, and certainly does not know what to do with Trillions of Earthlings / \$.

Despite my mentioning of the names of my Father or Mother in one or more financial instrument forms (such as bank accounts, LIC policies, post office saving accounts, investment accounts, or other) as my nominee (for that financial instrument), this 'Living Will' shall override any such nomination forms being extrapolated for my Intellectual property assets listed above. Further, Intellectual property is not something that is claimed or inherited upwards in the family tree.

So, neither my mother nor my deceased Father can inherit or claim any portion of the 93 Trillion Earthlings / \$ wealth or asset.

SEPARATE INSTRUMENT:

In summary I do not have any legal heirs for the 93 Trillion Earthlings / \$ valued Intellectual Property. If I choose to assign anything to my mother or siblings, it shall be done so only by 'Executing a separate contract or agreement or legal instrument'.

CURRENT ASSIGNMENTS OF WEALTH FROM INTELLECTUAL PROPERTY:

The 93 Trillion Earthlings / \$ will be brought into India as my wealth in this year and next, legally via court proceedings. Depending on the way I execute contracts (Invention – Intellectual Property sale agreements) with all 62 countries; I may attract the wealth in partial payments spread over the IP tenure of my invention which ends in year 2034. As the wealth comes into my Indian Bank account(s), my yearly allocation of funds will be as given here:

- 90% of this 93 Trillion Earthlings / \$ wealth will be 'year-marked' or 'pledged' for a visionary goal defined by me called 'Goal Year 2050'; to make India a developed country.
 - o Half of this 90% (45% of total wealth) will be paid to Indian Government, all State Governments and Union Territories, with the following breakdown.
 - 20% as Long-term capital gains tax on the wealth earned to Indian Govt, payable to Commissioner of Income tax department.
 - 10% as 'India's Progress & Development' funds payable to Indian Govt, to Prime Ministers India development fund.
 - 15% distributed across all States and Union Territories, in proportion to their population (use census data from most recent census). For states, payable to each state Chief Ministers (respective) State development fund. For Union Territories, payable to Presidents Union Territory development fund.
 - According to the points mentioned above, I shall annually pay (or distribute) this portion of wealth and provide guidance to Indian Government and all 29 State Governments on doing the right projects, the right way until 'Goal year 2050' is achieved, by heading a unit called 'Indian Economic Council'.
 - o The other half of this 90% (45% of total wealth) is 'year-marked' or 'pledged' for Private side development projects / work which will be driven by me across India (which will further be followed and possibly emulated by at least 100 other developing and economically backward countries); through 'Earthling Foundations'. Initiatives will be rolled out through two Earthling foundations, one public and another private, which will get funds allocation with the following breakdown.
 - 22.5% will be allocated to the Public charitable Earthling Foundation Trust.
 - 22.5% will be allocated to the Private Earthling Foundation Trust.
 - The Legal entity of Foundation is expected to be formed soon. The registration papers for the foundation are prepared and can be registered anytime at the local sub-registrar office. However, recruiting the second trustee and other trustees is taking time, as I am looking to find the right Trustee who is patriotic, and energetic to work for this country all his life with commitment and dedication with my guidance. Updates on this will be provided in the next version of Living Will.
 - Both Public and Private charitable Earthling Foundation Trusts will roll out series of initiatives over the next 30 years, with allocated expenditure annually for projects that must be completed within that year; to achieve 'Goal year 2050'.
- 10% of this 93 Trillion Earthlings / \$ wealth will be 'My personal wealth' in my personal bank account and spent on my personal expenses and select personal projects across India.

I, Srinivas S. Devathi, Inventor to 'Vehicle Color Change Technology'; state that this is my Current active Living Will and this is how I want the money allocated, while alive or dead.

Prashanthnagar, Bangalore - 560079, India

Title: PROJECT EARTHLING.

The first step towards a balanced world and more equality.
This initiative brings about more trade and economic equality.
This is the most important reform required to global economic situation as it stands today.

Problem Definition: The current global trade situation is as given below.

- 1) All global trade is predominantly done in USD.
- 2) All the important global trade commodities are priced in USD.
- 3) And it is the currency of one country - USA.

