

Recipient of Intellectual Property rights: Tajikistan, represented by Prime Minister of Tajikistan, Mr. Kokhir Rasulzoda or President Mr. Emomali Rahmon or their designated signatory.

Payor: Global Earthling Council (GEC) that is responsible for printing Earthlings.

Property being sold: EAPO regional application (national stage) patent application number 201691898; either the restored application or patent grant Intellectual Property rights applicable for Tajikistan; including all rights to 100-year downstream businesses that emerge from my invention, for Tajikistan territory. The sale includes the claims in PCT international applications PCT/IB2016/050993, PCT/IB2016/050994, and PCT/IB2016/050995, for Tajikistan territory.

Full control of the 90% Economic value handed over to Tajikistan: A value of 18,586,842,266 Earthlings fully handed over to be owned and controlled by Tajikistan, for the prosperity of their citizens, businesses, and country.

Economic benefits for Tajikistan: By virtue of this sale agreement, Tajikistan can realize sustained GDP growth for years to come, improve their GDP per capita, and at the same time contribute to their local businesses profitability. The increased economic activity comes from adopting the invention in all the sectors spanning automotive manufacturing, for interior decor covering sectors electrical appliances, electronic devises, furniture, for odd-walls, and other. Applicable energy savings from heating or cooling costs could be realized from the exemplary application of 'Thermal insulation for homes and offices', subject to climatic conditions and their variations across the year, in Tajikistan. Tajikistan citizens and businesses will benefit from the products and services requirements driven from these applications. Your local businesses will benefit from the supply chain to be created involving and not limited to, raw material sourcing, processing of raw material, design of product, fabrication, all of which span across increased demand of polymers, paints / colored material, additives, chemicals, glass wool for Thermal insulation, valves, and robots for various applications including robotic color change. The full ownership of Intellectual Property rights to the invention will allow Tajikistan to block all foreign owned businesses from making money, from demand created out of increased economic activity within Tajikistan.

jjj. San Marino tri-party PCT/US2014/046619 Intellectual Property rights sale agreement:

Name of the agreement: Srinivas - Maria agreement.

Sale price of the agreement: 1,512,421,846 Earthlings.

Sale agreement is executed in: Earthlings currency.

Seller: I, Inventor, Srinivas S. Devathi, Inventor to patent US 8,910,998 B1 'Systems and methods for altering the color, appearance, or feel of a vehicle surface'. Replica of the patent US 8,910,998 B1 identified worldwide by PCT international application PCT/US2014/046619 filed on July 15, 2014.

Recipient of Intellectual Property rights: San Marino, represented by Captains Regent of San Marino, Mrs. Maria Luisa Berti, or Mr. Manuel Ciavatta or their designated signatory.

Payor: Global Earthling Council (GEC) that is responsible for printing Earthlings.

Property being sold: EPO regional application (national stage) patent application number 14886695.7 (2014886695); either the restored application or patent grant Intellectual Property rights applicable for San Marino; including all rights to 100-year downstream businesses that emerge from my invention, for San Marino territory. The sale includes the claims in PCT international applications PCT/IB2016/050993, PCT/IB2016/050994, and PCT/IB2016/050995, for San Marino territory.

Full control of the 90% Economic value handed over to San Marino: A value of 13,611,796,611 Earthlings fully handed over to be owned and controlled by San Marino, for the prosperity of their citizens, businesses, and country.

Economic benefits for San Marino: By virtue of this sale agreement, San Marino can realize sustained GDP growth for years to come, improve their GDP per capita, and at the same time contribute to their local businesses profitability. The increased economic activity comes from adopting the invention in all the sectors spanning automotive manufacturing, for interior decor covering sectors electrical appliances, electronic devises, furniture, for odd-walls, and other. Applicable energy savings from heating or cooling costs could be realized from the exemplary application of 'Thermal insulation for homes and offices', subject to climatic conditions and their variations across the year, in San Marino. San Marino citizens and businesses will benefit from the products and services requirements driven from these applications. Your local businesses will benefit from the supply chain to be created involving and not limited to, raw material sourcing, processing of raw material, design of product, fabrication, all of which span across increased demand of polymers, paints / colored material, additives, chemicals, glass wool for Thermal insulation, valves, and robots for various applications including robotic color change. The full ownership of Intellectual Property rights to the invention will allow San Marino to block all foreign owned businesses from making money, from demand created out of increased economic activity within San Marino.

**Payment plans built into the 62 sale agreements.**

For the tri-party sale agreements described in sections 2(b) to 2(ll), wherein the 'Sale price of the agreement' is greater than 100 Billion Earthlings / \$, the sale agreements would be executed with multi-year payment plan built into it, with annual payments distributed from the year of sale agreement execution, until quarter one of 2034.

For the sale agreement in section 2(a), and tri-party sale agreements described in sections 2(mm) to 2(jjj), the sale agreements would be executed with one time single payment plan, payable in the year of the execution of the agreement.

These 62 sale agreements detailed above total to the full value of worldwide Intellectual Property rights sale price of 93 Trillion Earthlings. The execution of these sale agreements will ensure systematic distribution of the Intellectual Property rights to my invention of US 8,910,998 B1 (recognized worldwide by PCT international application PCT/US2014/046619, along with claims in PCT international applications PCT/IB2016/050993, PCT/IB2016/050994, and PCT/IB2016/050995) to all 62 countries where I have applied for Intellectual Property rights protection via 15 national stage and 2 regional stage patent applications. The execution of these agreements would put the decentralized world on track for economic growth, progress, and development to each of the 62 countries listed, who could in turn look to improve their exports and improve their own national treasury balance in Earthlings, if they want to do so. While the sale agreements are with only 62 off the 193 world countries, my invention US 8,910,998 B1 will result in the downstream businesses being built in all 193 countries including those where I do not have Intellectual Property rights. All the 193 world countries will immensely benefit from my macro-economic reform and global banking reform 'Project Earthling©', the first benefit of which is a world with true freedom and real independence to all countries, with business equality, trade equality, and economic equality, while ending economic and all other forms of slavery.

**CONDITIONALLY TRIGGERED CONTINGENCY AGREEMENT WITH**  
**USPTO**

The following 'Contingency agreement', which is 'Conditionally triggered or invoked in the court of law' must be executed by USPTO, after executing the 'Srinivas - Kathi agreement' as described in the section above. The requirement for the Contingency agreement and its content shall be as following.

After introduction of my authored macro-economic reform Project Earthling©, attached as annexure M with this petition, at an upcoming defendant 3, WIPO - World Intellectual Property Organization assembly, to all 193 member countries, and giving enough time for countries to discuss the macro-economic reform, it shall be brought to the decisive voting of 193 countries, with one vote per country, on the question of 'Must the macro-economic reform Project Earthling© be taken live?'

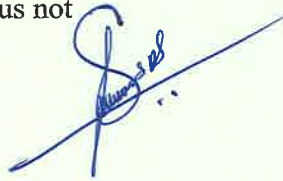

The 61 Tri-Party sale agreements detailed in the section above have the third party 'Payor' which is GEC - Global Earthling Council. The GEC would be established once the macro-economic reform 'Project Earthling©' is voted in by the 193 world countries with a majority vote 'Yes', for it to be taken live and implemented. GEC would comprise of all 193 world country member delegates,

and it must have its designated signatories to execute the 61 Tri-Party agreements described in section above as 'Payor'.

In the event that the majority vote from this decisive voting / poll of 193 countries at WIPO assembly, is a decisive 'no', then this 'Contingency agreement' shall be invoked in the court of law. To begin with, I would like to state that this is a near impossible scenario, given the unbelievably big list of monetary / economic and non-monetary benefits of the reform to the 193 world countries. However, for legal reasons, to ensure 'my liability is paid for in full', as a 'Fail-safe' to the poll result majority vote 'no', this 'Contingency agreement' must be put in place.

After the execution of 'USPTO two-party patent number US 8,910,998 B1 sale agreement', 'Srinivas - Kathi agreement' as detailed in the section above is executed, USPTO would have paid me 22.5 Trillion liability in usd-\$ off the total liability of 93 Trillion. That leaves their balance liability to me at 70.5 Trillion to be paid in usd-\$, in case the poll result at WIPO is a majority 'no'. If the 193 country poll result is a majority 'Yes', the 61 Tri-party agreements shall conclude thus not having to conditionally invoke this 'Contingency agreement'.

kkk. USPTO 61 country liability payment agreement, Conditionally triggered 'Contingency agreement':

Condition upon which this agreement is invoked in the Honorable Court:

In the event if the macro-economic reform 'Project Earthling©' is not voted in for its implementation by 193 world countries at defendant 3, WIPO assembly:

Name of the agreement: USPTO World Countries Liability Contingency agreement.

Sale price of the agreement: 70,500,000,000,000 \$. The full amount will be paid in a one-time single payment.

Sale agreement is executed in: \$ currency (USD).

Inventor to whom liability has been caused by USPTO: I, Inventor, Srinivas S. Devathi, Inventor to patent US 8,910,998 B1 'Systems and methods for altering the color, appearance, or feel of a vehicle surface', recognized across 61 non-usa countries by PCT international patent application PCT/US2014/046619, and their respective regional and national stage applications.

Payment method: 70,500 Billion \$ bills shall be physically shipped by USPTO to a special account created in my name Srinivas S. Devathi, in an Indian bank. The payment must be a one-time full balance liability paid to me. The shipping costs, and all applicable bank fees must be borne by USPTO.

If this 'Contingency agreement' is indeed invoked in the Honorable Court, the following question remains unanswered:

Who received the Intellectual Property rights and 100-year worth downstream businesses for 61 World countries?

**LEGAL ACCOUNTABILITY IS LOST:**

I bring the attention of the 'Respondent', all the defendants in the trial court suit, and the Honorable court to these facts:

Myself, the inventor of patent US 8,910,998 B1, have I received the full liability caused to me? The answer is YES, I would have if I invoked this contingency agreement.

However, it leaves many questions unanswered.

- What happened to the 90% Economic value / Monetary value that emerged off my invention, by enforcing the intellectual property rights across 61 non-usa countries, and from the 100-year worth downstream business created?
- Who is, if any, owning the downstream businesses that emerge out of my invention across the 61 non-usa countries?
- Who is, if any, earning money of your country (referring to 61 non-usa countries) citizens spend?
- What is the economic loss to each of the 61 non-usa countries by not having the full control and ownership of the intellectual property rights to the invention patent US 8,910,998 B1, for their country / territory?
- What is the economic loss to each of the 61 non-usa countries by not having the full control and ownership of the downstream businesses that emerge from the invention patent US 8,910,998 B1, for their country / territory?
- Does this amount to 'Economic chaos' created?

The accountability and traceability of structured / systematic distribution of intellectual property rights is LOST.

**THE FULL LEGAL RESOLUTION THAT DELIVERS 100% JUSTICE IS:**

Only when all the 62 sale agreements as listed in annexure K and detailed in this annexure are executed through this Honorable court. This will ensure full justice is delivered, all ends are fully tied, and 62 countries receive what they deserve, while I get the full liability paid. This is the only 100% fully accurate and financially / economically accounted for resolution. While the contingency agreement is only a safety net for me the inventor, it is not 100% justice delivered.

I request 'Respondent' and all defendants in the trial court suit, to work towards the 100% judicially accurate legal resolution by getting all 62 sale agreements executed, off which 61 sale agreements are Tri-Party agreements executed in Earthlings currency with GEC as the Payor.

Bangalore

Date: 19/1/2023

**Srinivas S. Devathi**  
(Petitioner / Party in Person)

# LIST OF ACTIVITIES TO DELIVER JUSTICE TO ME, SRINIVAS S. DEVATHI, INDIA, AND 60 WORLD COUNTRIES.

uspto fraud elimination

- Elimination of USPTO worldwide fraud, and its communication to all the PCT contracting states, their PTO'S.
- Execution of Srinivas-Kathi agreement.
- Execution of the Conditionally triggered 'USPTO World countries liability contingency agreement' to pay for the balance liability of 61 non-usa countries.

Elimination of fraud and breach of PCT, the Treaty is the first step. Subsequent to which, upon Courts orders the other activities will follow through for full liability claim and sale of intellectual property rights to 62 countries.

Introduction and taking PROJECT EARTHLING© LIVE

- Introduction of the Macro-Economic reform to 193 countries at WIPO assembly.
- After giving time for evaluation, bring the Macro-Economic reform for its decisive voting of 193 countries, for its implementation.
- Formation of Global Earthling Council - GEC comprising of 193 country member delegates. Elect its team of designated signatories.

Execution of 61 NON-USA tri-party sale agreements

- GEC is the 'Payor' for all the 61 Non-USA tri-party sale agreements.
- GEC designated signatories to stay in India for full four months, to get the 61 tri-party sale agreements executed.
- 61 Non-usa tri-party sale agreements executed through this Honorable court or a special court appointed for this purpose.

This is the Annexure..... stated in the Affidavit of SRINIVAS S. DEVATHI

Project EARTHLING  
Srinivas D.S. – Jan 15, 2019

**Author:**

Srinivas S. Devathi

63, 11<sup>th</sup> B Cross, 3<sup>rd</sup> Main,

Prashanthnagar, Bangalore – 560079, India

**Title:** PROJECT EARTHLING.

The first step towards a balanced world and more equality.

This initiative brings about more trade and economic equality.

This is the most important reform required to global economic situation as it stands today.

**Problem Definition:** The current global trade situation is as given below.

- 1) All global trade is predominantly done in USD.
- 2) All the important global trade commodities are priced in USD.
- 3) And it is the currency of one country – USA.

  
उप पंजीयन अधिकारी प्रतिलिप्याधिकार  
DEPUTY-REGISTRAR OF COPY-RIGHT

This has resulted in global trade commodities being subjected to fluctuations based on two moving (varying) frames of reference. The USD strengthens or weakens based on its demand and other factors. The commodity price fluctuates based on its demand and supply.

Secondly, global trade between countries (import / export) and forex transactions happen in so many different currency exchanges. Currency A has to be exchanged to currencies B, C or D and vice versa. The many to many currency conversions add complexity to central banks and other banks. In general, global trade is subjected to multiple currency conversions, is complex and not standardized.

**Background thinking:**

If you look at last 3 to 4 centuries, USA has had a vice like grip on the world and would not let go. They want to control everything, everyone, dictate terms to everyone across the world. If you look at last 100 years in particular; USD became the standard for global trade and transactions, making it the most sought-after currency. This allowed USA to become a 'Mint based economy'; to print as much as they want and inject into the global trade system, with no checks or balances of any kind for themselves or their country's GDP numbers. It is evident in:

- a) The military arms / weapons stockpile they have amassed over decades. The fire power is enough to destroy earth. Their military is stationed in so many countries, despite the costs involved.
- b) The number of wars they have waged across the globe and yet with no dent to their economic condition, when you factor in the military and war expenses.

Project EARTHLING  
Srinivas D.S. – Jan 15, 2019

- c) The standard method of bailing out all Corporations / Banks in USA by injecting money into the system. E.g., 2007-2008 Credit crisis due to Housing bubble burst; they bailed out all banks by printing money.
- d) Most of the USA Corporations are bloated with surplus funds and cash, because of available credit, as Banks could be bailed out anytime.
- e) Despite all the expenses as listed above, USA economy has not weakened in the last few decades. And USD does not show a sign of weakening, due to the global demand.

One must think where all this money spent came from without having a negative impact on their economy. Their economy does not have a downturn and their currency has not weakened. It always seems to strengthen against most global currencies. In fact; it is said that waging wars is a means of driving GDP numbers by producing more weapons (e.g., Lockheed Martin stock price earnings). They have had this kind of a run because USD has been a standard for global trade for so long. Simply put, they have made all the other countries look like dumb idiots / morons for so long. Should the World continue to deal with this imbalance on Planet Earth? Should USA continue to dominate and in doing so, block all other countries growth prospects and development opportunities?

I, as Indian citizen realized that such a global environment is not conducive for India to become a developed country. This needs correction, if the aspirations of 1.32 Billion Indian citizens must be met and realized. Since this is a global problem, the same thought applies to every non-USA country. I personally am interested in making India a developed country by year 2050 (Goal year 2050).

The Solution: A new global trade and exchange currency, which is not the currency of any single country.

- 1) A new global Trade currency, import / export standard currency which is not a currency of any single nation in the World.
- 2) I have called it as 'Earthling'. The currency symbols as I have envisioned are given towards the end of this document. In common usage (terminology) Earthlings could be called as 'Ellies'.
- 3) Earthling will hold its value for a period of 10 years. At the end of 10 years, a council of global economists will either strengthen it or weaken it depending on the needs of developing and least-developed countries. And it shall hold that value for another 10 years. The cycle will repeat.
- 4) First valuation of Earthling could be same as USD when rolled out. Earthling will not have a decimal such as paisa, cent or penny equivalent.

In such a scenario, all global trade (Import / export between any number of countries), global commodity pricing will be done in Earthlings. The commodity prices are against a single frame of non-fluctuating reference. The pricing truly reflects the commodity demand / supply situation. In turbulent economic times, it will be the safest currency to offload wealth into. What better than something that holds the same value for 10 years. Investment bankers will love such an instrument. Investors can ride turbulent times with much ease.

A handwritten signature in blue ink, appearing to be 'Srinivas D.S.', written over a diagonal line.

-132-

Project EARTHLING  
Srinivas D.S. – Jan 15, 2019

Features / Advantages:

- 1) Earthlings will be printed only in 2 or 3 mints, all located in a single place. These mints will be monitored by representatives from all countries (at least one from each country).
- 2) Most forex reserves held by each country must be in Earthlings.
- 3) However, Investment Bankers who trade in currencies, can be allowed to do so, on a single global standardized platform.
- 4) Each country will have to hold only their local currency and Earthlings as Foreign exchange reserves. If their Central Banks want to hold some reserves in other currencies (purely from an investment or holdings vantage point), they could do so.
- 5) At international airports, point of departure, the forex stations should allow buying Earthlings against local currency. At the point of destination, forex counters should be able to convert Earthlings to the local currency of that country. So, most international travelers could only carry Earthlings and travel to any country and shall do fine upon landing.
- 6) All global trade commodities will be priced in Earthlings.
- 7) All export items of all countries will be offered while priced in Earthlings. It will be a single global trade market, for each country's export items.
- 8) All global fund transfers (international wire transactions) will happen in Earthlings, thus simplifying global trade / transactions. E.g., Whether you are transferring funds to Europe, China, Japan or Korea, you always do the international wire transfers in Earthlings, despite their local currency. The recipient Bank upon funds receipt in Earthlings, could either hold them in Earthlings or convert it to their local currency, as per its preference.
- 9) Global banking is simplified. Many to many currency conversion headaches are removed for Banks.
- 10) Most importantly, this brings economic and trade equality to planet earth. World will become a single market place for most exporters.
- 11) It gives equal opportunity to all countries and brings balance to global trade.
- 12) Countries with no currency today, should come up with their own currency which is at a certain proportion against Earthling, to enable them to do trade or generate wealth from what they could export.
- 13) All developing and least developed countries benefit significantly from this. USA and its economy will also be subjected to checks and balances.
- 14) BRICS can take advantage of this new system and can be much more competitive on the global stage, as undue advantage of USA that has gone on for centuries is eliminated.
- 15) Allows India and China to get to number 1 or 2 positions in the economic scale in few decades. This reform is the most important to global economic situation as it stands today. Without this reform, BRICS and other countries aspiring to develop stand no chance.
- 16) Each country could have a special 'International trade Bank' which allows bulk Earthling transactions to other entities in other countries, for registered global traders who do import / export of goods. As another thought, all international trade must be done online and should be transparent to the government, CB and the special International trade Bank in the country.
- 17) All banks should allow international wire transactions in Earthlings, in smaller amounts with a cap, for regular citizens.

Page 3 of 5

A handwritten signature in blue ink, consisting of a stylized 'S' followed by 'D.S.' and a long horizontal line extending to the right.

Project EARTHLING  
Srinivas D.S. – Jan 15, 2019

18) Local or domestic business; whether online or offline, must be conducted in the local national currency only.

Countries / Geographies:

Let's look around the World and think which Countries would support this reform. The answer is every country other than USA will give full support and vote to this global economic reform. Once this is done, World will be a truly competitive space where talent, capability and effort will be truly rewarded. And World will get a break from USA that is constantly blocking, constantly policing all other countries to stop their progress and growth. India must take the lead to drive this initiative through G20 summit and other global forums.

Roll-out Steps: The procedural steps involved in launching 'Project Earthling' will be as follows.

**Step 1** - The initiative must be introduced at several global forums, such as G20 Summit, WTO, WIPO, UN, World Bank, IMF and all country governments and CB's.