Srinivas
उप पंजीयन अधिकारी प्रतिलिप्याधिकार
DEPUTY REGISTRAR OF COPY-RIGHT

This has resulted in global trade commodities being subjected to fluctuations based on two moving (varying) frames of reference. The USD strengthens or weakens based on its demand and other factors. The commodity price fluctuates based on its demand and supply.

Secondly, global trade between countries (import / export) and forex transactions happen in so many different currency exchanges. Currency A has to be exchanged to currencies B, C or D and vice versa. The many to many currency conversions add complexity to central banks and other banks. In general, global trade is subjected to multiple currency conversions, is complex and not standardized.

Background thinking:

If you look at last 3 to 4 centuries, USA has had a vice like grip on the world and would not let go. They want to control everything, everyone, dictate terms to everyone across the world. If you look at last 100 years in particular; USD became the standard for global trade and transactions, making it the most sought-after currency. This allowed USA to become a 'Mint based economy'; to print as much as they want and inject into the global trade system, with no checks or balances of any kind for themselves or their country's GDP numbers. It is evident in:

- a) The military arms / weapons stockpile they have amassed over decades. The fire power is enough to destroy earth. Their military is stationed in so many countries, despite the costs involved.
- b) The number of wars they have waged across the globe and yet with no dent to their economic condition when you factor in the military and war expenses.

Srinivas

Project EARTHLING
Srinivas D.S. - Jan 15, 2019

- c) The standard method of bailing out all Corporations / Banks in USA by injecting money into the system. E.g., 2007-2008 Credit crisis due to Housing bubble burst; they bailed out all banks by printing money.
- d) Most of the USA Corporations are bloated with surplus funds and cash, because of available credit, as Banks could be bailed out anytime.
- e) Despite all the expenses as listed above, USA economy has not weakened in the last few decades. And USD does not show a sign of weakening, due to the global demand.

One must think where all this money spent came from without having a negative impact on their economy. Their economy does not have a downturn and their currency has not weakened. It always seems to strengthen against most global currencies. In fact; it is said that waging wars is a means of driving GDP numbers by producing more weapons (e.g., Lockheed Martin stock price earnings). They have had this kind of a run because USD has been a standard for global trade for so long. Simply put, they have made all the other countries look like dumb idiots / morons for so long. Should the World continue to deal with this imbalance on Planet Earth? Should USA continue to dominate and in doing so, block all other countries growth prospects and development opportunities?

I, as Indian citizen realized that such a global environment is not conducive for India to become a developed country. This needs correction, if the aspirations of 1.32 Billion Indian citizens must be met and realized. Since this is a global problem, the same thought applies to every non-USA country. I personally am interested in making India a developed country by year 2050 (Goal year 2050).

The Solution: A new global trade and exchange currency, which is not the currency of any single country.

- 1) A new global Trade currency, import / export standard currency which is not a currency of any single nation in the World.
- 2) I have called it as 'Earthling'. The currency symbols as I have envisioned are given towards the end of this document. In common usage (terminology) Earthlings could be called as 'Ellies'.
- 3) Earthling will hold its value for a period of 10 years. At the end of 10 years, a council of global economists will either strengthen it or weaken it depending on the needs of developing and least-developed countries. And it shall hold that value for another 10 years. The cycle will repeat.
- 4) First valuation of Earthling could be same as USD when rolled out. Earthling will not have a decimal such as paisa, cent or penny equivalent.

In such a scenario, all global trade (Import / export between any number of countries), global commodity pricing will be done in Earthlings. The commodity prices are against a single frame of non-fluctuating reference. The pricing truly reflects the commodity demand / supply situation. In turbulent economic times, it will be the safest currency to offload wealth into. What better than something that holds the same value for 10 years. Investment bankers will love such an instrument. Investors can ride turbulent times with much ease.