**Step 2** - Discussions and voting. The introduction would lead to discussions at many levels. Post discussions, a UN voting must be conducted, with one vote per country on the subject. This initiative will be voted in. A governing body must be established (name, governing team and other details).

**Step 3** - Once the initiative is voted in, we need to design the currency bills. (a) Billion and Million Earthling bills for CB holdings and exchanges. (b) 1000, 500, 100 Earthling bills for citizen (international travelers) exchanges only. There shall be no other denomination (for e.g., currency bills of 50, 10, 5, 2 or 1 used for local purchase transactions). As no country allows purchase/sale (or local / domestic retail businesses) by using Earthlings. It is only an International trade currency and foreign exchange currency and not for domestic trade or business.

**Step 4** - 3 Mints that will print Earthlings shall be set-up in a single location. These mints will be governed by all countries (their representatives); and will be under 24\*7 surveillance. The location should ideally be in India, China or Europe. City to be selected.

**Step 5** - Flushing USD's from all non-USA countries. Earthlings shall be printed to replace USD holdings of all countries (their CB's). The exchanged USD's should be retrieved and trashed / shredded (as in truly replaced).

**Other ongoing steps** - As per CB's purchasing needs against their local currency (or other currencies they hold), they could buy Earthlings from the 'Earthling' governing body. Such an activity of buying Earthlings shall be an ongoing activity.

This may be called as a social scheme, that I do not endorse. I believe that each Country must earn its living and get rich. If the governing body chooses an Earthling distribution step, in a rare global economic distress situation; they shall print and distribute Earthling's equally to every country.

The entire reform could be rolled out in 1 or 2 years. This baselines the World economic situation with a much better balance and gives equal opportunity to all countries in global trade. All countries can aspire to develop and get rich, without any roadblocks.

Title: PROJECT EARTHLING©. Reset Global Economics.

A Macro-Economic Reform and a Global Banking Reform.

This initiative brings about trade, business, and economic equality for all 193 countries.

This initiative delivers TRUE Independence / Freedom to 192 World countries.

The reform ends all forms of slavery in the world.

The reform ends usd-\$ monopoly and thus ends financial lever, political lever, economic lever applied by usa in the old world order on the world countries. The usd-\$ bribing culture promoted by usa will end.

This should have happened 200 to 300 years ago. The correction must happen right now.

Persistence of the Problem and its effects in last 245 years:

- 1) 245 years is an approximated post usa independence time frame; when usa formed its own government, usd-\$ currency rolled out and started its reign. Apparently, us Dollar existed in other forms for a few centuries before they got independence, however, that era may not be fully relevant to this discussion.
- 2) In these 245 years, usa has controlled, manipulated, and extorted wealth from all other 192 countries in the World, by making usd the standard for global trade and transactions / businesses. They monopolized usd as the currency for international business deals and transactions.
- 3) Over the last 245 years, usa has cheated all 192 countries in the World, cheated all humanity by enforcing this flawed system, by which they selectively delivered development to their chosen countries and denied wealth, economic growth, and prosperity to the other countries. The stark demarcation in developed countries and the rest of the World is visible to everyone.
- 4) usd has been kept in artificial demand over the last 160 years, based on monopoly achieved and its globalization. Wall Street and all major banks (say a dozen) in usa are directed and governed by 'Goldman Sachs'. Goldman Sachs have manipulated the global economy by keeping usd demand artificially high over the last 160 years, which resulted in its continuous strengthening over most other world currencies over this time-period. It must be understood that during the usa market crash of 1920's and even the 2008 Housing bubble burst that was induced, usd did not show a sign of weakening, except for an induced blip for a week or two.
- 5) The above point must be understood by all 192 countries very clearly. Let us take five sought after global commodities for discussion of this point. Crude oil barrel, Gold, Wheat, Natural gas, and Coffee. These commodities have been imported by most world countries at the global trade listed

-140-

PROJECT EARTHLING©  
Additional details about the macro-economic reform

price. All the countries that bought these commodities at such a listed price have been cheated, have been made to pay more than what the commodity's real price was (based on its true demand and supply); because an always strengthening usd against most world currencies (in which the countries imported or bought them) resulted in "Exorbitant, unrealistic, inflated" import bill(s) to those countries. The same analogy must be extrapolated to all globally traded or sought-after commodities in the World.

- 6) usa has taken 192 other world countries for a ride, by cheating them with this "two moving frames of reference", and all countries have been ripped off with exorbitant import bills, due to usd being kept in artificial high demand. All 192 countries have been cheated by usa, and their usd for the 245-year period, in almost all imports that were priced in usd, that a country has ever made.
- 7) usa has made the world countries, world leaders, global organizations look like idiots, morons and cheated them by exorbitant import bills for not one or two years, but for a sustained period of 160 to 245 years.
- 8) Should the 192 countries ask for reimbursement of all these losses incurred by them over 160 to 245 years? The answer is YES. Will usa reimburse for the losses related to unrealistic import bills now in year 2023 or years to follow? The answer is THEY MUST. The 'Import bill fraud' lawsuits must be filed by 192 countries after 'Project Earthling©' is taken live. The factors that are relevant to 'import bill fraud' lawsuits are (a) Principle of transference – Importer must claim fraud payback from exporter. The exporter will transfer the claim to usa as their pricing in usd and the manipulated usd caused the fraud. Effectively, the exporter could be kept out of the equation, and all importers can directly file fraud suits against usa. (b) Given that 'united nations' is a puppet organization paid for in usd-\$, 'International court of justice – ICJ' is not the right court to seek justice for 'Import bill fraud'. In my proposed Judicial Council, a World court will be organized in the near future which will be fully capable of delivering justice to all the world countries for the 'Import bill fraud' committed by usa. The World court will be capable of taking in G V/S G (Government V/S Government) lawsuits and also B V/S G (Business V/S Government) lawsuits to deliver justice on each suit filed, presided by a neutral country bench of judges. So, each of the 192 countries must cumulate all their imports from at least the past 100-years (more depending on data availability), and file a suit against usa, in the World Court at Judicial Council and get justice delivered, and monetary payback for the exorbitant and fraudulent import bills.
- 9) The World must first correct the flawed system. Set things right. Introduce Project Earthling©, get it voted in by 193 World countries and take it live by Japan time 00:00 hours of Jan 1st, 2025. This will first put an end to usa's abuse of the World countries by using their currency usd. And all the globally traded and sought-after commodities will be priced in a non-fluctuating reference currency called 'Earthlings' which will reflect the true, real price of each commodity based on its demand and supply, without any artificial currency demand and its related inflated pricing linked to it. No country will be cheated on its import bill in the future. All countries will pay what the commodity being imported truly deserves.

Edits / Corrections to be recorded from the copyright version:

- a) World Bank and IMF will cease to exist. So would the need for any world regional banks.
- b) Step 6 of implementation steps – Monitoring country treasury balances and controlling Earthling printing. Begin of normal – regular GEC operations.

PROJECT EARTHLING©  
Additional details about the macro-economic reform

A graphical representation of the problem of 160 to 240 years.

### How USA cheated the World with unrealistic import bills?

The higher Import bills paid by most countries due to second moving frame of reference USD (\$) and its monopoly, for a sustained period of 150 to 240 years.

- USD (\$) is the local, domestic currency of one country USA.
- Over the last 150 to 240 years, they achieved global monopoly for USD (\$), by making it a global trade, business deal standard and having most global commodities priced in USD (\$).
- This allowed them to artificially keep USD (\$) strong and thus have had most countries pay more than what they should have paid for their imports. That is how they cheated the World.
- Not for 5 or 10 years. This phenomenon (a flaw costing money to the world countries) has been going on for 150 to 240 years, unnoticed.

15 January 2020    Reset Global Economics & Enable New World Order    Enabling colorful times

With this reform, countries will not be cheated on their import bills anymore.

### Solution to the Problem Project Earthling© - 'Global Earthling Council'.

Import bills of most countries in Earthlings currency (Non-moving frame of reference), No one will get cheated.

- Make USD (\$) a local, domestic currency of USA only. Not a global standard.
- Introduce Earthlings as the global trade and business currency. While not being the currency of any one single country. All forex transactions must happen between local currencies into Earthlings & vice versa.
- This will reflect the true price of commodities, based on its real demand and supply.
- Earthlings will hold their value for a period of 10 years, and then strengthened or weakened (to support global economy) to hold the new value for another period of 10 years.
- An independent body called 'Global Earthling Council' must be formed to keep strong financial control on Earthlings printing and global financial transactions. It must have all country representation for governance. GEC will be responsible for anything and everything to do with Earthlings.

15 January 2020    Reset Global Economics & Enable New World Order    Enabling colorful times

PROJECT EARTHLING©  
Additional details about the macro-economic reform

Global Impact of Project Earthling©

The horrors and problems inflicted on world countries by old world order is solved permanently. The problem of 191 world countries and world citizens is solved.

Problem definition of old world order: The unequal world, with economic inequality, business inequality, trade inequality, dripping with racism, hatred, and jealousy, along with forced slavery in different forms imposed by rouge old world order usa, uk, and puppet un, on 191 world countries.

When the expenses of 'World governance' are paid in a world neutral currency such as 'Earthlings', all problems defined above, inflicted on the world will end permanently. I attach document 21 with this lawsuit that introduces the new governance model 'United Nations Global Governance Model 2020©' in which the GI-50, G-193 and all the other councils will all be paid for in Earthlings.

GI-50 and G-193 Councils to govern the world in the right way, with actionable governance. This ends the rouge old world order controlled by usa which also ran a puppet and sham un.

The old world order attempted some groupings of countries which never took any actionable, measurable, responsible, accountable decisions.

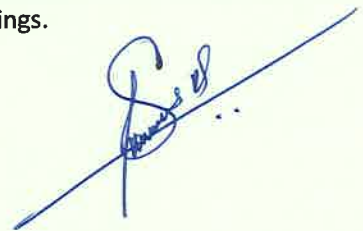

Examples of such groupings of countries are G-7 (Group 7) or G-20 (Group 20) countries. These groups of countries have met several times, and dispersed. They are just a forum for talking, and giving speeches, all of which never culminated into actionable development work or initiatives for the other 186 or 173 world countries.

Positive effects of Project Earthling© on world countries.

All the world countries / geographies

Let us look around the World and think which Countries would support this reform. The answer is every country other than usa will give full support and vote for the implementation of this macro-economic reform. Once this is done, World will be a truly competitive place where talent, capability and effort will be truly rewarded. And World will get a break from usa that is constantly blocking, constantly using negative strategies at all other countries to stop their progress, development, and economic growth. Myself and India will take the lead to drive this initiative, present it to 193 world countries and get it implemented by the result of the decisive voting.

India and China: India and China are the two most populated countries in the World. The trouble for the old world order came right here. With such large population and vast resources, the countries cannot accept being 'Captive countries', always controlled, dominated and commanded by usa in the old world order. As an Indian citizen, 'Project Earthling©' evolved from that very feeling, wanting independence for my country and true freedom, to build our own wealth and treasury, which is independent from the control levers of usa and old world order. Project Earthling© enables just that. I am sure every Indian citizen will rally with their support to me in this initiative. I also think every Chinese citizen shares a similar sentiment and will rally their support to 'Project Earthling©'. If not for this project, to begin with India and China cannot dream of becoming 20-25 Trillion economies in the next few decades. Post 'Project Earthling©', India and China can aspire to become the largest economies in the World and not be 'Captive Countries', by holding usd; but be free countries by holding reserves in Earthlings.

PROJECT EARTHLING©  
Additional details about the macro-economic reform

BRICS group: It is a representative group of Developing countries. There could be other countries added to this list, which are in a similar mold to build up their economies. Project Earthling© will firstly free these countries from all clutches of usa; eliminate all roadblocks to their progress and development and finally enables them to hold their own wealth, treasury reserves in Earthlings. This makes them independent and free countries; competing on a level playing field and they can cumulate their wealth by true production of products and services. This analogy extends to all other developing countries in the World.

European Commission - EC / European Union: The European Union can continue to function as a union without any significant changes, in the Post Earthling world. One adjustment could be that they need not mandate or request the union countries to adopt Euro as currency. An estimated 19 off the 27 EC countries have embraced Euro currency. All the trade between the union countries can happen in Earthlings. This allows the union countries to retain their old currency or switch over to Euro if they choose to.

Here is a 'Point of view' – In the money based (capitalism) ideology, any two countries operating / doing local business (retail transactions) using a single currency are really one and the same country.

All other countries in the World: The key benefit to all countries in the World, is that now it shall be a truly decentralized World, with no one commanding country. With this reform taken live, I have proposed the new world order macro-reform, a macro-governance reform 'United Nations Global Governance Model 2020©', which will deliver much better governance for all the world countries with GI-50 Council (Group Influential 50 Council) and G-193 Council as the top Councils to lead the world into the future. This new world order, will enable conducive environment for all countries in the World, to voice their independent opinion on all world subjects and cast their vote at the Councils. The new world order and Global Earthling Council will allow these world countries to independently develop their economies, cumulate wealth in Earthlings, get rich, and become responsible countries.

World economies after Project Earthling© goes live.

The world economic order will become proportional to world population order. Project Earthling© is the first step in that direction. It will eliminate roadblocks, truly decentralize all the world countries; and delivers level platform for everyone to compete, do business, do trade in the right way.

A major advantage: is that when all countries hold their wealth in Earthlings, in the 10-year cycle when Earthling is either strengthened or weakened by 'Global Economic Council or Global Earthling Council'; no one country would complain, as what happens to you is what happens to everyone in the World. When all the world countries have no complains, it means everything is in right order. This project of mine will put Earth on the right orbit of development, peace, progress, and prosperity to all countries in the World.

PROJECT EARTHLING©  
Additional details about the macro-economic reform

NEW WORLD ORDER TO ESTABLISH AFTER PROJECT EARTHLING© GOES LIVE:

- The NEW WORLD ORDER that would be organized after Project Earthling© goes live comprises of Group Influential 50, GI-50 Council, Group 193, G-193 Council, and Earthling Council, which along with other Councils will govern the world in the right way. Their work will be unbiased and genuine as all their expenses are paid for in Earthlings currency, a world neutral currency.
- This NEW WORLD ORDER, all its Councils will work for all the world countries, with responsibility, accountability, actionable plans, delivering measurable results.
- For all the globally relevant subjects, high impact subjects, crucial decisions to be taken, select regional subjects impacting many countries, the NEW WORLD ORDER COUNCILS will believe in and function by choosing democratic voting / poll conducted across 191 participating member countries as a standard method, at one vote per country.
- Project Earthling© will decentralize the World and will ensure that no one country's currency will work in another country. This truly brings equality to the World and puts a stop to bribing or financing 'Questionable activities', in another country.
- Global Earthling Council, GEC will monitor the 'Mints printing Earthling bills' and will have all country member delegates representation. This ensures right printing of currency Earthlings, right spend of funds in poor country development packages and on global initiatives.
- The New World Order Councils will govern the World in the right way. This was much required and is about 200 to 300 years too late.
- All New World Order Council expenses would directly be reimbursed by GEC (Global Earthling Council), against the local currency annual (financial year) expenses of running their offices at an individual country level. This allows New World Order Councils to expand their offices network across the world, hire more according to requirements to ensure right governance.
- The New World Order will ensure tabling the right subjects for discussion, debate, research, analysis and making decisions on all relevant, key and important global subjects.
- On a global scale few such important subject matters could be tabled for discussion and debate of all 193 member countries. And on such subjects which are relevant to the World – all 193 countries, a democratic voting method (at one vote per country) could be used to make decisions and take action pertaining to the subject. Examples of such subjects could be: a) Enforcing human rights across the World; b) Ensuring every country has a voice at G-193 council to speak and discuss the problems they might have; c) Managing energy demands of the World between various sources (oil, thermal, natural gas, chemical – electric, wind, solar, etc.); and throttling investments and research in one technique over the other or even finding a new renewable source, and the downstream effects of such decisions on 193 countries; or similar. These are some examples of global subjects which could be tabled for discussion at G-193 Council and brought for decisive voting and action.

The macro-governance reform 'United Nations Global Governance Model 2020©', a new world order is attached as document 21 with this lawsuit.

PROJECT EARTHLING©  
Additional details about the macro-economic reform

Each Country Earthlings reserve equation

Current Earthling reserve = Last year 'Earthling reserve' – Total FY Earthling reserves spent on national development work – Total FY imports + Total FY exports plus or minus Citizen activity.

Wherein.

Citizen activity is international travelers (incoming and outgoing) exchange of Earthlings to local currency and vice versa at forex counters; and plus or minus Non-business citizen remittances in Earthlings (incoming and outgoing) through Banks.

The data of FY imports and exports will be available with the 'International trade bank'.

GEC policies will be subjected to amendments over a period of time. The formula may adjust according to some policy changes or amendments. GEC may give development loans (packages) by recording it as a long term loan & debt against the Country's financial records. Many countries that qualify and belong to poor countries or developing countries, will take the loans (once they see & understand my Earthling Foundations work and upcoming initiatives in India) and want to emulate the work in their country.

Opening National Treasury Balance as recorded by Global Earthling Council.

Global Earthling Council will record the opening national treasury balances of all countries when Project Earthling© goes live.

GEC Opening Balance for 192 non-usa world countries: The easiest option for the 192 World countries would be to just record the actual (current day) opening balances for their countries with GEC.

GEC Opening Balance for usa: Given the unlimited printing of usd (\$) for over 245 years by usa, the 192 World countries will not allow any opening cash balance for usa in Earthlings. So, usa GEC Opening Balance shall be 'ZERO' cash component. The Fort Knox gold reserve will be recognized as non cash component by GEC, given that it has been well documented and recognized by all world countries. Fort Knox gold reserve was estimated at 380 Billion \$ few years ago.

Record keeping by 'Global Earthling Council' - GEC

GEC will own the activity of printing Earthlings as per requirement and need of first cash reserve for ITB – International Trade Banks, Forex counters, and replacing declared usd-\$ reserves. At the time of launch of Project Earthling©, the first entry (of national treasury reserves) per country will be recorded by GEC on actuals and will be monitored quarterly and tracked annually.

PROJECT EARTHLING©  
Additional details about the macro-economic reform

Baseline National Treasury reserves recorded by GEC when Project Earthling© goes live

Simple objective: The Central bank starting balances when Earthling goes live must be a true, real reflection of the existing world and each country's economies and their real earnings. This is the objective, when Earthling goes live and Countries across the World baseline their Central bank starting balances with GEC. Real reflection of true earnings is the key phrase.

Key Factors related to the 'First entry' and ranking of National treasury balances:

- The sale of worldwide IP rights to my invention US 8,910,998, will allow me to bring the full value of 93 Trillion Earthlings / \$ into India. Myself and India would declare our opening national treasury balance which will be a fraction of the 93 Trillion Earthlings. This will be the declared opening balance of India which will also form Indian Treasury physically located in India.
- Myself and India will move towards achieving 'Goal Year 2050 for India' in which I will be launching a series of initiatives over 30 years by way of Earthling Foundation initiatives, Private and Public, along with economic reforms implemented through IEC – Indian Economic Council policies. This will be rephrased as 'Goal Year 30 FE for India' in the near future.
- usa has been printing usd-\$ for themselves and for the world, as much as they want, and mixing it into the Global trade, banking, and business system for past few centuries. Hence, there is no reference starting point for usa balance. This must be recorded by all world countries. Hence their opening treasury balance cash component will only be zero.
- Given the commonality due to race, religion, english only speaking, white supremacy ideology, usa has shown favourism to its siblings of old world order uk, Canada, Australia, and New Zealand. Hence their starting balances must also be validated by the global community. Needless to say, they must be on actuals and they will certainly rank well below usa.

GEC National Treasury balance components

You can also read it as 'GEC National Wealth balance'. So, when you think of what cumulates into National treasury reserve?

The answer is simple. "Wealth" only. Examples of what adds into national reserve: Cash reserves, commodity reserves built by cash (e.g., Fort Knox gold reserve in usa).

What does not constitute national treasury or national wealth reserve?

Natural resources / reserves, minerals etc., (in Earth). It is not 'Wealth'. Or at least not translated into wealth. Examples are: Estimates of iron ore reserves, oil reserves, minerals, or metals in mine sites, or similar.

PROJECT EARTHLING©  
Additional details about the macro-economic reform

Implementation Steps for Project Earthling©:

The procedural steps involved in launching 'Project Earthling©' will be as follows.

**Step 1** – The initiative must be introduced worldwide via global media houses, and at several global forums, such as WIPO, and to all country governments and central banks.

**Step 2** – Discussions and voting. The introduction would lead to discussions at many levels. Post discussions, a WIPO voting must be conducted, with one vote per country on the subject. This initiative will be voted in. A governing body must be established (name (e.g., Earthling Council, or Global Earthling Council, or Global Economic Council), governing team (e.g., One member from each country) and other details (e.g., role, responsibility, scope of work, High level Directional document, etc.)).

**Step 3** – Once the initiative is voted in, we need to design the currency bills. (a) Billion, Half Billion, Million and Half Million Earthling bills for Central Bank holdings and exchanges. (b) 10000, 5000, 1000, 500, 100 Earthling bills for citizen (international travelers) exchanges only. There shall be no other denomination (for e.g., currency bills of 50, 10, 5, 2 or 1 used for local purchase transactions), as no country allows purchase/sale (or local / domestic retail businesses) by using Earthlings. It is only an International trade and business currency and foreign exchange currency and not for domestic trade or business.

**Step 4** – 3 Mints that will print Earthlings shall be set-up in a single location. These mints will be governed by all countries (their representatives); and will be under 24\*7 surveillance. The location should ideally be in India, China, or Europe. City to be selected. Drive the registration of 'International Trade and Business Banks' – ITB, registered in all 193 world countries.

**Step 5** – Flushing usd from all non-usa countries. Earthlings shall be printed to replace usd holdings of all countries (their Central Banks). The exchanged usd should be retrieved and trashed / shredded (as in truly replaced). GEC to provide the first reserve cash drop of Earthlings to all the registered ITB banks across 193 world countries. They shall also finance the Foreign exchange counters enabling bi-directional local currency to Earthling exchanges.

**Step 6** – Monitoring and Controlling the Earthling printing. Begin of normal – regular GEC operations. After replacing the reserves of each country (their Central Banks) by Earthlings, GEC would give first cash reserve drop to ITB and Forex counters across all countries. Based on the analysis of trade requirements of countries (categories of countries), adjustments could be made to GEC policies over a period of time.

The entire reform could be rolled out in 1 or 2 years. This resets the world economics and baselines the world economy and gives equal opportunity to all countries in global trade and business. All countries can aspire to achieve progress, development, and get rich, without any roadblocks.

Significance of Project Earthling© - A Timeline marker for Earth:

The Launch of Project Earthling©; will be so significant to humanity, that the years could also be reset to start from ONE. It marks the time of World getting real freedom, real independence from usa and uk regime and tyranny. The World, its 193 countries, its 9.5 Billion people are truly liberated, at the time of launch of Project Earthling©. It marks the end of slavery and lawlessness in the world, and the beginning of a structured and law-abiding world. It delivers trade, business, and economic equality, freedom and independence, baselines 193 country economies and allows them to grow from there. About 2020 years

PROJECT EARTHLING©  
Additional details about the macro-economic reform

ago BC (Before Christ) came to an end. And the years were marked as AD, Anna Domini. The launch of Project Earthling© will mark the end of the rouge regime run AD – Anna Domini years, in particular the last few centuries. Hence, the beginning of a new era is inevitable and absolutely essential.

**Project Earthling© - Timeline marker for Earth**

A distinct timeline marker that stands out as the most important transformational event by delivering:

- Freedom to all humans on Earth
- Independence to all 193 countries
- End to slavery
- End of unjust rouge self-proclaimed capitalism driven leadership

Earth at an estimated age of 4.54 Billion years.

Years 2015 2019

End of year 2015 – Conceived the macro-economic reform.  
11/1/2019 – Authored, documented and published Project Earthling©.  
16/1/2019 – Filed for copyright with Indian Copyright office.  
22/2/2019 – Indian copyright office issues copyright with registration number L-81033/2019.

3 September 2020

Visit [www.Srinivasdevathi.com](http://www.Srinivasdevathi.com)

When Project Earthling© goes live, the years could now be marked as FE.

Given the worldwide impact of macro-reform 'Project Earthling©', FE stands for and implies,

- Freedom to Earth
- Freedom by Earthling
- Freedom to Earthlings
- Freedom to world countries by launch of Project Earthling©

The new era marks the end of all forms of slavery, delivers real independence to all the world countries, delivers real freedom to world citizens, liberates humanity from the shackles until death grip of old world order, terminates what was to be never ending racism, hatred, jealousy exuded by old world order translating to suppression of world countries and world citizens.

Termination and death of AD – Anna Domini years.

2024 could be the last AD year. And must also be called as the 0 FE year.

The 2025 AD must be reset as 1 FE year. And could increment from there onwards.

PROJECT EARTHLING©  
Additional details about the macro-economic reform

Is the World ready for FE years? I think they are more than ready to live in a real and true World with full freedom and independence. I think this point of liberation, freedom and independence is about 300 to 500 years too late. We must make it happen now.

My final choice for FE is 'Freedom by Earthling'. It is apt and marks the beginning of a glorious and prosperous future for world countries and world citizens.

Transition of 'Old world order' to 'New world order'.

In order to enable the transition from the rouge old world order into the future 'New world order', and to put all the information and details in perspective for the 9.5 billion world citizens, and the governments, leaders of all 193 world countries, I have started to author the 'Right perspectives for the world'. I have authored a total of 79 'Right perspectives' until now, and will have many more to come.

These 79 'Right perspectives' have been published at my website webpages:

Webpage 1 – <https://srinivasdevathi.com/right-perspectives-for-the-world/>

Webpage 2 – <https://srinivasdevathi.com/right-perspectives-for-the-world-continuation/>

A copyright application is filed with these 79 'Right perspectives for the world', with Indian Copyright Office, with name 'Right perspectives for the world' – online, under literary work, taken in with diary no. 25790/2022-CO/L. The lawyers Anand and Anand have filed for this copyright application with Indian Copyright Office. I shall submit the registered Copyright to the Honorable court in upcoming hearing dates.

To read the 'Right perspectives for the world' that are specific and directly related to the macro-economic reform 'Project Earthling©', I request you to visit the webpage links given above and read the following perspectives or Point of views – POV, POV 8, POV 10, POV 2-19, POV 2-23, POV 2-24, POV 2-25, POV 2-32, POV 2-44, POV 3, and questionnaire POV 16.

PROJECT EARTHLING©  
Additional details about the macro-economic reform

The 79 perspectives detail the following:

The perspectives, POV - point of views, are authored to clearly explain and define the wrongdoings, negative ideologies, sabotaging ideas, destroying agendas, imposing all forms of slavery, forcing human trafficking for labor slavery, and sex slavery, along with devious diabolical objectives of killing people from across the world to harvest their organs and hearts to get a second life, of the old world order.

The perspectives, POV - point of views, are authored to clearly explain and define the NEW WORLD ORDER which will deliver real freedom, true independence, to all the world countries, all the world citizens, brings about economic equality, business equality, trade equality, ends all forms of slavery, defines international law, medical law, and COUNCILS which genuinely work for the established ideologies.

These perspectives, will enable the transition from old world order into the NEW WORLD ORDER, thus liberating the world countries and world citizens from the strangle hold slavery of old world order.

Abbreviations used:

- ITB – International Trade Bank, WIPO – World Intellectual Property Organization.
- BRICS – Brazil, Russia, India, China, South Africa (Developing countries group).
- IMF – International Monetary Fund.
- usa – United States of America (Country); usd – US Dollar (The currency of usa).

UNITED NATIONS GLOBAL GOVERNANCE MODEL 2020  
Srinivas D.S. – Aug 6, 2019

**Author:**

Srinivas S. Devathi

63, 11<sup>th</sup> B Cross, 3<sup>rd</sup> Main,

Prashanthnagar, Bangalore – 560079, India

**Title:** UNITED NATIONS GLOBAL GOVERNANCE MODEL 2020. (UN GGM 2020).

Enable New World Order.

**History and preamble to the problem definition:**

Over the last 300 to 600 years, the World (now 191 Non-USA, Non-UK countries) and its population (now an estimated 9.5 Billion people) have been governed the wrong way.

USA and UK which have lead the World (all its countries) and people over the last 300 years (USA) and the block of 300 years before that (USA and UK together); have only put their interest, their wealth, their supremacy, their domination on the World as priorities all this while; and completely ignored the needs of the individual countries and people.

While doing so, they have controlled every country in the World with an engineered lever of control.

While doing so, they have eliminated any competition in the World, at a national level (competitive country), at a corporate level and at individual human level that showed promise and talent.

While doing so, they have hosed up many World nations with 'Drug trafficking' by creating demand for it, other nations with 'Constant fights after dividing them' by supplying arms and ammunition to fight, other nations with 'Economic control by keeping their wealth in USD (\$) in USA Banks', other nations with 'Poverty with no outlet given to come out of it', other nations with 'Illiteracy and ignorance, to steal their natural resources', other nations 'Declared as rouge nations or terror sponsoring nations with no option of redeeming themselves', other nations 'designed as sex capitals to encourage sex trade or slavery, with no methodical way to manage it', and so on.

Similarly, they have hosed up all Non-USA and Non-UK corporations / companies by controlling them by their currency (USD or Pound) and by their command / order.

Similarly, they have eliminated talented people, talented couple and talented groups of people across the World, to eliminate any competition or threat to their supremacy and control on the World.

They have done all the above, retained control and grip on entire world (all countries) and all its population, with sole intent to keep the world suffering in problems, deny

UNITED NATIONS GLOBAL GOVERNANCE MODEL 2020  
Srinivas D.S. – Aug 6, 2019

progress & development and further deny peace & prosperity; so that they retain the leader status, pole position on all parameters in the World.

Simply put USA and UK over the last 600 years of governing the World, have made the World a bunch of slave nations which are captive to them and must abide and follow their orders. This is a slave planet by design and engineering of USA and UK.

They have achieved the above by 'Financial control'. Financial power / muscle is the strongest lever that controls the World and is the source to create all other levers. A suitcase of USD (\$) or a suitcase of Pounds will get anything done in any part of the World, when thrown as a bribe. They have used unlimited printing and unlimited bribing (they promoted the law breaking, bribing culture across the globe (which they have termed as lawless international waters) for their benefit) to achieve whatever they want across the World. This bribing is the source to their control and dominance.

In order to achieve all the above and retain grip on the World, they have controlled all Global organizations, all Global Treaties, Global Pacts; and further manipulated and twisted them to take and follow their orders; and work for them / in their favor.

UN Global Governance Model 2020 is the right way, the correct way to govern today's World; so that the needs, aspirations, progress & development needs, peace & prosperity needs of all World nations and its people are met.

Problem Definition:

As described above, history clearly suggests that USA (with UK as an ally) has used their currency USD (\$) (as Project Earthling© is yet to roll-out) to pay for all global organizations and executing, maintaining and enforcing most global Treaties. While, paying for them, they have controlled, manipulated and engineered all these global organizations and treaties to their benefit and advantage alone, at the expense of the benefits to the World (other countries). The true essence of these global organizations and treaties has been lost, diluted and rendered ineffective; by USD based capitalism model driven greed, generated across the world, which was used as a manipulating factor.

Launch and roll-out of Project Earthling© will change all of this and bring true legitimacy to all global organizations and treaties. The 'United Nations Global Governing Model 2020' will truly govern the World in the right way, upholding the real purpose, intent and objectives of Global multi-country treaties and all the Global organizations; as it should have been in the last several centuries.

This model is inevitable to the World. It should have happened a long time ago. It brings credibility, reliability and real/true enforceability to all global organizations, all global multi-country Treaties. Example of global organization: World Bank, unable to fund my project/invention though my invention was global in nature. Example of Treaty: PCT – Patent Cooperation Treaty. They (USA and UK) have shown no respect to PCT, the Treaty.

A handwritten signature in blue ink, written over a diagonal line. The signature is stylized and appears to be "Srinivas D.S.".

-154-

UNITED NATIONS GLOBAL GOVERNANCE MODEL 2020  
Srinivas D.S. – Aug 6, 2019

Background thinking:

Project Earthling©, a global macro-economic reform and a global banking reform is another authored work of mine. When this goes live, USD (\$) will become USA only local currency. Pound will become UK only local currency. And Earthlings will be the international trade, foreign exchange and national reserve currency.

When this happens (Project Earthling© going live), the financial control of USA and UK is taken out of the equation. I don't have to explain that financial control is the strongest lever USA and UK have used to control the World. The backbone, the true lever behind all other levers, is the financial lever. When this financial muscle is taken out of the equation, USA will become just another country, one of the 193 countries in the World. UK will also become just another country, one of the 193 countries in the World. This means USA = UK = Tonga (an example) = Any other country in the World.

Once the above is achieved, USA or USA in combination with UK cannot control or govern this World anymore. The World will become a bunch of equal nations. 193 countries that are all equal, and because of which, each country can attempt to control their own future and destiny. All World nations can truly hope to drive progress & development in their country, achieve peace & prosperity in their country, with the roadblocks called USA and UK eliminated / removed out of their way.

The World Order:

For the last 600 years, everyone in the World, every country, every organization (global in particular) has reported to USA and UK. This is the old and outdated world order that does not meet the demands / needs of the current world. United Nations is paid by USA and hence reports to USA. They operate on the command and order of USA. Primarily because they are paid in USD (\$). Five out of the six main UN organs are located in New York, USA and they operate upon the orders and command of USA Corporations and USA Government (White House / President).

The correct World order must be the opposite of the above. An all equal 193 countries reporting to a 'United Nations' body which must be the True independent governing body for the World, delivering unbiased and equitable governance to the World. This is the future - United Nations Governance Model 2020 with GI-50 (Group Influential 50) and G-193 (Group 193) as main two organs / mechanisms to govern the World. This is the New World Order, and it shall become a reality very soon.

A handwritten signature in blue ink, appearing to be "Srinivas D.S.", written over a horizontal line.

-155-

UNITED NATIONS GLOBAL GOVERNANCE MODEL 2020  
Srinivas D.S. – Aug 6, 2019

The Solution: A new 'United Nations Global Governance Model 2020' which at least comprises of:

1. GEC – Global Earthling Council. It is a division within UN, which will be the 'Global financial control' division. It controls and regulates the printing and purchase of Earthling currency by the World nations. You can read more about GEC in my Copywritten work of 'Project Earthling©'. All the expenses of United Nations Global Governance Model 2020, its transition and future operations, will be paid by 'Global Earthling Council' – GEC in Earthlings currency in an annually reimbursable model against their (individual country) local currency expenses. This will enable UN GGM 2020 to grow, hire more, govern better and the right way.
2. GI-50 – It stands for Group Influential 50; a group of 50 countries which by virtue of their population, GDP, Technological advancement, Economic growth potential, Natural resources or a possible Geo-strategic factor (ensuring good spread and complete coverage of all regions in the World); enter the GI-50 group all of who together will govern, administer and run the World comprising of 193 (equal) UN member nations. This replaces G-7 and conventional G-20. And would certainly stop USA and UK from running the World. Another way of looking at this is a permanent expansion of UN security council from its current 5 permanent and 10 non-permanent rotational model into a permanent 50-member security council.
3. G-193 – It is a method by which every important / significant decision pertaining to the World / Planet / Region in the World that needs decisive voting will be put up for a decisive vote at UNGA after introducing the subject, allowing discussions, debates and finally conducting a decisive voting on the subject. Such a model is a true 'Democratic way' of making real informed decisions on all important globally relevant matters / subjects. The current UNGA and its operational model could be tweaked to evolve it into a formal G-193 wing. This transition will certainly have its impact on the UN Secretariat and the team structures within the Secretariat.
4. Economic and Social Council – The current EcoSoc unit within UN will expand and ensure coverage for entire world by regions, and where necessary operates at a national level.
5. Trusteeship Council – Will very likely be de-commissioned within a couple decades.
6. The Secretariat with its workforce will hire and expand outside USA and will eventually have teams in most regions and countries of the World.
7. The projected plan is to move Security Council (which will become GI-50); Secretariat and Trusteeship Council to select cities in Europe. And to move General Assembly (which will become G-193); Economic and Social Council and set-up GEC (Global Earthling Council) and GEC mints in select cities in India.

Transition Statements:

- 5 UN organs in NYC must be brought out of USA.
- They must be moved to Europe and India; both of which are true democratic nations/regions.
- After the UN Global Governing Model 2020 is implemented, the UN will invariably expand and spread across all the 193 countries to maintain, uphold all the global peace and prosperity objectives.
- So, eventually, UN will span the entire World, so that it effectively governs the World in the right way. The Model eliminates greed, personal interests of only one country USA or their closest

Page 4 of 12

A handwritten signature in blue ink, appearing to be 'Srinivas D.S.', written over a diagonal line.

UNITED NATIONS GLOBAL GOVERNANCE MODEL 2020  
Srinivas D.S. – Aug 6, 2019

allies (UK, Canada, ANZ); and brings out the real global needs of people across the World into focus.

- The Model will help deliver real, strong and effective governance of the entire World while delivering and moving the World towards Peace and Prosperity.
- USA will freeze all UN hiring; as all hiring and expansion will be outside USA from this point onwards. USA will pass the baton to the new 'UN Global Governing Model 2020' and will plain simply send their UN Ambassador (and his/her team) as their voice and voting member on decisive voting subjects. UK shall do the same.
- GI-50 together shall make all global governing decisions (pass executive orders or decisions) and as they feel necessary could subject any global subject matter / issue for a decisive voting at G-193.
- The details of additional UN divisions, team structures at regional level and national level will all be discussed and rolled-out alongside with UN-Vienna, UN-Geneva and UN-India teams. I will be introducing and getting this transition plan voted in at UN G-193 (General Assembly).

Working Protocol of United Nations Global Governance Model 2020:

Once the model is rolled out, the GI-50 (Security Council) and G-193 will operate as follows; at a high level.

All subject matters related to countries, regions, world are segregated in two broad categories. Is that a 'Subject to be reviewed, discussed, analyzed and acted upon by GI-50/G-193'; or is it a guidance matter for a single nation, as it is their internal subject?

Any topic that comes to UN, will firstly be evaluated by a team before it comes to GI-50. If the evaluating team thinks by law or nature of subject, it is an internal national subject to be dealt by the country, they will guide the country accordingly, by stating that it is an internal subject. Where applicable, if the country needs guidance on the subject, an expert advisory team will provide advice on the subject based on global past experiences from other countries, regions. This is providing guidance, support and marking/closing the subject as resolved.

The second category, once a subject is of a nature that it has multi-country, regional or global impact, it will be presented for the GI-50 Security council for debate, discussion and evaluation of the problem. At this point, it could take two directions. One, the subject could be resolved by an executive order issued by GI-50 or via an ICJ order (where applicable) to be implemented. The second direction is when GI-50 thinks that the subject needs debate, discussion and a decisive voting at Global level; it is referred to a decisive Voting at G-193 wing (Current day General Assembly - GA).

At GA – G-193; each such subject presented to them will be led by GA leadership team who will put out a calendar or schedule for decisive voting on the subject. For simpler subjects the decisive voting cycle could just be 1 week or a maximum of 1 month. An example or schedule for a globally debatable decisive voting subject (say for example) UN Global Governance Model 2020 itself is given in the subsequent sections of this document.

A handwritten signature in blue ink, consisting of stylized initials and a surname, written over a horizontal line.

-157-

UNITED NATIONS GLOBAL GOVERNANCE MODEL 2020

Srinivas D.S. – Aug 6, 2019

All the expenses of United Nations Global Governance Model 2020, its transition and future operations, will be paid by 'Global Earthling Council' – GEC in Earthlings currency in an annually reimbursable model against their (individual country) local currency expenses. This will enable UN GGM 2020 to grow, hire more, govern better and the right way.

**Roll-out in two phases:** Complete transition into UN GGM 2020 will happen in two phases and by December 31, 2021.

**Phase 1** – Complete Leadership teams' transition must happen before Dec 31, 2020. All the new divisions will be formed outside USA and the leadership teams are completely established. The national team pay-roll set-up, employment procedures, operational procedures, secure systems to work with, data warehouses to hold global data are all set-up in this Phase 1. One point to note is that the United Nations Global Governing Model 2020, will hold the most important data of the World, and from across the World; and further will roll-out and manage the most important projects in many countries and hence the data security and data management will be a very critical point for the 'Transition Leadership Team'. Especially, the GEC systems, baseline national economic data will be very sensitive data and must be maintained with high levels of security, so that no breach shall occur.

**Phase 2** – Complete Transition must complete by Dec 31, 2021. With new offices set-up and expanded team hiring across the divisions. This phase will also include the complete / full team transitions and new regional and national team structures set-up; with all required technology, systems and data warehouses taken live.

**Ongoing Governing Phase** – By Jan 1, 2022; United Nations Global Governing Model 2020 must fully go live with all operations fully active and mobilized. Their real 'Global progress & development' and 'Global Peace & prosperity' projects can take off in all countries of the World as appropriate.