[Handwritten Signature]

Project EARTHLING
Srinivas D.S. - Jan 15, 2019

Features / Advantages:

- 1) Earthlings will be printed only in 2 or 3 mints, all located in a single place. These mints will be monitored by representatives from all countries (at least one from each country).
- 2) Most forex reserves held by each country must be in Earthlings.
- 3) However, Investment Bankers who trade in currencies, can be allowed to do so, on a single global standardized platform.
- 4) Each country will have to hold only their local currency and Earthlings as Foreign exchange reserves. If their Central Banks want to hold some reserves in other currencies (purely from an investment or holdings vantage point), they could do so.
- 5) At international airports, point of departure, the forex stations should allow buying Earthlings against local currency. At the point of destination, forex counters should be able to convert Earthlings to the local currency of that country. So, most international travelers could only carry Earthlings and travel to any country and shall do fine upon landing.
- 6) All global trade commodities will be priced in Earthlings.
- 7) All export items of all countries will be offered while priced in Earthlings. It will be a single global trade market, for each country's export items.
- 8) All global fund transfers (international wire transactions) will happen in Earthlings, thus simplifying global trade / transactions. E.g., Whether you are transferring funds to Europe, China, Japan or Korea, you always do the international wire transfers in Earthlings, despite their local currency. The recipient Bank upon funds receipt in Earthlings, could either hold them in Earthlings or convert it to their local currency, as per its preference.
- 9) Global banking is simplified. Many to many currency conversion headaches are removed for Banks.
- 10) Most importantly, this brings economic and trade equality to planet earth. World will become a single market place for most exporters.
- 11) It gives equal opportunity to all countries and brings balance to global trade.
- 12) Countries with no currency today, should come up with their own currency which is at a certain proportion against Earthling, to enable them to do trade or generate wealth from what they could export.
- 13) All developing and least developed countries benefit significantly from this. USA and its economy will also be subjected to checks and balances.
- 14) BRICS can take advantage of this new system and can be much more competitive on the global stage, as undue advantage of USA that has gone on for centuries is eliminated.
- 15) Allows India and China to get to number 1 or 2 positions in the economic scale in few decades. This reform is the most important to global economic situation as it stands today. Without this reform, BRICS and other countries aspiring to develop stand no chance.
- 16) Each country could have a special 'International trade Bank' which allows bulk Earthling transactions to other entities in other countries, for registered global traders who do import / export of goods. As another thought, all international trade must be done online and should be transparent to the government, CB and the special International trade Bank in the country.
- 17) All banks should allow international wire transactions in Earthlings, in smaller amounts with a cap, for regular citizens.

[Signature]

Project EARTHLING
Srinivas D.S. – Jan 15, 2019

18) Local or domestic business; whether online or offline, must be conducted in the local national currency only.

Countries / Geographies:

Let's look around the World and think which Countries would support this reform. The answer is every country other than USA will give full support and vote to this global economic reform. Once this is done, World will be a truly competitive space where talent, capability and effort will be truly rewarded. And World will get a break from USA that is constantly blocking, constantly policing all other countries to stop their progress and growth. India must take the lead to drive this initiative through G20 summit and other global forums.

Roll-out Steps: The procedural steps involved in launching 'Project Earthling' will be as follows.

Step 1 - The initiative must be introduced at several global forums, such as G20 Summit, WTO, WIPO, UN, World Bank, IMF and all country governments and CB's.

Step 2 - Discussions and voting. The introduction would lead to discussions at many levels. Post discussions, a UN voting must be conducted, with one vote per country on the subject. This initiative will be voted in. A governing body must be established (name, governing team and other details).

Step 3 - Once the initiative is voted in, we need to design the currency bills. (a) Billion and Million Earthling bills for CB holdings and exchanges. (b) 1000, 500, 100 Earthling bills for citizen (international travelers) exchanges only. There shall be no other denomination (for e.g., currency bills of 50, 10, 5, 2 or 1 used for local purchase transactions). As no country allows purchase/sale (or local / domestic retail businesses) by using Earthlings. It is only an International trade currency and foreign exchange currency and not for domestic trade or business.

Step 4 - 3 Mints that will print Earthlings shall be set-up in a single location. These mints will be governed by all countries (their representatives); and will be under 24*7 surveillance. The location should ideally be in India, China or Europe. City to be selected.

Step 5 - Flushing USD's from all non-USA countries. Earthlings shall be printed to replace USD holdings of all countries (their CB's). The exchanged USD's should be retrieved and trashed / shredded (as in truly replaced).

Other ongoing steps - As per CB's purchasing needs against their local currency (or other currencies they hold), they could buy Earthlings from the 'Earthling' governing body. Such an activity of buying Earthlings shall be an ongoing activity.

This may be called as a social scheme, that I do not endorse. I believe that each Country must earn its living and get rich. If the governing body chooses an Earthling distribution step, in a rare global economic distress situation; they shall print and distribute Earthling's equally to every country.

The entire reform could be rolled out in 1 or 2 years. This baselines the World economic situation with a much better balance and gives equal opportunity to all countries in global trade. All countries can aspire to develop and get rich, without any roadblocks.

**WEALTH DISTRIBUTION DOCUMENT IN INDIA ACCORDING TO MY
EXECUTED LIVING WILL DATED 12-11-2020**

In this document, I present the wealth distribution of the 93 Trillion Earthlings / \$ wealth that I will bring into India by the sale of the intellectual property rights to my invention US 8,910,998 for 62 world countries / territories, through the execution of 62 sale agreements in an Indian court as listed in document 28 and detailed in document 29 attached with this plaint. Invention US 8,910,998 is recognized worldwide by PCT application PCT/US2014/046619 filed on 15-7-2014.

Distribution of 93 Trillion Earthlings wealth within India according to executed and legalized LIVING WILL of Srinivas S. Devathi, over the next 15 years period.		
		EARTHLINGS / \$
62 country IP rights sale	I, Srinivas S. Devathi, will bring the wealth via liability claim lawsuit proceeding to be filed in Indian courts, as per law for justice and equity, and enforcement of PCT, the Treaty.	93,000,000,000,000
45% of the total 93 Trillion wealth	Earthling Foundations Public Trust (22.5%). I will be heading the Earthling Foundations public trust and rolling out initiatives over the next 30 years, to achieve Goal Year 2050 for India.	20,925,000,000,000
	Earthling Foundations Private Trust (22.5%). I will be heading the Earthling Foundations private trust and rolling out initiatives over the next 30 years, to achieve Goal Year 2050 for India.	20,925,000,000,000
45% of the total 93 Trillion wealth	Indian Government, to Commissioner of Income tax department (20%)	18,600,000,000,000
	Progress & Development funds paid to (Indian Government), to Hon'ble Prime Ministers India Development Fund (10%)	9,300,000,000,000
	Progress & Development funds paid to (State Governments and Union Territories), to respective Chief Ministers State development fund, and for Presidents Union Territory development fund in case of Union Territories (15%)	13,950,000,000,000
	The distribution of the 15% contribution to State Governments and Union Territories is given in the table next page. The wealth distribution of 13,950,000,000,000 will be done according to population distribution across the states and union territories. 2011 population census data has been used for the wealth distribution.

Patient Name : SATYANARAYAN D

DEATH SUMMARY

Address : 26/1, BRIGADE GATEWAY,, BESIDE METRO,, MALLESWARAM WEST,, BENGALURU, KARNATAKA, INDIA. P IN-560055.

Tel : 080-39898969, 080-61656262

Fax : 080-30925454

Passport No.: :
MRN : YESH-0000502372
Visit No. : A000000002-YESH
Date Of Birth : 17/11/1942
Age : 75 Years 1 Months 13 Days
Sex : MALE
Blood Group :
Ward /Rm /Bed No. : MICU / MICU / 1042

DATE AND TIME OF ADMISSION : 30/12/2017 4:26:00PM

AGE / SEX : 75 / MALE

DEPARTMENT : CRITICAL CARE

DATE AND TIME OF DEATH : 01/01/2018 4:15:00AM

ATTENDING CONSULTANT : DR. KARTHIK RAO

REFERRALS : DR. VEERABHADRA GUPTA

: DR. FIROZ TORGAL

ADMISSION DIAGNOSIS :

Severe Sepsis with Shock

CAUSE OF DEATH :

Severe Sepsis with Multiorgan Dysfunction

CO MORBIDITIES :

Diabetes mellitus, Hypertension, Severe AS, LV dysfunction, Rheumatoid Arthritis

BRIEF CLINICAL NOTE :

Mr. Satyanarayan who was apparently well till today morning , had sudden onset dyspnoea with generalized weakness , was initially taken to a outside hospital where he was evaluated , found to be hypoxic and hypotensive , intubated and resuscitated there and shifted to CARHY for further care. On arrival to ER he was found to be still in hypotensive state, acidotic, resuscitated with fluids, started on antibiotics, initiated on inotropes sent for blood investigations. His earlier urinary catheter was changed to silicon one, Pus was noted in the catheter immediately after insertion which was sent for C/S. CXR was done, Cardiology evaluation done with Echocardiography, shifted to ICU for further management.