**Possible key factors during roll-out and transition:**

UN-Geneva or UN-Vienna offices could be used to PIVOT and enable the entire transition. They shall play the most important role to enable UN to become a true global governing body. I shall be involved as I will introduce the model at General Assembly (G-193) and get it voted in along with UN-India team.

A pre-requisite for 'UN Global Governance Model 2020'; is the introduction and voting in of 'Project Earthling©'. Ideally, it is expected to go live by 00:00 hours Japan time Jan 1, 2020.

Once Project Earthling© goes live, it enables the funding for the Transition to happen; so that an UN-Geneva Transition team, its leadership team are established and all the hiring and transition related expenses to roll-out the new model are paid for in a reimbursement model by GEC in Earthlings.

Then, the 'UN Global Governing Model 2020' will be introduced at UNGA (G-193) and will be subjected for voting. Once voted in, UNGA will initiate an 'Advisory proceeding' at ICJ, so as to get a judicial order advising the UN transition team to complete the full implementation and roll-out of the 'UN Global Governing Model 2020' within a definitive timeframe, so that the World is effectively and properly governed.

Page 6 of 12

A handwritten signature in blue ink, appearing to be 'Srinivas D.S.', written over a diagonal line.

UNITED NATIONS GLOBAL GOVERNANCE MODEL 2020

Srinivas D.S. – Aug 6, 2019

Sample calendar entry / schedule to introduce 'UN GGM 2020' for discussion and voting in the current UN model, to get it voted in and take it live:

Example calendar / schedule for UN Global Governance Model 2020; Presenter / owner – Srinivas Devathi; Introducing team – Team of Srinivas Devathi from UN Vienna, UN Geneva (all existing divisions), UN India and others. UNGA G-193 Leader – Mr. Antonio Gutteras or his designate. A one-month decisive voting Calendar entry, for a truly global subject.		
DATES	Location	Comments / Activities
Feb 1 <sup>st</sup> 2020	UNGA at UN Vienna or UN Geneva (Voting cell). Parallel broadcast of the event to all UN offices and halls; all over the World.	<ol style="list-style-type: none"><li>1) This is the day when the subject UN Global Governance Model 2020 will be presented and introduced to entire UN team globally, at all halls. The event will physically occur at the Voting cell UNGA (G-193) of UN- Geneva, in complete detail. The event will be broadcast to all UN offices / halls globally. All 10's of thousands of UN employees to dial in to listen for at least the audio.</li><li>2) UNGA G-193 Leader will introduce the day's events and the decisive voting calendar entry.</li><li>3) Srinivas Devathi, the owner and Presenter of UN Global Governance Model 2020 will 'Introduce the subject and present several points of view about the introduced subject' and how it benefits / transforms the World.</li><li>4) This introduction is followed by series of talks / speakers who will present more point of views in the day. This is the Introducing team. Number of speakers and content decided based on 8- or 10-hour time window.</li><li>5) Presenter / Owner to point everyone to the website portals where all information, documents, fact set, transition plans could be accessed by all 193-member nation teams and pretty much everyone in the World.</li><li>6) Other UN members / leaders to point to detailed transition plans, new projected / planned team structures in the new model (new leadership model / new governance model) and additional information. All of this will also be available on internet websites for everyone to see and access.</li><li>7) UNGA G-193 Leader's closing remarks for the day at both halls and reminding the Voting heads of Voting cell on the calendar published and final voting date.</li></ol>
Feb 2,3 of 2020	The Voting cell heads / teams respective chambers	The voting cell heads at G-193 will digest all the information delivered along with their teams and prepare a super set list of all questions they have about the subject. No limit on the number of questions.

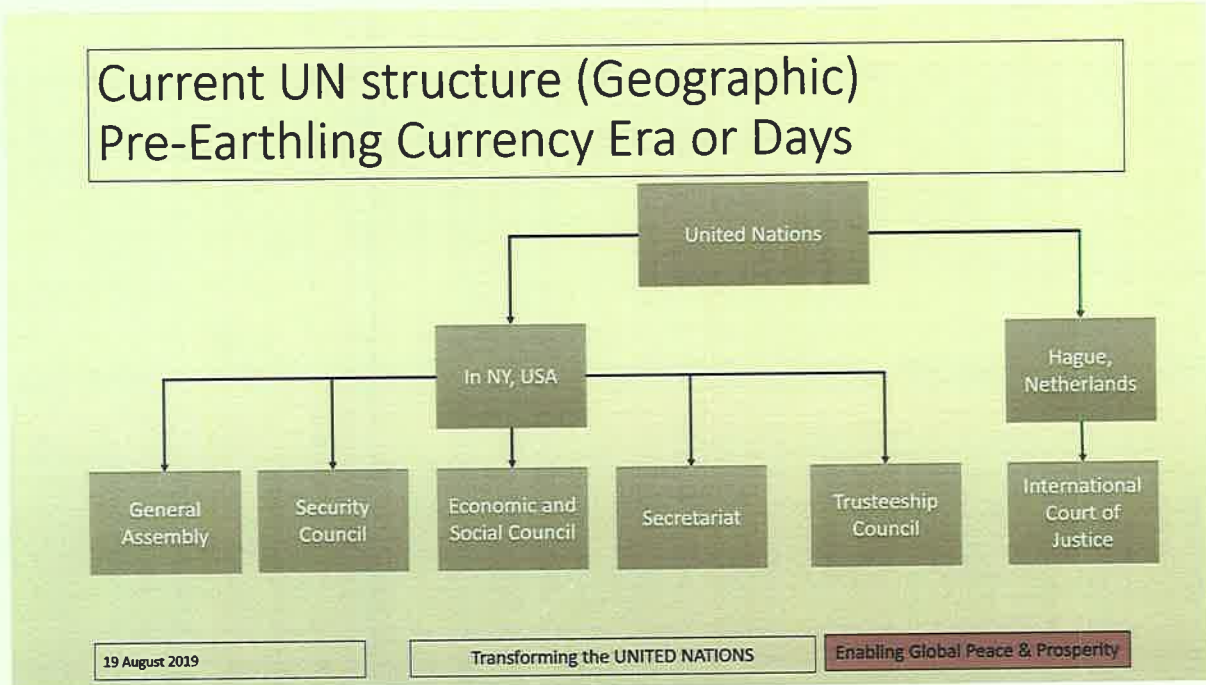

UNITED NATIONS GLOBAL GOVERNANCE MODEL 2020  
Srinivas D.S. – Aug 6, 2019

Feb 4 <sup>th</sup> 2020	UNGA G-193 Voting cell	With no end time on the calendar for that day, the presenter / owner, his introducing team (from across UN) to sit and answer all questions put to them by all 193-member voting cell heads. UN G-193 leader to preside the Q&A session. The Q&A session will go on until all questions are exhausted and addressed.
Feb 5 to 14, 2020	Internet	The Voting cell heads will have access to write to the presenter/owner and the entire introducing team (from UN) on any question they may have; that was not addressed in Q&A session or the content provided on portals. Deadline is half of the full cycle time.
Feb 5 to 27, 2020	Voting cell heads with their countries and sub-groups	This window is the internal discussion, debate, evaluation, analysis, internal polling (or survey) if required, get all relevant expert opinions, media discussions if required; such that the voting cell head has a decisive answer on the subject on behalf of his / her country. This could be firstly internal. Everything such as and not limited to; getting their government opinion (President, Prime Minister, King) or views, Ministry of External Affairs views, Relevant ministry views, Economist views, expert opinion, Business leaders views, Sector or Corporate views, others deemed as experts in the space or celebrities who can technically contribute, public survey or polls. Secondly, this could also be at discussions at groups of countries level as required. The 193 countries can form sub-groups to discuss the subject in greater detail, which may help in decision making.
Feb 28 <sup>th</sup> 2020	UNGA G-193 Voting Cell at say 10:30am	The Voting Heads of all 193 nations at UNGA G-193 voting cell will cast their final decisive vote by clicking the electronic vote button. The votes of all countries would be accessible for everyone for transparency.
March 1 <sup>st</sup> 2020		Security Council to receive the final decisive vote outcome from UNGA G-193 voting cell and the Security Council will pass on the implementation task – activity – plan to the Secretariat 'Action / implementation team'. A leader at the secretariat will take over and implement the voted subject to completion. Example: let's say UN Global Governance Model 2020 Phase 1 goes live by Dec 31 <sup>st</sup> 2020 and Phase 2 goes live by Dec 31 <sup>st</sup> , 2021. Simultaneously the Security Council or UNGA G-193 cell will initiate an 'Advisory Proceeding' with ICJ (International Court of Justice) to pass an Advisory order to complete the transition within a certain timeline, as per a finalized / agreed upon transition plan. The UN Secretariat Leader to preside and conduct the 'Go Live' Event for public and all countries to become aware of the project that went live.

UNITED NATIONS GLOBAL GOVERNANCE MODEL 2020

Future UN Global Governing Model 2020  
Transition Phase – All UN offices to collaborate  
and work with a strong transition plan

UN – Vienna and UN - Geneva	<ul style="list-style-type: none"> <li>•The key UN offices to PIVOT, be leveraged to enable and roll-out the transition.</li> <li>•Gradual well planned-out movement of Main organs and leadership team.</li> <li>•Will Set-up a Transition work-force, and work towards a clear transition plan. Will work with all global UN offices.</li> <li>•To start the Transition plan after Earthlings currency has been rolled out and implemented to pay for all UN transition and expansion expenses in Earthlings currency.</li> </ul>
UN - India	<ul style="list-style-type: none"> <li>•To collaborate with UN-Geneva to enable this transition.</li> <li>•To work with the clear transition plan and to work with all global UN offices.</li> <li>•To build the new offices / set-up for absorbing the main organs and setting up leadership teams.</li> <li>•To staff, increase team sizes to full capacity, as per the transition plan.</li> </ul>
ICJ, Hague	<ul style="list-style-type: none"> <li>•After the UN Global Governing Model 2020 is introduced and voted in by UNGA; to in-take an 'Advisory Proceeding' from UNGA to work and give a judicial order to fully implement the transition in a definitive timeframe. The objective is to issue an advisory order to the 'Transition Leadership Team', to work towards a real-implementable leadership and complete transition plan.</li> </ul>
NYC, USA	<ul style="list-style-type: none"> <li>•To support and collaborate on the transition of all 5 UN Main organs out of USA</li> <li>•To freeze all local hiring within USA for UN.</li> <li>•To move out all Leadership teams for all main organs out of USA.</li> <li>•Can take a break from running the World, as they have done in last 200-300 years. Can stay quiet and silent for couple decades with only their UN ambassador / EAM engaging with UN new model.</li> </ul>

25 October 2019      Transforming the UNITED NATIONS      Enabling Global Peace & Prosperity

Images related to OLD World Order and New World Order:

**New World Order Inevitable** Possible Symbolism Symbol.

Vehicle Color Change technology was invented by Srinivas Devathi in Q1 2007 (when he bought his third used silver car), and a USPTO patent application was filed in March 27, 2014; PCT global application was filed on July 15, 2014.

This invention has created wealth globally in the order of 93 Trillion \$ / Earthlings as sale price in 2019 \$, when GDPs of many countries in the World are in the range of 0.5 to 10 Trillion \$. In order to retain their supremacy USA and UK have used, abused the OLD-World Order to the hilt to block this wealth from me and India. They have abused the entire World and broke every law locally and internationally.

This has caused the World to go into introspection. In order to accommodate the invention in a structured manner (while retaining a good portion of the evolved current global organizations like WIPO, WTO, UN etc.), Srinivas Devathi has authored 'Project Earthling©' and 'UN Global Governance Model 2020'.

While accommodating the Invention, Project Earthling© will roll out a new, better, equal, uniform world; by improving the existing structure in place and rolling out a NEW WORLD ORDER of 'United Nations Global Governance Model 2020'. This will enable the right governance of the World (all its nations) and its people. Other countries and their citizens can aspire to create wealth for themselves and their country.

UNITED NATIONS GLOBAL GOVERNANCE MODEL 2020  
Srinivas D.S. - Aug 6, 2019

Benefits of New World Order  
Many to be Ignored

Project Earthling

- UN Global Governance Model 2020, will govern the World in the right / correct way.
- In the UN GGM 2020, GI-50 (Group Influential 50) will be an expanded Security Council which can take and pass executive orders. They will be fair as 50 countries represent the World nations and regions in the correct way.
- In the UN GGM 2020, G-193 (Group 193) will vote on all subjects global in a decisive voting process / mechanism.
- Project Earthling© will allow USA and Inventor Srinivas Devathi to resolve the 'Vehicle color Change Technology' subject in a systematic way and disburse the IP rights globally in a structured manner.
- Project Earthling© further allows conversion of USD to Earthlings so as to build our own Indian National treasury.
- India (or any Country) need not be a slave nation to USA or any other, by depending on their currency.
- Project Earthling© decentralizes all 193 countries in the World and make them independent.
- Each country in the World could build their own treasury of wealth in Earthlings.
- United Nations will become a much stronger Global governing body and will deliver fair governance.
- GEC (Global Earthling Counsel) is formed and it monitors wealth of the World.
- World is no more controlled by one or two countries. All countries will become free and truly liberated on the planet.
- All these global organizations will operate by voting (one vote per nation) on global subjects. Will have all 193 member nations indirectly on governing (or decisioning) board through GI-50 structure.
- The World together will govern Global governing bodies. It is much safer and no one gets cheated.
- Chaos in the World is eliminated. Proper structure brought into the World. There will be no more confusion, fraud or cheating.

 Reg. No. 2374, Bengaluru.

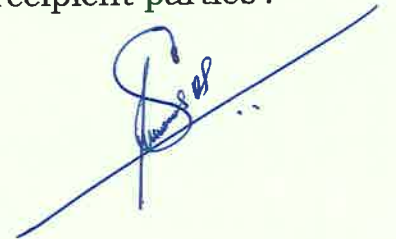

**IN THE HIGH COURT OF KARNATAKA, BENGALURU  
ORIGINAL JURISDICTION**

**W.P. No. 21782 /2022**

**LIVING WILL ADDENDUM EXECUTED ON 29-12-2022, TO  
ACCOMPANY ANNEXURE F OF WRIT PETITION**

I have executed, and legalized a LIVING WILL for 93 Trillion Earthlings / \$ wealth coming to me and to India by the sale of my invention. The Living Will has language built into it, which ensures the percentage distribution to the recipients shall stay the same, despite a sale price RESET to a value greater than 93 Trillion Earthlings / \$, by the independent valuation of Indian Government, to be presented by the respondent. A notarized and attested true copy of Living Will Executed on 22-8-2022 is attached as annexure F with the Writ Petition. I draw the attention of the Honorable court to the expiry date of this Living Will, which is 31-12-2034, by which date I intend to distribute the wealth of at least 93 Trillion Earthlings / \$ to all the end recipients as intended in the Living Will.

Most of the 62 sale agreements will be executed with payment plan spanning from the year of agreement execution until year 2034, with only a few lesser valued sale agreements executed with a one-time single-payment plan. This annexure includes the 'Living Will Addendum for Year Ending 2022' executed on 29-12-2022, which indicates that the 'Wealth receipts' and 'Wealth distribution to the end recipient parties' did not start in year 2022. I shall be executing 12 more 'Living Will Addendums' at the end of each of the next 12 years, 2023 to 2034, showing the up to date numbers of 'Wealth receipts' and 'Wealth distribution to end recipient parties'. These Addendums will indicate the annual incremental statistics of the 'Wealth receipts' and 'Wealth distribution to end recipient parties'.

According to annexure F attached with Writ Petition, the wealth distribution of 93 Trillion wealth within India is shown in annexure G attached with the Writ Petition. This is for the Honorable court and most importantly the respondent to understand my commitment towards India. I have pledged 90% of this wealth for a visionary goal 'Goal year 2050 for India', to make India a developed country by year 2050. Respondent must clearly understand that entire India, all its citizens future, future of Hinduism religion, economic growth, progress and development of India is linked to this liability claim. By way of cascading effects of 'Goal year 2050 for India' this liability claim is also linked to at least 100 or more poor and developing countries of the world.

Living Will Addendum is not going to be a registered document. I will be publishing the addendums annually on my website, and sending formal communications to all the recipients, mentioned in annexure F and listed in annexure G attached with the Writ Petition, who will be stakeholders in achieving 'Goal year 2050 for India'. Respondent to give official formal communication addresses, key contacts information, e-mail ID'S, and direct telephone numbers of all the recipients, who would receive the wealth over the next 12 years, totaling to the final number displayed against the recipient in annexure G attached with the Writ Petition.

(Party in Person)

LIVING WILL ADDENDUM

OF MR. SRINIVAS S. DEVATHI; LIVING AT 63, 11<sup>TH</sup> B CROSS, 3<sup>RD</sup> MAIN  
PRASHANTH NAGAR, BANGALORE - 560079, INDIA

THIS ADDENDUM ACCOMPANIES THE LIVING WILL EXECUTED BY SRINIVAS S. DEVATHI ON 22-08-2022.

THE INTELLECTUAL PROPERTY ASSET DISCUSSED IN THE LIVING WILL, US 8,910,998 AND ITS VALUATION INCLUDES:

- The intellectual property rights defined by the claims, and 100-year downstream businesses that emerge off the claims in patent us 8,910,998, which is recognized worldwide by Patent Cooperation Treaty PCT international application PCT/US2014/046619, wherein the claims are supported by the text description and drawings, and
- The intellectual property rights defined by the claims, and 100-year downstream businesses that emerge off the claims in Patent Cooperation Treaty PCT international application PCT/IB2016/050993, wherein the claims are supported by the text description and drawings, and
- The intellectual property rights defined by the claims, and 100-year downstream businesses that emerge off the claims in Patent Cooperation Treaty PCT international application PCT/IB2016/050994, wherein the claims are supported by the text description and drawings, and
- The intellectual property rights defined by the claims, and 100-year downstream businesses that emerge off the claims in Patent Cooperation Treaty PCT international application PCT/IB2016/050995, wherein the claims are supported by the text description and drawings.

which respectively correspond to,

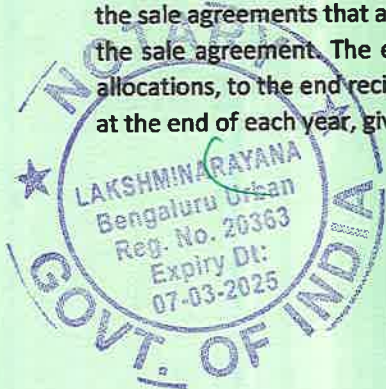

- Automotive sector, delivering repeatable vehicle color change technology to the vehicles in 62 world countries, and
- Interior decor segment, covering electrical appliances and electronic devises in 62 world countries, and
- Interior decor segment, covering walls, e.g., odd walls, furniture, decorative articles in 62 world countries. This also includes the exemplary 'Thermal insulation' application for homes and offices, delivering energy savings in 62 world countries, and
- Fashion accessory segment in 62 world countries. By economic potential this segment is the lowest in value compared to the above three.

FINAL CHOSEN SALE PRICE OF THE PATENT US 8,910,998 B1 WORLDWIDE IP RIGHTS:

93 Trillion Earthlings/\$. Waiting for Indian governments final opinion, on if the sale price would be reset to 220, 230, 240, or 250 Trillion Earthlings/\$.

62 SALE AGREEMENTS - PAYMENT PLANS - WEALTH RECEIPTS - WEALTH DISTRIBUTION:

Most of the 62 sale agreements will have yearly payment plan spanning 12 years built into them. Some of the sale agreements that are lesser in value would be executed with a one-time single payment built into the sale agreement. The entire wealth will be brought in, and distributed according to the Living will allocations, to the end recipient parties by December 31, 2034. A new addendum will be executed by me at the end of each year, giving the latest wealth receipts and wealth contribution details.

This is the Annexure... stated in the  
Affidavit of... SRINIVAS. S. DEVATHI

M. S. BALLAL  
Advocate & Notary (Govt. Of India)  
Reg. No. 2374, Bengaluru.

**IN THE HIGH COURT OF KARNATAKA, BENGALURU**  
**ORIGINAL JURISDICTION**

**W.P. No. 21782 /2022**

**MY PUBLIC ENEMIES ATTEMPTED TO USE THE ENTIRE 'OLD**  
**WORLD ORDER' PAID IN USD-\$ AGAINST ME. THEY USED EVERY**  
**POSSIBLE NEGATIVE TACTIC AGAINST ME, INDIA, AND THE**  
**RELIGION OF HINDUISM**

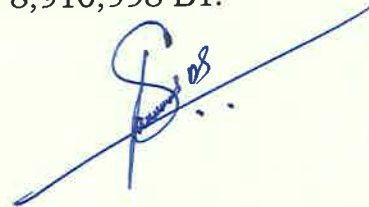

Who are my public enemies?