LAB , RADIOLOGY & OTHER REPORTS IF ANY :

ENCLOSED

COURSE AND EVENTS DURING THE HOSPITAL STAY AND TERMINAL EVENT :

On arrival to ICU he was connected to ventilator, continued inotropic support. He was in pulmonary edema a diuretic was given, arterial line was secured. His Urine output was minimal with ABG showing severe acidosis with High lactate. Patient's son was counseled regarding his clinical status, Multi-organ dysfunction had set in with Liver dysfunction, Renal Failure, Pulmonary edema in the background of preexisting poor cardiac status (Severe LV dysfunction+ Severe Aortic Stenosis) due to Urosepsis and poor prognosis was explained. Nephrologist was consulted and initiated on Emergency Hemo-dialysis after insertion of HD catheter; SLED was performed for 6-8 hrs overnight. Acidosis improved briefly after SLED, but by afternoon of 31/12/2017, Patient continued to deteriorate with tumbling BP and increasing inotropic support with both NORAD+ADRENALINE. Urine output remained very poor and acidosis continued to worsen, HD couldn't be performed as his hemodynamics was very unstable even after being on high dual inotropic support. Family was informed regarding the same. Patient had cardiac arrest at 03:50AM of 01/01/2018, CPR was started, Inj Adrenaline boluses given multiple times, inspite of all the efforts put in he couldn't be resuscitated and declared dead at 04:15AM.

Death ICD :

R65.21 - Severe sepsis with septic shock

To,

The Editor

Message from Srinivas S. Devathi - Author of Project Earthling(c).

Due to some unavoidable circumstances I would not be able to conduct the Press meet on the scheduled date of 19-03-2021. And the Press meet will be rescheduled for a later date.

In the interest of time, I am giving the 'Press release' about Project Earthling(c) to all the media editors, network of reporters with Bangalore Press Club. In this e-mail, I am attaching all 12 pages of background information for the media houses that gives the full detail.

Press release on Project Earthling(c), a macro-economic reform.

A macro-economic flaw that has made all importers in the world (importers from all 192 non-USA countries) pay more than what they should have due to a manipulated USD (\$ - US Dollar that has been artificially kept strong against all other world currencies) has gone unnoticed for 240 years, and it must be fixed right now. THIS IS AN ONGOING FRAUD / FLAW DUE TO WHICH ALL IMPORTERS FROM ALL 192 NON-USA COUNTRIES ARE PAYING MORE ON THEIR IMPORTS THAT ARE PRICED IN USD (\$). IT IS SAME AS THE 192 COUNTRIES PAYING MORE FOR THEIR IMPORTS. Realize that USD is the local / domestic currency of one country USA, which has been intentionally monopolized across the world as a global transaction / deal making / bribing / commodity pricing currency (several commodities). Hence, I introduce a new currency that is not a local / domestic currency of any one country, and is purely a international trade and business currency, foreign exchange currency, and national reserve currency. This new currency is named as 'Earthlings'. Symbol of Earthling is given in the attached document A1. Earthlings currency will put an end to two varying frames of reference and all commodities will be priced in Earthlings which will in turn hold its value for a period of 10 years, at the end of which its value will be reset (either strengthened or weakened for the benefit of world economy) to a new value which shall remain for another period of 10-years.

Some of the benefits of Project Earthling(c) going live are:

1. All global trade commodities will be priced in Earthlings.
2. All export items of all countries will be offered while priced in Earthlings. It will be a single global trade market, for each country's export items.