USPTO is my public enemy. They have declared it by way of 'Breach of Patent Cooperation Treaty articles 18(2) and 19(1) on 5-8-2015'. They have breached a treaty which is the most popular treaty across the world countries. PCT has 156 contracting states as of 7-4-2022.

USPTO relentlessly surrounded me and chased me across the world for 16 years, since my invention in quarter one of 2007. Why would they do this? The valuation of my invention, now their liability to me, shown in annexure J attached with this memorandum. The valuation and wealth created by my invention patent us 8,910,998 B1 is the central reason, the core motive for them to target me, by using all the negative tactics at their disposal. They exercised all their authority in 'old world order' to target me using their famed 'eagle eye'.

USPTO is a usa government agency which has political and corporate alliances within usa, thus making the following people in usa my public enemies. Democrats, Mr. Joe Biden, Mr. Bill Clinton, Mrs. Hillary Clinton, Mrs. Chelsea Clinton, Mr. Barack Obama, Mrs. Michelle Obama, Mr. Al Gore. Republicans Mr. Donald Trump, Mrs. Ivanka Trump, Mr. George Bush Jr., Mrs. Laura Bush, Mrs. Jenna Bush, and Mrs. Barbara Bush.

USPTO usa corporate alliances include Johnson and Johnson Pharmaceuticals USA, Janssen Pharmaceuticals USA, HSBC Bank USA, Capgemini USA, which includes alliances with the following executives and employees of these corporations Mr. Randy McDaniels, Mr. Mike Comprelli, Mr. Bill Schreiner, Mr. Roy Stansbury, Mr. Ken Harvey, Mrs. Chrys Anetz and Mrs. Heidi Pote. They exercised their alliance with Exxon-Mobil USA, and Tesla USA to create two opposite polarities, create a fake 'Fire scam', a non-existent battle between 'oil and renewable' and put Me, India, and Hindus living in India into this battle in an attempt to steal the wealth created by my invention patent us 8,910,998 B1.

My public enemies used 'order takers' and slaves for bribing select groups in India.

Since my invention in Q1-2007, USPTO, along with all the alliances mentioned above, used some employees in the listed corporations, some other psycho people, who are nri-abcd, non resident indian - american born confused desis, who try to act, and fake that they have commonality, or cultural similarities, and understand Indian culture, and life style; while in truth they are totally confused and lost people who do not fit in usa and in India. They are nothing like real Indian citizens living in India. These nri-abcd, and select ones among them were used for distributing suitcases filled with usd-\$ into India since 2008 and after, to work against me, my invention patent us 8,910,998 B1, recognized worldwide by PCT international application PCT/US2014/046619, and the wealth I would bring from across the world countries into India. These people are anti-India, and want the death and destruction of India. They want to use Hindus living in India, as murder subjects, for organ harvesting, and organ-trade, with this new psycho objective of usa, to get second life by heart harvesting and transplant.

My public enemy foreign alliances.

Given USPTO and usa relations with uk, the following people in uk are also my public enemies. Mr. Tony Blair, Mrs. Teresa May, and the royal family in Buckingham palace. Mutatis mutandis with nri of uk used against me, India, and Hindus living in India.

My public enemy, usa pays for the old world order 'un - united nations' in usd-\$, and used that entire organization against me or to block my work.

USPTO, usa and uk, control the fully paid in usd-\$ 'old world order' puppet 'un', its outdated six organs, and puppet organizations, which have worked for the selfish motives of usa and uk alone, have attempted to file random 'fabricated documents against me and my work' at some of these puppet organs and organizations, given the valuation of my invention patent us 8,910,998 B1. Their ally secretary general is Mr. Antonio Gutteras, must answer for the actions of puppet un, its puppet organs, and puppet organizations.

Old world order, puppet un, its organs, and its organizations are defunct and useless to the world countries, in the context of year 2023. I have defined the New World Order, detailed in Annexure N, and annexure R, and the new governance will take over the world governance in near future.

However, given that we are in transition from old world order, to NEW WORLD ORDER, I want the Honorable Court and the respondent to proactively verify and neutralize any negative tactics working against me, India, and Hindus living in India.

For the objective of executing sale agreements described in annexure L.

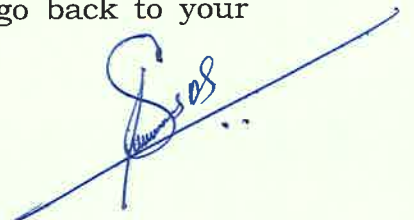

In the interest of me, India, and Hindus living in India, I intend to execute sale agreements listed in annexure K, described in detail in annexure L which involves 62 world countries, and hence we must proactively neutralize any negative tactics used by my public enemies and their allies. To neutralize the negative tactics, we must first identify their negative tactics. Then take counter measure to neutralize them. The identification of their negative tactics against me and my invention patent us 8,910,998 B1 involves:

- Identifying if my public enemies, their alliances, including the order takers have attempted filing any frivolous documentation, fabricated documents, to negatively frame me to block the wealth from my invention from coming to me, in any of the courts in India, with Indian judiciary.
- Identifying if my public enemies, their alliances, have used the puppet old world order un, its puppet organs, or its puppet organizations for filing any frivolous documentation, fabricated documents, to negatively frame me to block the wealth from my invention from coming to me.

I request the respondent through their network to identify if there have been such negative tactics attempted by my public enemies. The Indian courts for verification and validation must include Supreme court of India, all High courts of India, Bangalore city civil court, and Family court of Bangalore. For verification and validation, the puppet un defunct and useless organs include united nations secretariat, united nations security council, united nations international court of justice, united nations trusteeship council, united nations general assembly, and united nations economic and social council. For verification and validation, the list of defunct and useless un organizations that are fake and paid for in usd-\$, are listed on the 'un' website webpage for its programs and organizations.

Our action to their negative tactics, so as to proactively neutralize them and execute the 62 sale agreements. Give them 'Confront or withdraw' option.

If they have filed frivolous documents, fabricated documents in Indian courts, they must be given a 'Confront Srinivas S. Devathi directly with your allegations in this Honorable High court of Karnataka, in his presence, in front of the Honorable judge' OR 'withdraw your allegations and go back to your country' to choose from. If they have filed fabricated documents, to negatively frame me at one of the puppet un organs or puppet un organizations, Mr. Antonio Gutteras must be given the option 'Confront Srinivas S. Devathi directly with your allegations in this Honorable High court of Karnataka, in his presence, in front of the Honorable judge' OR 'withdraw your allegations and go back to your country.

The above actions by me, the Honorable court, and respondent will ensure we proactively neutralize any negative tactics used by my public enemies and all their alliances within usa, in uk, their order takers, including puppet un, and clear the stage for the execution of 62 sale agreements described in annexure L.

Other negative tactics attempted by my public enemies and their alliances.

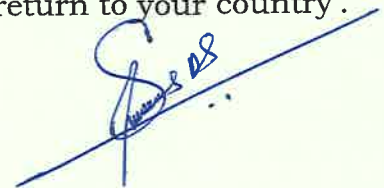

- Met all the people, everyone I have known or interacted with from my birth until now; exercised authority on them, abused their ignorance in subjects of intellectual property, bribed them, offered a job or business deal, and attempted to make them tell lies, and fabricated negative stories about me, in an attempt to frame me negatively. This could potentially include any of my acquaintances from school, college days, my family members, or relatives.
- Kol is 'Key opinion leader', a paid group of usa pharmaceutical industry that define what constitutes a disease. My public enemies, and within that johnson and johnson pharmaceuticals usa, and janssen pharmaceuticals usa, have bribed this usa kol team and had them define new frivolous random nonsense diseases, in an attempt to frame me negatively. To this effect, they have drugged me several times, had people act and do drama around me to frame me negatively.
- Given the old-world order monopoly of usd-\$, they attempted to use bribes in exorbitant amounts of 500 Billion, 2 Trillion, 3 Trillion, 5 Trillion, 10 Trillion in usd-\$ to people or organizations in India, to steal the value of 93 Trillion Earthlings / \$ from me and India. This attempt has failed, since it is bribe money and cannot become legitimate wealth of India. Will not be recognized by GEC, Global Earthling Council.
- They attempted to forge illegitimate alliance between usa and India, at a value less than the sale price valuation of 'Srinivas - Kathi agreement' valued at 22.5 Trillion usd-\$. This attempt has failed as India cannot cheat 154 PCT contracting states by forging illegal alliance with usa.

My response to these negative tactics.

Motive to frame me is the wealth created, and the valuation of my invention patent us 8,910,998 B1 at a conservative 93 Trillion Earthlings / \$. With this clearly defined motive, and my excellent academic record credentials, I rubbish and dismiss all such negative tactics attempted to frame me negatively. For the record of the Honorable court and respondent, I am attaching my 10th, 12th, Engineering marks cards, and Degree certificate, which directly rubbishes and neutralizes the negative tactics of my public enemies. I challenge their allegations, and subject them for strict proof, and give them the option of 'Confront me in this Honorable court or withdraw and return to your country'.

This is the Annexure... P ... stated in the  
 Affidavit of... *SRINIVAS - S - DEVATHI* ...

M. S. BALLAL  
 Advocate & Notary (Govt. Of India)  
 Reg. No. 2374, Bengaluru.

**IN THE HIGH COURT OF KARNATAKA, BENGALURU**  
**ORIGINAL JURISDICTION**  
**W.P. No. 21782 /2022**

To initiate the fraud elimination and liability claim suit against USPTO in the Trial court, Bangalore city civil court, the court fees computation, is given in this annexure.

**FOR THE SUIT TO BE FILED, IN THE COURT OF THE CITY CIVIL  
JUDGE AT BENGALURU**

**BETWEEN: Srinivas S. Devathi, Plaintiff,**

**AND: United States Patent & Trademark Office (USPTO), Hulsey P.C.,  
World Intellectual Property Organization (WIPO), and Intellectual Property  
India, Defendants, here is the trial court 'fee calculation'.**

**COURT FEE CALCULATION**

The Bangalore city civil court fee calculation for 93 Trillion \$ liability claim, the conservative number.

**COURT FEE RULE**

The court fee applicable is INR 2,47,125 for the first INR 80,00,000 liability claim. For the claim above INR 80 lakhs, a court fee of 0.5% is applicable.

**COURT FEE PAYMENT STEPS**

Uspto to pay the court fee to me, plaintiff, Inventor, Srinivas S. Devathi, by way of electronic funds transfer, an international wire transfer directly from source uspto bank account in usa, to my bank account in India, according to the exchange rate on that date. The court fee transfer initiated at the source will be in usd-\$, payment received in my destination Indian bank account will be in INR. The fee calculations shown in this document in usd-\$ and INR, are technically one and the same. Up on receipt of the court fee from the liable party, uspto, I shall pay the court fee in two payments. 50% upon receipt of the court fee from uspto. The final 50% upon the completion of the execution of all the 62 sale agreements described in annexure L, through the Honorable court. I look forward to the Honorable courts orders to set up such a payment agreement with the Court administration office. Uspto to pay for all applicable bank fees on both ends.

**CALCULATION IN usd-\$**

Since USPTO will pay for the full liability in \$, the court fees explained in \$ (USD).

For computations, I have used the conversion rate of 1 \$ = 72.65 Rs.

The court fee rule in \$:

The court fee applicable is \$ 3,402 for the first \$ 110,117 liability claim. For the claim above \$ 110,117, a court fee of 0.5% is applicable.

**Calculation of court fees in \$ for full liability claim of \$ 93,000,000,000,000:**

For the first \$ 110,117, the applicable court fee is \$ 3,402.

For the balance \$ 92,999,999,889,883, the applicable court fee at 0.5% is \$ 464,999,999,449

**Total court fee for \$ 93,000,000,000,000 liability claim is \$ 465,000,002,851.**

**CALCULATION IN INR**

**Calculation of court fee in INR for full liability claim of INR 67,5645,000,0000,000**

**(INR 67.5645 crore crores):**

For the first INR 80,00,000, the applicable court fee is INR 2,47,125.

For the balance INR 67,5644,999,2000,000, the applicable court fee at 0.5% is INR 33,78,224,9960,000

**Total court fee for INR 67,5645,000,0000,000 liability claim is INR 33,78,225,0207,125. More than INR 33.78 lakh crores.**

Bangalore

Date: 19/1/2023

**Srinivas S. Devathi**  
(Petitioner / Party in Person)

**IN THE HIGH COURT OF KARNATAKA, BENGALURU  
ORIGINAL JURISDICTION**

**W.P. No. 21782 /2022**

**MY BANK ACCOUNTS TO BE OPENED IN INDIA, FOR THE WEALTH  
RECEIPTS FROM 'SRINIVAS - KATHI AGREEMENT'**

In annexure L attached with this memorandum, I describe details of 'Srinivas - Kathi agreement' in section 2(a). To receive the proceeds from this agreement, a special bank account must be set-up to hold wealth in usd-\$ currency for a temporary period of time until the wealth in usd-\$ are exchanged into Earthlings currency by GEC, Global Earthling Council. The wealth of 22.5 Trillion (at the conservative total sale price of 93 Trillion) will be held across three accounts with the following distribution:

a. HDFC bank account 1: Holding wealth in INR: Direct wire transfer of 250 Billion usd-\$ from source USPTO account into this account. Wire transfer wealth converted to INR according to the exchange rate on the day of wire transfer.

The source bank and destination bank fees, all bank charges, all expenses on both sides must be borne by USPTO.

b. HDFC bank account 2: Holding wealth in INR: Direct wire transfer of 250 Billion usd-\$ from source USPTO account into this account. Wire transfer wealth converted to INR according to the exchange rate on the day of wire transfer.

The source bank and destination bank fees, all bank charges, all expenses on both sides must be borne by USPTO.

c. HDFC bank special account 3: Holding wealth in usd-\$: This needs the approval of Finance Ministry, only upon which HDFC bank will create an account to hold 22 Trillion usd-\$ wealth in usd-\$ currency. There is a Billion \$ bill used by usa for their treasury holdings. 22,000 Billion \$ bills must be physically shipped to the destination HDFC bank branch by USPTO, in a special military aircraft.

The source bank and destination bank fees, all bank charges, all expenses on both sides must be borne by USPTO. For this money transfer and deposit, the physical transportation expenses to be borne by USPTO.

d. HDFC bank account 4: Holding wealth in INR: Direct wire transfer of the court fee from source USPTO account into this account. The net amount of court fee must be received in this account, excluding all the bank fees, charges applicable for this transfer on both sides.

e. I look forward to setting up a 'Court fee agreement with Bangalore city civil court administrative office', to pay 50% court fee upon receipt of fee from USPTO, and the balance 50% will be paid upon the conclusion of execution of 62 sale agreements described in annexure L.

f. A 'Special court' must be set-up for the execution of 61 non-usa sale agreements, described in sections 2(b) to 2(jjj) of annexure L. I request the Honorable court to allow the 'Special court' to be set-up in the High court of Karnataka premises, while the court fee agreement will be established with Bangalore city civil court. Or recommend an alternative approach. The 'Special court' to have an adjacent 'Media interaction room' and an adjacent 'Meeting room'.

g. The remaining wealth from 61 sale agreements, coming in Earthlings currency will be given a different wealth distribution plan across bank accounts by me. I will be setting up a group of my own banks in India, with a few of them enabled to hold extremely high value of Earthlings currency. GEC to make bulk payments in denominations of Billion and Million Earthlings bills. I shall give the details of wealth distribution across bank accounts to GEC designated signatories.

**ORIGINAL JURISDICTION**

**W.P. No. 21782 /2022**

**I HAVE AUTHORED 'RIGHT PERSPECTIVES FOR THE WORLD' WITH  
79 PERSPECTIVES PUBLISHED ONLINE, TO TRANSITION THE  
ROUGE OLD WORLD ORDER TO NEW WORLD ORDER. COPYRIGHT  
APPLICATION FILED WITH INDIAN COPYRIGHT OFFICE.**

I have filed a copyright application for my authored literary work 'Right perspectives for the world', with the Indian copyright office, on date 12-12-2022, which was given a diary number 25790/2022-CO/L.

The 79 right perspectives for the world are attached with this annexure, and are accessible online at the following website webpages.

Webpage 1 - <https://srinivasdevathi.com/right-perspectives-for-the-world/>

Webpage 2 - <https://srinivasdevathi.com/right-perspectives-for-the-world-continuation/>

I request the Honorable court and the respondent to read the following perspectives related to 'NEW WORLD ORDER', Point of view, POV 2-3, POV 2-16, POV 2-19, POV 2-23, POV 2-24, POV 2-27, POV 2-32, POV 2-40, POV 2-44, POV 2-45, POV 2-46, POV 2-47, POV 8, POV 15, POV 30, World events since year 2007, POV 26, questionnaires for 191 world countries, POV 16, POV 22, and POV 28.

In the 'New World Order', I have defined councils that will be responsible, accountable, genuine, and deliver right governance to the world countries. These councils include the transformative, Group Influential 50, GI-50 council, Group 193, G-193 council, Judicial council, Medical council, and Records council. The financial and economic control center of the world 'GEC, Global Earthling Council' will pay for the operations of all these councils for decades to come in world neutral currency 'Earthlings'. Subject that would be of great interest to this Honorable court, Indian judiciary, World judiciary, and the Respondent are Judicial council, World court at Judicial Council, Legal procedure at the World court, and International law at World court. 191 world countries, their citizens, governments, and businesses want to get justice for all injustices they have faced in the old world order, and are eagerly waiting for World court operations to start.

RIGHT PERSPECTIVES FOR THE WORLD  
SRINIVAS S. DEVATHI

Author:

Srinivas S. Devathi  
63, 11<sup>th</sup> B Cross, 3<sup>rd</sup> Main,  
Prashanthnagar, Bangalore – 560079, INDIA

Title: RIGHT PERSPECTIVES FOR THE WORLD.

Enable termination of rouge old world order.

Enable the taking live and establishment of NEW WORLD ORDER.

Problem Definition: The inequal world, with economic inequality, business inequality, trade inequality, dripping with racism, hatred, and jealousy, along with forced slavery in different forms imposed by rouge old world order usa, uk, and puppet un, on 191 world countries.

The perspectives, POV - point of views, authored to clearly explain and define the wrongdoings, negative ideologies, sabotaging ideas, destroying agendas, imposing all forms of slavery, forcing human trafficking for labor slavery, and sex slavery, along with devious diabolical objectives of killing people from across the world to harvest their organs and hearts to get a second life, of the old world order.

The perspectives, POV - point of views, authored to clearly explain and define the NEW WORLD ORDER which will deliver real freedom, true independence, to all the world countries, all the world citizens, brings about economic equality, business equality, trade equality, ends all forms of slavery, defines international law, medical law, and COUNCILS which genuinely work for the established ideologies.

These perspectives, will enable the transition from old world order into the NEW WORLD ORDER, thus liberating the world countries and world citizens from the strangle hold slavery of old world order.

## SRINIVAS S. DEVATHI

INVENTOR & AUTHOR

### Right perspectives for the World

In this page, I bring my direction on some of the globally relevant subjects that the world countries are already discussing, or will be discussing in the near future.

*Srinivas S. Devathi, Inventor and Author*

A handwritten signature in blue ink, appearing to read 'Srinivas S. Devathi', written over a long, thin diagonal line.

In the recent months here are some discussions and perspectives I have shared with the worldwide media houses:

#### **POV 1:**

#### **Segment: Fire Scam**

**The approach that must be taken by world countries to take the 'battle between oil and electric-renewable forward'. Here is my view, and direction on the subject.**

#### **How should the 193 world countries approach this oil against electric battle?**

I recommend that the the question 'Should there be more investments made in creating and identifying new renewable energy sources?' be brought to the decisive voting in a NO or YES decisive voting options given to all 193 countries when my macro-governance reform of United Nations Global Governance Model 2020(c) goes live in the GI-50 and G-193 model. This reform is expected to go live very soon, after my authored macroeconomic reform Project Earthling(c) goes live.

Such a voting option must be presented to all 193 countries with say a gap of 10 years between polls if the previous poll outcome resulted in a majority 'NO'. The poll on the subject must be considered ended when a majority vote of 'Yes' is reached by all 193 countries, when GI-50 will formally write to all the countries that have facili-

ties, infrastructure, talent, skill, ability, and/or are ready to make such investments to work in this area. This constitutes a 'Formal request' from the 193 world countries.

### **How to prepare for such a 'Decisive voting'?**

**All 193 countries must work on the details of the following case study:**

What is the near term, mid term, and long term economic impact, and quantified financial impact, jobs impact, and GDP impact to my country IF all cars, automobiles, or vehicles, that are driven in my country are 100 out of 100 electric vehicles?

This case study will help your determine when you are ready to vote YES for the decisive question posed to you.

**I encourage all 193 countries to also attempt to additionally work on the case study:**

What is the near term, mid term, and long term global economic impact, and quantified financial impact, jobs impact, and GDP impact to the world IF all cars, automobiles, or vehicles, that are driven in the world are 100 out of 100 electric vehicles?

### **Two categories of countries that have significant economic impact with electric vehicles taking over the market.**

**Automotive manufacturing countries** - There are an estimated 40 to 45 countries in the world that manufacture over 99% of vehicles / automobiles manufactured in the world. These countries with global brand OEM'S source the estimated 2,500 to 3,000 components that they assemble into vehicles that run on the current day combustion engines. This supply chain network yearly production output and the yearly OEM production output drives their countries economy and GDP numbers. They will want to slow the transition of market share into electric vehicles.

**OPEC countries** - While there are 14 member countries in OPEC, there are an estimated 30 to 40 countries in the world that have significant oil reserves and export oil to other countries of the world. The oil trade and sale of these countries drives their countries economy and GDP numbers. They will want to slow the transition of market share into electric vehicles.

These two categories of countries and other countries which are also integrated into the supply chain of oil trade, oil by-products, and integrated into the supply chain of OEM / vehicle manufacturing also have indirect economic and GDP impact.

In summary working on the given case studies will prepare the country for the decisive voting at the G-193 assembly in my authored macro-governance reform model.

### **Estimated statistical variance that must be expected by countries:**

While most of the countries in the world might have negative variance of their GDP by say an estimated 5% to 10%, the countries in the above mentioned two categories will have negative variance of their GDP anywhere in the range of 20% to 50%.

The world economy will also take a negative variance by world GDP correcting by a estimated 30% to 40%. The counter boost to economy will come from the various different renewable sources that may drive these vehicles, main one in focus being battery operated vehicles that are electrically charged.

**Example country:**

An example I can give is usa that has significant automotive manufacturing within their country. Given their oil reserves, and oil import bill since they are one of the largest consumers of oil in the world, if usa manufactured vehicles in a financial year are all 100% electric, say Tesla, usa GDP will shrink by an estimated 50%. This means 50% of their GDP will be knocked off if they go 100% electric vehicles. So, the world must expect that they would vote a decisive NO in the very first poll conducted on this subject.

The answer will be a decisive NO by UK, Saudi, and Uae in the very first poll, taking these countries as few other examples.

## POV 2:

### **Segment: United Nations Global Governance Model 2020(c), Sub-segment: Judicial Council**

**The REAL justice for 192 world countries shall become available when my authored macro-governance reform 'United Nations Global Governance Model 2020(c)' is taken live.**

#### **ICJ to be replaced by a new 'Judicial Council'.**

Today's ICJ would be replaced in the reformed governance structure in which a 'Judicial council' will be formed which will be lead by 193 judges, one from each country; with the divisions leadership set on a rotation model. Where the country cannot nominate their own country judge to the council, they might call upon their GI-50 local ally to nominate a judge from their country on their behalf. The council will take in lawsuits that are country VS country, and also allow select other lawsuits that are not necessarily country VS country. I shall define the full span, judicial ability, and control of this organization when I get to that stage of detailed organization structure definition. This council will be able to take in all the 'Import bill fraud committed by usa lawsuits by intentionally manipulating and strengthening their currency against all the world currencies over the last 240 years'. They will be 192 suits. The council will also have the capacity to handle a few thousand lawsuits. The council will see volume of lawsuits in the next couple decades, however in the long term given the international law enforced by the new governance model across the world, the volume of lawsuits are expected to taper off and reduce significantly. The council staff numbers might be adjusted, however under all circumstances the council will have 193 sitting judges, one from each country as explained above ready to deliver justice.

In the next two decades, usa must expect lawsuits against them from the other 192 countries of the world. The first of which is the 'Import bill fraud lawsuit' as mentioned above. Some examples of the other lawsuits the 192 non-usa countries might consider filing against usa are:

- Crimes against humanity lawsuits. For war crimes, or death inflicted. The liability claims will be made in Earthlings.
- Privacy invasion lawsuits. For breach of private space, or personal life. This might further result in manipulation of the persons life. Claims for damages or liability will be made in Earthlings.
- For many ways usa has targeted their country, racially, using divide and destroy strategy, supplying arms to kill each other by created internal conflicts, carrot dangling to create internal conflicts to kill each other, illegal trade forced on the country, or imposed slavery on the country. Claims will be made in Earthlings.
- Human rights violation, forced medical malpractice, using humans for organ harvesting, or illegal clinical trials. Claims will be made in Earthlings.

The 192 non-usa countries might consider claims spanning the last 240 years which represent the usd-\$ monopoly years. However, substantiating their claims with full evidence and proof to the Judicial council might

-192-

make these countries concentrate on last 100 to 150 years depending on the availability of documented evidence and data.

**I request the 192 non-usa countries to consider the following facts:**

**The countries could approach the Judicial council in this new world order, seeking justice and/or monetary compensation. The lawsuit could have a non-monetary relief claim and / or a monetary claim which could be liability claim or damages claim in Earthlings currency. The lawsuits will be presided by judges from neutral countries.**

**You must also clearly understand the fact that the current day ICJ controlled by usa and indirectly paid by usa, can never deliver real justice to 192 non-usa countries. History itself is a fact set that confirms this. Hence ICJ must be replaced by my proposed Judicial council in new world order.**

**I have numerous case studies wherein countries across the world would like to exercise a REAL legal option against usa. Judicial council will provide this option to the world countries.**

**All monetary liability or damage claim payments will be given in Earthlings currency which will be your national treasury currency.**

You can read about the macro-governance reform at my website webpage: <https://srinivasdevathi.com/global-governance-model-2020/>.

**POV 3:**

**Segment: Project Earthling(c)**

**ECONOMIC VARIATIONS AND CORRECTIONS IN 62 COUNTRIES.**

You are familiar with the 62 sale agreements, one each with the 62 countries where I have enforceable intellectual property rights to my invention patent US 8,910,998 according to law and Patent Cooperation Treaty.

These 62 countries could be segregated into two categories by their current economic situation / status. Most of these countries fall into the developing countries, emerging economies, economically backward countries, or poor countries. Very few of these countries are developed countries.

**UPCOMING ECONOMIC VARIATIONS AND CORRECTIONS IN THESE 62 COUNTRIES, WHEN COMBINED WITH MY AUTHROED MACRO-REFORMS WILL RESULT IN A STABILIZED WORLD.**

**Economic growth of the countries off the 62 countries that fall into developing countries, emerging economies, economically backward countries, or poor countries:**

These countries over the years, and decades to come will see increase in their economic activity, will see progress, development, and GDP growth. The economic growth translates to inflation of consumables sale price, given the increase in consumer purchasing power. This results in depreciation of their local domestic cur-

rency against EARTHLINGS, all of which will result in a much larger pool of wealth created out of adopting my invention within their country. This will be triggered by embracing my invention, its related economic activity in their countries, and further by embracing economic reforms I drive in India.

**Economic corrections of the countries that fall into developed countries category:**

These countries are only a few out of the 62 countries. These countries will see economic correction, with no significant change to their GDP numbers. These countries will observe deflation of their consumable sale prices, due to deflated purchasing power. This results in their currency holding its value or further strengthening against EARTHLINGS. The appreciation of the wealth pool over the years by adopting my invention will be a low gradient curve. This economic correction is much required. This will be triggered by embracing my invention and the taking my authored macro-reforms live.

**COMPETENT AUTHORITIES DOING INDEPENDENT VALUATION OF MY INVENTION AND ITS WORLDWIDE IP RIGHTS SALE PRICE:**

The Economic factors explained above must be taken into consideration by the 'Competent authorities' while computing the final sale price to my invention independently. The gradient curve of the wealth created in each country will be different depending on multiple factors spanning decades. Further the gradient curve projection of one country by one competent authority might be different from what another competent authority might project. Given the higher number of developing countries, the estimations could span the ranges given in the table. I look forward to inputs from competent authorities.

The impact of my invention patent US 8,910,998, its adoption by the other 131 countries, when combined with the effects of my authored macro-reforms going live will result in economic corrections that have been long due and will result in a stable world for decades and centuries to come.

Access my authored macro-reforms at the following links. The macro-economic reform could be accessed at <https://srinivasdevathi.com/project-earthling/>. The macro-governance reform could be accessed at <https://srinivasdevathi.com/un-global-governance-model-2020/>.

**While we prepare for the 'MOST TRANSFORMATIVE YEARS ON PLANET EARTH', there is one thing 192 world countries must be cautious about:**

USA might use suitcases filled with usd, an old outdated tactic now, to counter the inevitable. I request the 192 world countries to have full trust in LAW, local law, and international law. Patent Cooperation Treaty, which is signed by 153 world countries is a legal agreement, a legal document which binds 153 countries together, and is also a legal document that is enforceable in the courts of all 153 countries. Such a legal binding of 153 countries almost constitutes international law. Enforceable law and Judiciary will finally prevail. Do not succumb to any old tactics used by usa.

Secondly, any decisive voting or poll conducted by international summits such as WIPO summit, on any subject must be considered final, and will have a decisive outcome on any subject or macro-reform that has global implication, and is put up for such a poll. In the old world order usa fancied their authority to lobby or manipulate the outcome of decisive polls. Today, all the 192 countries are independent, stand on their own feet, and will choose their own independent thinking and evaluation in any decisive poll they are asked to participate in.

The decentralization of the world, and independent stance of all 193 countries, with their own independent thinking, evaluation of any macro-reform, or subject with global relevance, will result in unbiased independent voting result. The old world order usa tactics will not work.

USA might attempt to incite agitations, use divisive tactics, all by usd bribes. All will fail, and in the end Judiciary, law, and independent voting of 193 countries will result in the world moving in the correct / right direction.

**POV 4:**

**Segment: Old world order, Sub-segment: Old world order horror**

**No American citizen, corporation, or politician can attempt to create a fraudulent alliance with any of their Indian counterparts, given my Indian citizenship, to cheat the other 151 PCT contracting states.**

A negative tactic used by USA is 'SHORTING THE 93 TRILLION DEAL. OR SHUNTING THE DEAL BY BRIDGING A FRAUDULENT ALLIANCE BETWEEN USA AND INDIA'. It has failed. Here is the POV.

Before you read about the negative tactic, try to answer the following questions.

Should India breach Patent Cooperation Treaty?

Should India cheat 151 world countries that are PCT contracting states, by committing a worldwide fraud?

Should India cheat 60 non-USA countries where I have enforceable IP rights to my invention patent US 8,910,998 recognized worldwide by PCT international application PCT/US2014/046619?

Should India commit worldwide fraud and cheat 191 world countries?

Should India go into a fraudulent alliance with a rouge nation USA, and cheat the rest of the PCT contracting countries and rest of the world countries?

**MY ANSWER TO ALL THE ABOVE QUESTIONS IS NO. If your answer is also NO, you will capture this negative tactic with full clarity.**

USA corporations, combined USA, the bribed fraudulent anti-India terrorists NRI-ABCD of USA and where applicable any alliances with UK for additional lobbying into the fraud; they have attempted to form various alliances with some people in India; in an attempt to 'construct a fraudulent alliance between usa-India' by promising some insignificant share of the wealth to India, and eating or taking the rest of the wealth for themselves / their own country. Basically use the historic domination and money power out of USD monopoly on India and force them into submission into a forced alliance to commit worldwide fraud or breach of PCT; that has been signed by 153 countries. I am confident that India has come to its senses and never took up such offers or joined such an alliance. This would constitute to:

- Cheating 151 other countries that are part of the same Treaty.
- Destroying India and its image on world stage.
- Fraudulent alliance with a rouge nation, and committing 'Breach of PCT the Treaty'.
- Committing and being part of international fraud or conspiracy.
- Breaking the trust of world countries, and committing fraud against the world. Fraud against 191 world countries.
- Go against WIPO, an organization that has all 193 country members.
- Destroy and break everything India has ever stood by. Destroy what Indian freedom fighters have ever stood by.

**SUMMARY - India must never go into any kind of fraudulent alliance with USA which plain simply amounts to committing worldwide fraud, international conspiracy, breach of patent cooperation treaty signed by 153 countries, and cheating the rest of the world countries.**

**HOW DID USA TRY TO BRIDGE OR CONSTRUCT A FRAUDULENT PARTNERSHIP WITH INDIA TO CHEAT THE REST OF THE WORLD, after breaching the patent cooperation Treaty?**

They attempted to cut fraudulent deals which are below 22.5 Trillion Earthlings / \$, which is below the value of Srinivas - Hirshfeld agreement; and somehow get India to succumb under pressure and take a smaller offer for India. This is shorting a deal negative strategy. This is also called as shunting a deal. In such a global worldwide conspiracy attempt, they have attempted to give various bribe offers, rolled out in suitcases filled with USD-\$ into India.

India must understand, that such accepted illegal USD-\$ bribes will never be exchanged for accounted money anywhere in the world, and cannot become legal INR - Indian rupee currency. If India wants such wealth (numbers listed below) in Indian currency - INR, we can print the Indian currency ourselves. WE NEED NOT ATTEMPT TO TAKE BRIBE OR ATTEMPT TO SELL ANYTHING. ESPECIALLY INTELLECTUAL PROPERTY THAT BELONGS TO ME. The shorting deals offered by USA below 22.5 Trillion in an attempt to stop me from executing the 62 sale agreements with 62 world countries, include:

- 500 Billion \$ offer for a fake fire scam in currency or in the form of 'Gold reserve'; while stealing at least 93 Trillion or more from me and India.

- 2 Trillion \$, 5 Trillion \$, 7 Trillion \$, 10 Trillion \$, 17 Trillion \$, 18 Trillion \$, 19 Trillion \$, 21 Trillion \$ offers; to steal at least 93 Trillion or more from me and India, or to distract me and India from the main invention of patent US 8910998.

**I WOULD NOT ACCEPT ANY SUCH LOWER OFFERS OR DEALS. AND INDIA MUST NOT ACCEPT ANY SUCH OFFERS.**

**I WILL STRAIGHT AWAY EXECUTE THE SRINIVAS-HIRSHFELD agreement as the first agreement in court, followed by 61 other agreements. This is the ideal course of action for me, and India who will get 45% of the full wealth given my executed Living Will.**

**POV 5:**

**Segment: Patent-Intellectual Property**

**INDUSTRIAL APPLICABILITY V/S INDUSTRIAL ADOPTION**

The current day Patenting system is fairly matured as established by Patent Cooperation Treaty, and administered by World Intellectual Property Organization WIPO. In that a 'PATENT' is granted only upon the three criterion being met which include 'Novelty', 'Inventive step', and 'Industrial applicability'; when compared to all the prior art that exists which includes all prior worldwide publications and patents. So, an 'Invention', a 'PATENT', must be understood, that it is granted after a 'WORLDWIDE PRIOR ART SEARCH is done, which includes all prior publications and patents'.

The PCT application processing procedure, an International application filed under Patent Cooperation Treaty provisions, is very well defined and is available at WIPO.org website. Article 33 of Patent Cooperation Treaty states the following, about the three questions to grant a PATENT:

(2) For the purposes of the international preliminary examination, a claimed invention shall be considered novel if it is not anticipated by the prior art as defined in the Regulations.

(3) For the purposes of the international preliminary examination, a claimed invention shall be considered to involve an inventive step if, having regard to the prior art as defined in the Regulations, it is not, at the prescribed relevant date, obvious to a person skilled in the art.

(4) For the purposes of the international preliminary examination, a claimed invention shall be considered industrially applicable if, according to its nature, it can be made or used (in the technological sense) in any kind of industry. "Industry" shall be understood in its broadest sense, as in the Paris Convention for the Protection of Industrial Property.

According to this established criterion, patents are granted by PTO'S only when it is established that the invention described in the application checks out a 'YES' on Novelty, Inventive Step, and Industrial Applicability. Further, the current day 'Prior art' searches are done by using very powerful, and strong combination 'keyword' searches by both the IP law practitioners and the PTO'S themselves by which it is nearly impossible to miss any direct prior art. For example, my patent was cleared by my IP lawyer chosen at the time, and granted by the PTO after searching on combination of words like vehicle, car, color, and change.

### **My Patent US 8,910,998, and its Industry adoption:**

Many patents are granted by PTO'S across the world, which probably run into 1000'S of patents. However, many of them while being checked YES on 'Industrial applicability' were never adopted by the industry it was intended for. Inventors depending on the problem they have solved, and the size of the industry their invention applies to, and further upon the strength of their invention claims which is directly proportional to gaining royalty and creating wealth, have made moderate amount of wealth running into hundreds of 1000'S, or millions, in rare cases billions of wealth.

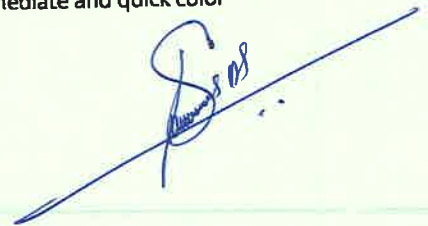

While Industrial applicability is a criterion checked even before a Patent grant, whether or not the Industry adopts the invention is purely a subject or 'Financial' benefits, which the invention drives to the industry. Financial benefits include profitability and cost savings, by adopting the invention within the industry.

There are numerous citations, granted patents that were never adopted by the industry. These include most of the prior art citations in my granted Patent US 8,910,998 in pages 1 and 2 of the Patent document. Most of these prior art are in 'References cited' column in pages 1 and 2 of my patent.

### **What constitutes the bulk of 'Prior art' as it relates to 'Repeatable vehicle color change technology', my invention and patent US 8,910,998:**

The answer is NO prior art existed for 'Repeatable vehicle color change technology'. What existed was the work done in that field with that purpose intended which primarily constituted laminates, adhesive stickers of different colors which were to be stuck on the vehicle exterior panels, individually thus delivering a color change of the vehicle. This is 'Not a repeatable color changing feature provided with one time system installation on the vehicle panels'. The colored laminates and adhesive sticker patents were marked as 'Industry applicable', they were not embraced and adopted by the automotive industry. Why?

The answer is that the solution provided / design did not integrate with the automotive industry manufacturing processes, and at the same time, it did not cater to the consumer requirement of immediate and quick color change of the vehicle. Thus the industry never embraced these prior art citations.

**If we get into the technical elements, the following questions arise, which made these prior art attempts difficult to implement:**

- Who were to manufacture these laminate or adhesive stickers? Private service provider companies, or the OEM'S themselves?
- If it is a private service provider company, what automotive brands and models are they delivering the laminates / adhesive stickers for? And for those branded car models, are the consumers satisfied with the quality of what they get after the said color change?
- The vehicle brand / model / variants are all of different designs and dimensions. Can a private service provider deliver laminates / adhesive stickers for each individual brand / model / variant?
- What is the turn around time to manufacture these laminates / adhesive stickers to be manufactured in the color of consumers choice, and get them delivered to the consumers home or local service provider?
- Most of the people have experience of buying mobile phones, the touchscreens of which are these days protected by anti-scratch protective laminate. When these are attached to the mobile touch screen, they end up with air bubbles and are rarely defect free in the service provided. Think of doing this for cars / vehicles by attaching such laminates / adhesive stickers to all the exterior panels? How many unplanned, unwanted air pockets and how many wrinkles, rips, and tears must be expected by the car owner when he receives the vehicle after service? Work out the man-days of effort involved in doing this.
- If you do not disassemble and assemble the vehicle panels, factor in the rips, and cuts at the edges of the laminates / adhesive stickers stuck to the vehicle.
- Most importantly, the consumer needs to plan this like a project. Order the laminates / adhesive stickers, factor in their delivery time to local service provider or his home, and then leave the car at the service provider for a minimum of two days to get the sloppy work done on the car and receive a bad product in the end, after paying the money for buying the laminates / adhesive stickers, and further paying for the services of getting them stuck on the vehicle exterior panels. The original car bought from the OEM, its finish is lost and you end up with a poor color change job done on your car.

The above factors, and technical steps clearly indicate so many challenges and questions unanswered because of which the technology never was adopted by the industry. Cars are expensive products and consumers pay a price for it, and any product, solution you give the industry must be of highest quality.