3. All global fund transfers (international wire transactions) will happen in Earthlings, thus simplifying global trade / transactions. E.g., Whether you are transferring funds to Europe, China, Japan, or Korea, you always do the international wire transfers in Earthlings, despite their local currency. The recipient Bank upon funds receipt in Earthlings, could either hold them in Earthlings or convert it to their local currency, as per its preference. Global banking is simplified. Many to many currency conversion headaches are removed for Banks.
4. All developing and least developed countries benefit significantly from this. USA and its economy will also be subjected to checks and balances.
5. Each country must have a special 'International trade Bank' which allows bulk (high value) Earthling transactions for registered global traders who do import / export of goods, to other entities in other countries who are in turn registered import / export traders in those countries. As another thought, all registered global traders who do import / export of goods must showcase their products online on their website, for bulk import / export deals ONLY and 'not for retail sales in the local or any foreign country'. This allows the registered global traders to be transparent to the government, CB, and the International trade Bank in the country.
6. All banks should allow international wire transactions in Earthlings, in smaller amounts with a cap, for regular citizens. This will be subjected to amendments by GEC over time.
7. Local or domestic business; whether online or offline, must be conducted in the local national currency only.
8. The initial exchange of each country's holdings into 'Earthlings' will be on record with GEC (Global Earthling Counsel); and such information will be fully transparent to all country's governments. Along with such data, the international trade numbers (done in Earthlings) of each country will also be on record and available to all countries. This curbs all fraudulent activities funded by bribes using any one local currency in a different country.
9. All global 'Money based rankings' could be done in Earthlings. For example, Forbes richest people listing cut-off could be by Billion Earthlings or more, GDP (nominal) of countries will be listed in Earthlings (GDP-PPP (by Purchasing Power Parity) will cease to exist as a national economic indicator), Global movies earnings and rankings could be in Earthlings, International flight tickets could be priced in Earthlings, International hotel stay pricing could be in Earthlings, International tourism packages pricing could be in Earthlings, Global commodity pricing will be in Earthlings, International products or services pricing by exporters will be in Earthlings, International sports tournament prize money could be in Earthlings.
10. Most forex reserves held by each country must be in Earthlings.
11. World Bank and IMF will cease to exist. So would the need for any world regional banks.
12. At international airports, point of departure, the forex stations should allow buying Earthlings against local currency. At the point of destination, forex counters should be able to convert Earthlings to the local currency of that country. So, most international travelers could only carry Earthlings and travel to any country and shall do fine upon landing.

You can read more about this at my website
webpage: <https://srinivasdevathi.com/project-earthling/>

You can access the attached documents that are additional reasons for Project earthling(c) to be taken live at my website webpage: <https://srinivasdevathi.com/media-interactions/>

The description of six documents attached:

A1 - Project Earthling - Reform 250 years too late: This is an introduction document to the macro-economic reform and banking reform authored by me. I have a copyright issue on this subject.

-189-

A2 - 18 applications details - Sale price ranges: This is the list of patent applications that provide me the protection to my invention across 62 countries. And the sale price ranges given in categories of conservative, conservative-realistic, realistic, aggressive, and exaggerated. Media house support to get the pulse and opinion of Indian citizens (Hindus living in India) on the sale price would be very interesting as there has been no Indian 'asset valuation' company to certify my final price selection.

A3 - Right option for world - 62 sale agreements: This shows a flow chart which is the only available option for the world to deal with the monstrous size of invention that patent US 8,910,998 is. And also lists the 62 sale agreements that are expected to be executed to finish the distribution of IP rights for the invention to 62 countries.

A4 - My Living Will in Force - 93 Trillion Earthlings: Given the asset patent US 8,910,998 and PCT/US2014/046619 in my name, I have executed and legalized a Living Will which is attached. The second page is of great importance to the country India. I allocate 90% of the wealth for 'Goal Year 2050'. The high-level allocations shall remain the same until year 2050.

A5 - Wealth Distribution in India according to my Living Will: In this document, I give the actual numbers break-down and distribution of 93 Trillion wealth across India. The full distribution of wealth is expected to happen over the 14 years.

A6 - USA Greed and Fire Scam which India must avoid: In this document, you will read about how USA attempted to take the full wealth from my work to their country, which is the wrong option which will be opposed by all 192 other countries. And it details the 'Fire scam' employed by USA to block wealth coming to me, and India which might benefit Hindus living in India. I technically, and with factual data have diffused the 'Fire Scam'. We will work on its research when UN conducts a decisive voting about the subject and gives us a formal request.