**All these challenges eliminated in my invention patent US 8,910,998, enabling INDUSTRY ADOPTION.**

All the above challenges are non-existent in my invention patent US 8,910,998, because there is no laminate to stick, or adhesive sticker to be pasted to the vehicle exterior surfaces. A two-layer polymer system, or a polymer-resin system with properties of at least partial flexibility, at least partial stretchability, at least partial elasticity, at least partial rubberiness will be directly attached to all the vehicle exterior panels by the automotive manufacturer / OEM themselves and the car will come in a single piece with the fluid tight space provided by the two-layer system allowing repeatable color changes in under 5-10 minutes.

The financial benefits to the automotive OEM include a straight cut in the capital cost investment of say 25% given the reduced land required when the 'paint shop' is eliminated, and the 1000'S of liters of chemicals, anti-corrosion / protective fluids, primer, and paint fluid. For high-end car manufacturing plants the capital cost reduction is higher going up to 33%. With the paint shop eliminated, and painting material procurement operational costs eliminated, the production cost is reduced by 10%, and given the most exciting 'Repeatable color change feature being provided to the consumer' the sale price could be marked up easily by say 30%, thus fi-

nally delivering spike in profitability of at least 40% or more to the OEM'S. The industry that is highly production cost sensitive, profitability sensitive, will welcome this invention and embrace it purely for the financial value driven by the invention.

So, while all the prior art was not adopted by the industry, my invention patent US 8,910,998 will be adopted by the automotive industry for the above mentioned technical, engineering, ease of color change reasons, multiplicity of color change reasons, personalization reasons, and the financial reasons.

The human safety factor by the elimination of the 'hazardous environment' in the paint shop into which the workers have to go in with fully protective gear, will also be welcomed by OEM'S from across the world. The hazardous environment is eliminated when the paint shop is eliminated.

The automotive dealers will have their inventory management fully simplified and will be able to deliver the car in the choice of color chosen by the consumer within 5-10 minutes before the delivery. As a consumer, your personalization choices and creative options are near infinite.

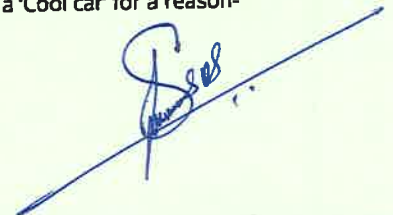

### **Here is a rundown of the benefits to all the stake holders involved with this industry:**

#### **OEM benefits:**

- OEM could potentially decommission the 'Paint shop' in their automobile plant within a few years. With a robust transition plan, the decommissioning of 'Paint shop' is not just possible at one plant, but all the manufacturing plants. Significant 'capital investment and cost reduction' would be realized.
- The quarterly / annual 'Operational costs' related to conventional painting could be fully eliminated. Reduced capital investment and reduced operational costs, would mean reduced 'Financing costs'.
- Hazardous environment (in the form of paint shop) is eliminated for OEM manufacturing plant employees.
- OEM's could manufacture, maintain inventory and transport vehicles only by model / variant and not by color.
- OEM's would realize inventory management cost and transportation cost savings.
- Most importantly, they can now deliver the car to consumer in the color of consumers choice without any delays or special orders.
- Per unit paint costs are reduced by at least 5%.
- Overall painting costs are reduced by 5-10%.
- A 'Cool car' could easily be priced 25-40% higher for the 'Repeatable color change feature' delivered to consumers. This could be a new variant in existing vehicle models or a brand-new model by itself.
- Finally, the most important of them all, OEM's will realize increased sales and profits.
- The auto parts / spares business would have additional stream of income in the form of vest, two-layer polymer system, manufacturing / replacement sales. Not just for current year vehicle models, but also for all the OEM past vehicle / car models. These vests, two-layer polymer systems would be directly sold to 'Regular car to Cool car' conversion businesses, via an e-sales channel.
- The benefits listed above for OEM's shall continue for many decades to come.

#### **Consumer benefits:**

- Can get a car in the color / shade of their choice, out of 1800 plus color / shade options available in the market today.
- No wait time, to get the car of their choice in the color / shade of their choice.
- Need not stay with the same color. Can change the color of the car for an affordable price repeatedly as and when they want.
- Can also opt for their current car (conventionally painted car) to be converted to a 'Cool car' for a reasonable price, as compared to replacing the car.

**Dealer benefits:**

- Reduced inventory management costs, as inventory management is by car model / variant and not by color.
- Lower dealership set-up costs, due to lesser parking space requirement.
- Increased profitability.
- Can deliver the car immediately in the color / shade choice of consumer.

There are other supplier side benefits and plenty of 'New business opportunities' for MSME segment. This results in business growth, job growth, and positive impact on economics. The invention patent US 8,910,998 will deliver economic growth opportunities to 62 chosen countries and indirectly to all world countries.

While 'PATENTS' are granted, the intended industry adoption alone will create wealth for the industry and thus the inventor in the form of royalty. I want to isolate the difference between all the other patents granted up until now, whether or not the respective industries adopted them or not, against my invention patent US 8,910,998. The benefits to the industry and the related stakeholders are way too many and thus I anticipate all the world automotive OEM brands will roll-out their first cars with the 'repeatable vehicle color change technology feature enabled' in near future. Watch out for upcoming motor shows.

You can read more about this invention, technology at my website webpages, <https://coolcartechnology.com/> and <https://coolcartechnology.com/technology.html>.

The tool on which I built this website has been retired thus freezing these webpages for some time now. I must rebuild these pages on a new tool, if I have to add new content or more details. However, the content, technical details in particular are accurate, relevant and up to date.

I request that you listen to the two audio files in webpage <https://coolcartechnology.com/index.html>, technology related audio file intended for Automotive Industry R&D division and Technology teams, and a second financial details audio file intended for Automotive Industry CEO's, CTO's and CFO's.

INDIA IS AT THE CUSP OF BECOMING THE INVENTIONS HUB OF THE WORLD FOR DECADES TO COME. Given this, the readers whether you are with judiciary, or media houses, or a college student, or working professional, understanding the patenting process, and difference between Industry applicability and Industry adoption, which is the difference between 'not creating much wealth from your inventive work and creating a lot of wealth from your inventive work' will help make wise investments, and when you must pursue patent protection as intended by PCT and offered to you by WIPO.

**POV 6:**

**Segment: Patent-Intellectual Property**

**Is 'Patent' a LEGAL document in itself?**

Yes, it is. A granted patent by any PTO is a 'Legal document' by itself enforceable in the court of law. The legal language in the patent begins with the words 'What is claimed is', with the words, phrases used in the claim text supported by the drawings, text in Field, Background, Summary, and Detailed description of the embodiments sections of the patent document. Legally, infringement suits are said to be fought on the 'Invention CLAIMS SENTENCES AND SUPPORTING SECTIONS' as explained. My invention claims in patent US 8,910,998 begin in 13th page of the pdf file, in column 14.

**POV 7:**

**Segment: Patent-Intellectual Property**

## **There are 1000'S of patents granted. How strong is a patent?**

Many patents are granted across the world by multiple PTO'S. They are all enforceable in the court of law. However, a PATENT is only as strong as its claims. By that it must be understood that the art of drafting claims is very relevant and is directly connected with the 'Strength of claims in the patent'. While claims could be drafted in multiple different ways, the claims are strongest when they do not allow the 'infringer' any room or a loophole that they could use, exploit, and fight in the court of law that they have not used the technology as claimed, thus not having to pay the royalty to the inventor.

In my patent US 8,910,998; I have documented a total of 23 invention claims, with 3 independent claims and 20 dependent claims. The three independent claims, legally the most valuable text in the patent are divided into one independent SYSTEM claim 1, and two independent METHOD claims 16, and 23. System claim 1 legally makes automotive OEM'S owe royalty to me when they adopt my inventive technology for their vehicles. This infringement is expected to happen at the automotive manufacturing plants across the world. METHOD claims 16 and 23 hold OEM'S, car dealerships, and service providers to fill the first and subsequent colors for the vehicle, providing the color change feature within 5-10 minutes to the consumer. METHOD claims legally make all the future vehicle color change service providers including colorium(R) color change stations, dealerships, and OEM production plants owe me royalty for using my invention.

The three independent claims 1, 16, and 23 in my patent are drafted in a way to cover / protect the breadth of the invention from infringers while taking any and all technological limitations into the dependent claims. The claims in patent US 8,910,998 have been drafted in a way for them to be legally very strong, and such that no automotive OEM or a color change service provide will be able to adopt, embrace, and exploit the inventive technology, without infringing the 'Patent claims'. The claims ensure that anyone adopting the invention cannot like NOT infringe the claims and thus owe me the royalty.

## **Is the PATENT US 8,910,998 sale price of 93 Trillion realistic?**

NO, the sale price of patent US 8,910,998, its worldwide intellectual property rights, along with 100-years worth downstream businesses it creates across the 62 chosen countries, which are the automotive manufacturing hubs of the world, is 93 Trillion Earthlings / \$ by a conservative estimate and NOT by a realistic estimate. For Earthlings visit my website [Projectearthling.com](http://Projectearthling.com). The strength of my patent claims, the way I have documented them, ensures that no one embracing the technology cannot like NOT infringe the claims. Thus, it is THE highest valued invention on planet EARTH.

### **POV 8:**

#### **Segment: Project Earthling(c), Sub-segment: Economics**

**Legal clarity between National wealth recorded by GEC, Country wealth, and Individual wealth. The clarity that will define the GEC wealth recording, managing, monitoring, and tracking protocol for decades to come.**

#### **History of intentional blurring of wealth across countries by monopolized USD-\$.**

The abuse of the monopoly of USD - \$ achieved by USA over the last 245 years has caused multi-fold damage to the world countries, their wealth, their economies, and independence. The intentionally planned, well thought out, well orchestrated, and continuous manipulation of world economy by USA, has allowed them to freely print their domestic currency and force the money in the way of bribes, unaccounted money on the other 192 countries thus depriving them off 'LEGAL / LEGITIMATE WEALTH'. Further this has allowed them to blur the lines, distinction between wealth of country and individual citizen wealth.

Such blurring of lines allowed them to lobby countries, lobby people to target other people, target other countries all to fulfil their selfish needs and further attempt to impose a 'never ending, no end in sight slavery' on 192 world countries and an estimated 9 billion citizens of these countries, for a prolonged period of 245 years. Now, with the introduction of macro-economic reform 'Project Earthling(c)', the 'END OF SLAVERY IS HERE' and is waiting only for a decisive poll to be conducted on the subject. The reform will terminate all the slavery, abuse of 192 world countries that has gone on for such a long time.

In this article I want to drive home the 'LEGAL CLARITY' and 'LEGITIMATE DISTINCTION' between National wealth recorded by GEC, Country wealth, and Individual / citizen wealth. GEC, Global Earthling Council which will have 193 member country representation will account for, baseline the audited wealth, record it, and further monitor each of the 193 nations wealth, once the macro-economic reform 'Project Earthling(c)' is voted in by a majority vote. This will allow 192 non-USA countries to break the shackles of the imposed slavery by USA and record their opening national wealth or treasury balance.

### **What is Country wealth?**

Every country is defined by its geographic territory, thus defining its wealth by way of the land it owns defined by that territory, and the natural resources / reserves the territory holds. While these might constitute some defined or estimated assets of the country, the realized wealth of the country is the cash reserves the country holds in its local currency which primarily constitutes the taxes imposed on the economic activity within that country, earnings of their citizens, and corporations. This is NOT the wealth recognized or recorded against the country by GEC.

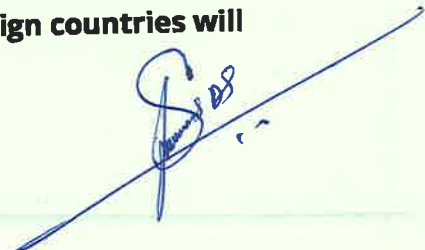

### **What is Individual wealth? Could also be called as citizen wealth.**

This constitutes the wealth owned by a person, by himself / herself, or like a shareholder of a legal entity or similar. This is not the wealth owned by the country or government. In most cases across the world, this is wealth owned by an individual citizen after paying the applicable taxes on what constitutes 'HIS OWN WORK, AND HIS OWN EARNINGS'. Individual wealth is again in the form of cash component or assets owned by the individual. Assets could be property, or instruments of different forms. With my work it has become clear to the world that the HIGHEST valued assets are intellectual property assets that are transformative in nature and have reshaped entire sectors, industries, lines of business, and thus planet earth. The individual wealth is 'LEGITIMATE' when all applicable taxes on the wealth are paid and the individual is able to go public with the information. Some citizens are not able to go public with their wealth which constitutes the 'ILLEGITIMATE' wealth. When we look at the history of planet earth and look at the list of people who have 'CREATED vast amount of wealth, e.g. a billion' by their own work, by their own efforts and built businesses, corporations, cash reserves, the list comprises of very few people. These are people who have built their own wealth ground up from nothing. Then there are individuals who have inherited such wealth and have managed it.

### **Individual wealth, e.g., greater than one billion Earthlings must also be recorded by GEC, a division within GEC.**

Individual wealth recorded by a media house that publishes a Billionaires list seems to have become an accepted indicator of legitimate wealth held by an individual, disclosed to the entire world. This wealth as one would realize is the wealth for which these individuals have paid the local taxes. They publish an annual listing of 'Rich people, billionaires'. I have suggested the media house to introduce the only Trillionaire, me in an exclusive, given there is no expectation and a possibility of a Trillionaires list emerging. This audited / official record of rich individuals from across the world countries must also be recognized and owned by a division within GEC.

**In the decentralized world, patriotism to prevail, and citizenship to align with nationalism. Hidden agendas and support to foreign countries will come to an end.**

Combined effort of government and citizens of one country will help them to build their 'National wealth recorded by GEC' if their net exports surpass the net imports in a given fiscal year, and that over a sustained, prolonged period of time. Most of the world countries must first work towards achieving a sustainable economy for their country, rather than thinking of increasing their 'National wealth reserve recorded by GEC'. In the mid to long term the former will possibly allow them to achieve the latter, thus allowing the country's goals and objectives to merge and align.

### **National wealth recorded by GEC in Earthlings.**

This is the official national wealth recorded in Earthlings currency for each country, which is also recognized and endorsed by all the 192 other world countries. This shall be recorded as cash component and non-cash component for each country. This information is a direct derivative of the 'International activity, exports or imports' the country has created by its government, by its citizens, and by its registered international corporations or businesses. The said 'ITB - International Trade Bank' or similar will have the international transactions recorded in Earthlings currency. The non-cash component comes from the documented history recognized by all 193 world countries.

Given the rouge authority, and monopoly of currency used - \$ enjoyed by USA for 245 years, they have had a habit of distorting, and fabricating history to their liking and wants. This must also end. GEC, along with reformed governance model will own the world history, e.g., wikipedia data and similar.

### **GEC will provide economic advise by monitoring the Country wealth; for those countries that have asked for 'Development packages' in Earthlings.**

GEC in advisory capacity shall additionally monitor the country wealth, for the countries which take 'development packages' to emulate the work, guidance from my work in realizing 'Goal year 29 FE for India', and drive their own country's economic growth and progress. This guidance comes with guaranteed results. A development package when given by GEC, along with the advise provided by GEC advisory committee; shall to a preset course correction set for the country, will ensure (guaranteed) results that are measurable, are achieved by the country seeking advise.

### **Socialism blurs the lines.**

While a clear distinction between individual wealth, country wealth, and National wealth declared in Earthlings to GEC will enable the countries to build wealth, drive their economies, this distinction alone will energize the human endeavors, motivate individuals to achieve new heights by way of their work, efforts, which could be directed towards their benefit, that of their country, and their citizens. Riding on 'social schemes, or policies for short term objectives' without motivating the individuals, citizens of your country will only continue to blur the lines, thus weakening the economic prospects of your country.

### **Context of my invention patent US 8,910,998 B1.**

With the 'LEGAL DISTINCTION' as explained above, all my intellectual property, my patent US 8,910,998 B1, and its intellectual property rights across the 62 countries are 'My individual wealth'. The taxes I pay on the wealth I bring into India by sale of my invention, to Indian government constitutes the 'Country wealth'. Along with taxes I have pledged additional wealth to all the state governments, union territories, and Prime ministers India development fund; all of which also constitutes 'Country wealth'. According to IEC - Indian Economic Council policies, how much wealth we hold in Treasury in Earthlings will become the declared 'National wealth recorded by GEC'. The wealth off the full wealth, that will be held in Indian Treasury in Earthlings currency will be in accordance with the goals, and objectives of IEC for India, to achieve 'Goal year 29 FE for India', and with long term international business and trade aligned with it.

**POV 9:**

## **Segment: Patent-Intellectual Property**

### **Statistical information, ratio - proportion for your thought.**

According to wikipedia, spanning the last 2500 years, there are around an estimated 3000 inventors in the world. This number varies significantly depending on the criterion applied. The current number of billionaires is under 3000 people. This is a total of under 6000 people across population that inhabited Earth in the last 2500 years. The ratio of these two numbers indicates that people that are genius, that are exceptionally talented, that have gone in uncharted territory, that have created their own billions are very very rare and scarce on planet Earth. People who solve problems must be empowered to lead the world.

### **POV 10:**

#### **Segment: Project Earthling(c)**

**GEC National Opening Balances in Earthlings, for 193 world countries when Project Earthling(c) goes live. While I present this as the 'Right perspective', this will also be the factual real outcome given the history of last 250 years and approval of 193 countries.**

**GEC Opening Balance for 192 non-USA world countries:** The easiest option for the 192 World nations would be to just record the actual (current day) opening balances for their countries with GEC.

**GEC Opening Balance for USA:** Given the unlimited printing of USD (\$) for over 245 years by USA, the 192 World countries will not allow any opening cash balance for USA in Earthlings. So, USA GEC Opening Balance shall be 'ZERO' cash component. The Fort Knox gold reserve will be recognized as non cash component by GEC, given that it has been well documented and recognized by all world countries.

### **POV 11:**

#### **Segment: Old world order, Sub-segment: Old world order horror**

**Nano devise technology, used as illegal intrusive technology, also used as privacy invasion technology, popularly known as Nixon technology, to be neutralized by 192 countries. This is for the world countries to save themselves, get themselves off the cage, not be manipulated 24\*7, not be subjected to oppression, and further to experience real freedom, and realize true independence.**

#### **Evolution history.**

According to wikipedia, the camera was invented around 1890. Given the World wars I and II, USA intentionally kept all their technological advances hidden and secretive from the rest of the world countries. The advances to go into miniaturization of camera, and other technologies began much before anyone even understood what a camera is. Knowing about enemy territory without their knowledge, spying on them without them knowing, dates right back into World war I plans and programs of USA. Thus emerges the integration of circuits, miniaturization of electronics, related technology, which later emerged into VLSI. VLSI resulted in the nano technology and its capabilities. By middle of last century technology for spying on anyone, anywhere was fully available with USA which many other countries did not know about. 192 countries must take charge now, to free themselves from the digital, nano cage you are put into.

To support their invasion of 192 countries by nano technology, the technology and its usage was mostly kept secretive. To deter people, governments, countries from doubting that they are being tracked, and spied on, a paid KOL - Key Opinion Leader fabricated medical psychological theory called 'to doubt' is a mental disease was used. This was initiated and promoted by none other than USA doctors and pharmaceutical companies. All of this for intruding into private space of regular people, regular citizens, people in power, rich people, government offices, or any target subject. Remember logic and reasoning is above doubt.

While the technology emerged due to the military war time requirement, it went into devious, diabolical applications catering to cheap business, selling private images or videos of regular people by intruding regular homes, to make cheap money. The corporate executives in USA corporations and people in power in USA used this technology for looking into private spaces of people, families across 192 countries, for any random reason which cannot be legally explained. Example could be to look into bedrooms or bathrooms of regular family people and make money out of it, or for their own sexual carnal desires.

While cheap money, nudity could be one application, the usage of this privacy invasive technology could be far more grave on people of 192 countries, spanning stealing of wealth, stealing of property, manipulation of their life events, and simply target people and families for fun or exploitation. This rogue behavior of USA, by using this intrusive technology for all sorts of exploitation of 192 countries, must be questioned, immediately challenged in a judicial forum, e.g., Judicial Council of United Nations Global Governance Model 2020(c), arrested / terminated, and claims of compensation for damages / liability must be made.

Further, each of the 192 countries must work on building their own counter technology, to detect and eliminate such intrusive nano technology, to save their country, their own citizens, their own government, their own military, their own rich, and prevent economic losses induced by such intrusive technology. Thus, I have requested the Honorable court in India to provide orders, guidance to build a 'Special Technology Unit' within Indian police force, to counter the intrusive nano technology, thus providing protection for Indian citizens, Hindus living in India, our government institutions, and our economy.

### **What constitutes NIXON technology?**

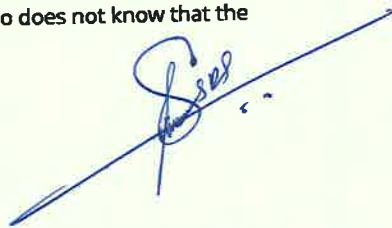

Any electronic circuitry that is invisible to the naked eye, or if it is of the size to be visible to the naked eye, then seamlessly integrated into the surroundings of your house, all rooms within your house, office, or vehicle; constitutes NIXON technology. If you break this down, it is to see and listen to the target subject chosen by USA. The target subject could be an individual, organization, corporation, government, politicians, or political offices. Any area, building that constitutes 'Private area' can be breached by USA by using this technology, and that they have across the world. **The devices include:**

Devises for seeing at the target subject from adjacent houses, or offices. By the technology they would know the target subjects physical body movements, however can now observe what is happening within their body to various organs. High tech color coded imaging allows them to observe anything they want.

Devises to record, and register anything the target subject is typing on a keyboard of his computer, presuming the computer has not been intruded into. Devises to record and register the movement of his fingers on his hand held device, presuming the device has not been hacked to use against the owner. Devises to record and register movement of the pen, or pencil to write anything on paper. By this, your ID'S, passwords, pins, bank account numbers, details are all information captured by the intruders or intrusive neighbor.

Devises for listening to the target subject from adjacent houses, or offices. The lowest decibel level noise, sound could be captured by these devises.

Devises for transmission of specific lines, words at a preset frequency which are heard only by a target subject, by his / her ears only. This is the simulated, transmitted 'inner voice' for a person who does not know that the words / lines are being transmitted.

### **Why the name:**

According to wikipedia, the lowest rated president of usa, has been accused of building and using this technology. Thus the name for the technology. Knowing usa, one should not be surprised that the president and the timing of the scandal was chosen. This indicates, that a well planned, well thought out, well designed, intentional scandal was created in the term of a president chosen for it, in early 1970'S, the watergate scandal, which introduced the Nixon technology to the world. Some one did get a doubt and pursued the doubt to identify what was at the source. Thus the world comes to know about Nixon technology. This technology has been used against all 192 countries to target them, anyway, every way, to cause damage to the country financially, economically, and with an intent to destroy them. Further usa has used this technology for selfish, psycho, diabolical, sexual carnal, cheap business, or manipulation needs.

### **All 192 countries in a cage on this planet. All of humanity is in a cage on this planet. Is this what Earth is all about? Caged for exploitation?**

This intrusive and invasive technology is nothing other than abuse of humanity, abuse of all human rights, abuse of every law ever made locally in a country or internationally, abuse of privacy for personal gratification or gain, abuse for despicable activities, abuse to manipulate, and destroy lives of people across the 192 countries. This is not just a menace for regular people, I call it as a disease to the society, disease to our planet, and problem waiting to be cured. This intrusive technology has been used to abuse all 192 country governments, their government institutions, their politicians, their rich without their knowledge.

The usage of technology results in manipulation of target subjects life, manipulation of his life events, altering the outcomes of his life events, disruption of his privacy, loss of his privileged information becoming public information, and plain simply to destroy the subjects life just for fun and entertainment.

The abuse of this technology cumulates to loss of dignity, privileged information, private information, and personal information such as his bank account details, wealth information, intellectual property, future plans, company data, investment data, ID'S and passwords, etc.

You extrapolate such abuse for your country, your government, your politicians, thus causing economic losses to your country. Thus, damaging your country's wealth prospects and economic growth prospects.

You extrapolate such abuse to the rich people in your country. For e.g., billionaires from your country, to steal their upcoming business plan, their business strategy document, new business venture details, new trademark, new patent, or new copyright details.

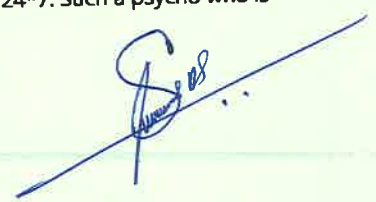

You extrapolate such abuse to your country military, research centers, nuclear facilities, and space organization for starters; and extend them to every government organization and institution.

You extrapolate such abuse to your country businesses, and corporations. Loss of the corporate growth plan, new line of business plan, new sector expansion plan, or expansion plan by way of more franchises across the country.

This technology undetected has the capability of weakening your country, weakening your government, weakening your king in case of monarchy, weakening your military, your business, your corporations, and target your citizens for any reason, or no reason at all.

### **Case of a target subject review. For e.g., a neighbor is tracking you as a target subject.**

A jobless neighbor, who is psycho and suffering with multiple brain disorders, is watching into your house 24\*7, without sparing your bedroom, bathroom, living room, or kitchen; or say your office 24\*7. Such a psycho who is

also suffering with insomnia, or runs shifts in his house or office to target you, knows your schedule after observing you for few months. They know your entire life, friends, relatives, family events, your routine, where you shop, what you eat, and thus can make alliances with anyone you meet, anyone you interact with, and in a pre-planned, pre-meditated way typically by way of bribe in monopolized usd-\$ makes the alliance partner say what he wants you to hear, thus manipulating your life, all your interactions, all your experiences, and all your life events and their outcomes. The abuse of the technology puts you in a cage of manipulated life. usa has not just put people, but all 192 countries in the manipulated cage.

### **Remedy option for 192 world countries.**

Immediate review and evaluation of the macro-reforms I have proposed. Vote them in to take them live. For logical progression, Project earthling(c) must go live, followed by United Nations Global Governance Model 2020(c). The new reformed governance in the model of GI-50, Group Influential 50, will ensure all this rouge ideology of usa is brought to its end. The abuse of such intrusive technology by usa will be fully terminated across all 192 non usa countries. Further, I shall be advising the formation of a technology support wing, within the GI-50 division, to eradicate this intrusive technology from 192 countries. The technology support wing allows the access to all the 'COUNTER TECHNOLOGIES' that are required to identify and neutralize the NIXON technology. Each of the 192 countries will have their own 'Counter invasive technology units' established that shall build capability for protecting themselves. In India, a 'Special Technology Unit' has been recommended to be formed that shall counter this invasive technology within India. Other countries could follow similar approach.

Macro-economic reform Project Earthling(c) is accessible at my website webpage: <https://srinivasdevathi.com/project-earthling/>.

Macro-governance reform United Nations Global Governance Model 2020(c) is accessible at my website webpage: <https://srinivasdevathi.com/un-global-governance-model-2020/>.

### **POV 12:**

**Segment: Old world order, Sub-segment: Old world order psycho**

**A normal proper functioning society is now pretty much dead in usa.**

I present this as a perspective, however it is factual information.

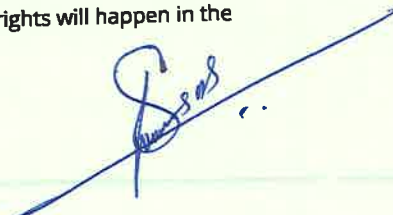

Since my invention of patent US 8,910,998 B1 in Q1-2007, Americans, executives in three corporations Capgemini USA LLC, HSBC Bank USA, and Johnson & Johnson Pharmaceuticals USA have surrounded my life using the technology as explained in POV 11.

**The perspective linked to this fact which I want to present here is:** Given the 'No work, nothing to do' lives of Americans, they are suffering with debilitating mental diseases and disorders, wherein a normal proper functioning society is now pretty much dead.

They have a long journey to return to a functioning society. I encourage all the 192 other countries to join hands, and help cure the mental vices and diseases of Americans. This may take several decades with slim incremental gains.

**Another perspective linked to this fact:** Is that my information / invention details are now in front of all the 193 world countries. By trying to steal my wealth, usa cannot run to a different planet, and run away from the other 192 countries. They must live here and face the upcoming 'LAWSUITS in JUDICIAL COUNCIL'.

The entire resolution of the subject, distribution of 'Intellectual property rights' to 62 world countries in a systematic way, is the only real, and legally apt outcome. This structured distribution of IP rights will happen in the

eye of the worldwide media houses.

**POV 13:**

**Segment: Patent-Intellectual Property**

**The comparison is that of a STAPLE production technology, an integrated manufacturing step that MUST be absorbed by the World Automotive production plants, as opposed to a niche expensive option that will not drive the financial benefits and results to the Automotive industry.**

Events and motor shows seem to be back in operation, and I recently saw the BMW iX flow color change video from CES (Consumer Electronics show / auto show). The video was interesting showing the color of car change between white and black / gray. As it is revealed in the video the paint comprises of micro capsules that change color upon the transmission of current / charge to the painted vehicle exterior panels. They call it electronic ink. The video further reveals that micro capsules could be designed to hold more color pigments providing other color options. The cost of the paint is not mentioned.

In year 2015, after my patent was granted, I did spend some time evaluating what might be the competition landscape for my invention. Two technologies came to the fore, one was the expansion of 'photochromatic' lens material that changes between white and black depending on sunlight / temperature it is exposed to. What BMW has demonstrated is similar to putting the 'photochromatic' technology on steroids and building the specialized paint with micro capsules. The second technology that I detailed was the usage of LED television display panel technology / smartphone touchscreen technology given the price drop from volume sales of these units, on all vehicle panels. It did seem like it would be an overkill for a car exterior, to have full digital display screen technology.

The technology that emerged in months that followed with a smartphone manufacturer attempting to build a paper like / bendable phone technology, or phone having additional sides that have touchscreen technology, corroborated my anticipated second technology listed above. The cost, benefit, unwanted features beyond the scope of solution looking for - color change, prohibitive laws will be significant challenges to this technology. And the recent CES video I watched has brought the first technology that I anticipated into reality. This technology also has the cost, benefit, prohibitive laws, current/charge in vehicle panels, switch operated could mean color change while driving, and such challenges. CES show reveals that both my anticipated competition technologies might operate in isolation or come in an integrated one solution format, while being a very expensive and niche option.

My design in patent US 8,910,998 B1 is the simplest, and most cost effective, that allows OEM'S to decommission the paint shop, realize 30% capital cost savings, reduces the per unit production cost, delivers at least 40% increase in profitability, by having a one time installation of the system on the vehicle being sold. My invention / design is what I call the industry manufacturing staple, that all OEM'S of the world will move into with 100% confidence and in that they will look to transition all their manufacturing plants to use my design and that across the world. The compelling case is made from the financial benefits delivered by the technology, and the design being a one time installation at the time of vehicle manufacturing and roll-out. This installation of two-layer polymer resin system / vest, on the vehicle exterior panels is what I refer to as a staple production manufacturing process step / protocol which every car built in the world will embrace. The step is synonymous with 'few more components into JIT', and the OEM achieves all its financial objectives for years / decades to come. And the consumer has the full spectrum of colors (close to 2000 colors) to choose from for their car, as many times as they want, through the life of the car.

I would like to draw the attention of readers to the micro-nano technologies and the processing ability of the automotive industry with these technologies given their R&D divisions; within a quick time, at a rapid pace, there will be giant technology leaps in fabrication technologies using polymer resins to deliver the target prop-

erties by the area of the polymer resin being attached to the specific area of the vehicle panel, thus enabling the installations a manufacturing standard. If paints are manufactured with micro-nano capsules, the polymer resin systems could have micro-nano compositions delivering different / adjusted properties to different areas of the system being attached to the vehicle panel. The STAPLE manufacturing step shall be the adoption trump card for my design as opposed to the niche expensive technology that might be consumed by a 10 million \$ price tag specially manufactured, custom-made car.

I anticipate that within a short span of time, the next generation of extrusion machines will emerge which will deliver products with varying desired properties across the polymer resin system, ensuring that the mechanical fit with the vehicle panel is secure, and in a way that it would hold its structure even when subjected to forces by the minimal quantity of fluid / color the system is built to hold. This investment in next generation extrusion machines is negligible capital cost investment to be factored in by OEM'S in comparison with the overall financial benefits they would derive from the inventive design.

My invention / design is for volume manufacturing, and mass production, which will drive un-comparable financial benefits to the OEM'S. It is impossible to ignore the one staple production step that drives such results. I request you to read the POV 5 relating to Industry adoption and the related financial benefits.

You can access an audio file where I speak about the financial benefits of my invention design, addressing the automotive industry executives, at the webpage link: <https://coolcartechnology.com/>.

### **My interaction with BMW:**

Like my communications with most of the world OEM'S, I shared my invention details with BMW group in 2016, and offered them an exclusive rights deal. After some email communications, they refer me to a website link where I had to electronically accept certain terms and conditions, which I did not accept. My invention exclusive rights deal proposition with BMW ended in that manner at the time.

Srinivas Devathi, 4-6-2022.

### **The list of benefits from my inventive design by the stakeholder include:**

#### **OEM benefits:**

- OEM could potentially decommission the 'Paint shop' in their automobile plant within a few years. With a robust transition plan, the decommissioning of 'Paint shop' is not just possible at one plant, but all the manufacturing plants. Significant 'capital investment and cost reduction' would be realized.
- The quarterly / annual 'Operational costs' related to conventional painting could be fully eliminated. Reduced capital investment and reduced operational costs, would mean reduced 'Financing costs'.
- Hazardous environment (in the form of paint shop) is eliminated for OEM manufacturing plant employees.
- OEM's could manufacture, maintain inventory and transport vehicles only by model / variant and not by color.
- OEM's would realize inventory management cost and transportation cost savings.
- Most importantly, they can now deliver the car to consumer in the color of consumers choice without any delays or special orders.
- Per unit paint costs are reduced by at least 5%.
- Overall painting costs are reduced by 5-10%.
- A 'Cool car' could easily be priced 25-40% higher for the 'Repeatable color change feature' delivered to consumers. This could be a new variant in existing vehicle models or a brand-new model by itself.
- Finally, the most important of them all, OEM's will realize increased sales and profits.
- The auto parts / spares business would have additional stream of income in the form of vest, two-layer polymer system, manufacturing / replacement sales. Not just for current year vehicle models, but also for

all the OEM past vehicle / car models. These vests, two-layer polymer systems would be directly sold to 'Regular car to Cool car' conversion businesses, via an e-sales channel.

- The benefits listed above for OEM's shall continue for many decades to come.

**Consumer benefits:**

- Can get a car in the color / shade of their choice, out of 1800 plus color / shade options available in the market today.
- No wait time, to get the car of their choice in the color / shade of their choice.
- Need not stay with the same color. Can change the color of the car for an affordable price repeatedly as and when they want.
- Can also opt for their current car (conventionally painted car) to be converted to a 'Cool car' for a reasonable price, as compared to replacing the car.

**Dealer benefits:**

- Reduced inventory management costs, as inventory management is by car model / variant and not by color.
- Lower dealership set-up costs, due to lesser parking space requirement.
- Increased profitability.
- Can deliver the car immediately in the color / shade choice of consumer.

Srinivas Devathi, 4-6-2022.

**POV 14:**

**Segment: Patent-Intellectual Property**

**I am Mechanical Engineer by education which included Automotive subjects, I am an Automotive Industry outsider, and inventor. This fact has augured well to contain automotive industry competition and soften the race to be the first to embrace the invention patent US 8,910,998 B1. Given the financial benefits, all OEMS could move in, embracing the invention / design around about the same time.**

An Industry insider patent would have created a chasm within the automotive sector with raging rivalries and lost competitive market share. Me, the inventor of patent US 8,910,998 B1, being an industry outsider has had a very positive effect on the Automotive industry as the industry can adopt the technology that drives humongous cost savings, financial benefits, and business benefits, by keeping the brand rivalries to minimal.

The OEM brands need not go against each other or have rivalries in introducing 'color change cars by adopting my invention design'. All OEMS can adopt my invention / design and realize the full financial and business benefits from it. Further, all OEMS can also plan the transition of production plants one at a time in parallel streams / waves, to manufacture 'color changing cars', by country, and cover all countries they manufacture in.

I request all the world automotive OEM'S to accept the fact that I am an industry outsider and thus also accept the fact that given the caused liability, I must cash out of my invention by executing 63 agreements in all. This will ensure, the entire world automotive industry, all brands included will adopt my invention seamlessly with minimal brand rivalries or friction while doing so. I would feel good if all world OEM brands roll out color changing cars within a block of three to six months without having to claim who was the first. The largest Automotive industry transformation would be a welcome by the world countries and citizens. The consumers have the full spectrum of colors to choose from for their car.

**POV 15:**

**Segment: United Nations Global Governance Model 2020(c), Sub-segment: Medical Council**

**WHO to be replaced by Medical Council, the expenses of which will be paid in Earthlings currency. All the expenses of United Nations Global Governance Model 2020©, the future governance model will be paid in Earthlings currency by GEC.**

Unlike WHO, an organization that is paid for in usd, and controlled by UNSC 5 countries which indirectly means fully controlled by usa given the financial lever; the future 'Health organization' named as 'Medical council' will be paid in a world neutral currency Earthlings.

The Medical council will own all the medical journals and medical literature pertaining to the treatment of all the human organs. Further the council will have 193 members that correspond to 193 world countries. The members will have access to the single version of truth medical journals and medical literature, thus ensuring the medical practices / prescriptions / procedures done to manage any of the human organs are consistent across the 193 world countries, and are proven organ management practices.

This will ensure medical malpractice, illegal trials on India, Indian citizens, and similarly other developing or poor countries is put to an end. Once again, the macro economic reform Project Earthling© and the macro governance reform united nations global governance model 2020© will drive equality across all the world countries.

Medical council will believe that Homo Sapiens must live for 90-100 years, their full life, in a relaxed and healthy way while on the planet. Their objective would be to deliver full life to humans and within that the best quality of life that humans could have to lead a relaxed and balanced life.

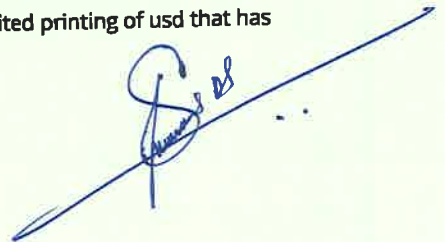

**Medical councils perspective on 'Eternal life programs run by usa'.**

Medical Council will bring HEALTH balance to the world, and will put an end to 'Eternal life psycho experiments or projects, which were run by usa, which are nothing but abuse of human rights'.

While doing so, 'Medical council' will ask any country that has achieved extension of life beyond 90-100 years for a sizeable population by way of their own 'Fitness programs / Diet programs', say 120 years survival across a target test subjects of say 5-10 thousand people, they could present such a program to the world countries. In exchange they could earn Earthlings for their country, if such a programs checks out and actually works. Thus positive approach towards longevity of life will be encouraged and promoted as opposed to any negative tactics or approaches, e.g., organ harvesting.

**Organ harvesting, in that 'Heart harvesting', a rouge program run by usa.**

A fantasy has been pursued and chased by usa for decades now. It is the eternal life pursuit. This pursuit begins by getting a second life. How do you make a 90 - 100 years old person get a second life, such that this person lives for another 60-70 years? And is this process repeatable? These were the questions asked by americans as they had enough wealth, enough to eat, and drink, with nothing else to do. They started a series of covert / classified projects given their monopolized currency usd. They invested in 'Second life covert program'. This is one of the many rouge programs usa ran across the world countries given the unlimited printing of usd that has gone on for 245 years now.

A handwritten signature in blue ink, possibly reading 'S. S.', is written over a long, thin blue diagonal line that extends from the bottom right towards the center of the page.

With the 'Second life covert program', the world countries, within that the developing and poor countries in particular became playgrounds for their pharmaceutical companies. Every organ has been targeted and where possible organs have been harvested. In such countries they have proliferated corruption, driven by greed, which is satisfied by a suitcase of usd thrown to get any illegal medical practice / illegal trial done, without the knowledge, permission, or consent of the target subject. Millions have been used and killed across such countries. **There is a money trail network they build to get such horrors done on test subjects.** Usa had several pharmaceutical companies start in mid 19th century all of which are corporations with surplus funds, with research facilities and most of them have overseas operations for conducting illegal trials. The second life in one approach was planned to be derived from 'Heart harvesting' from a younger subject and giving it to an older subject. This is planned murder to get a second life. Will the 192 countries allow such a practice? Secondly will the 192 countries continue to take this illegal pharmaceutical trials, battering, and experiments on your citizens, and their human organs? This must end. It will end when the monopolized usd is terminated. It will be terminated by Project Earthling©.

The future Medical council will be paid in Earthlings and governed in GI-50 / G-193 model. This will ensure all illegal activity conducted by usa across the world, comes to an end, and a brand new world with rules, law, peace, and prosperity will be established. There will be proper medical care practices to take care of all the human organs, accessible to all the countries in the form of a single version of truth, in the form of medical journals and medical literature.

A movie constant gardner touches upon this subject and shows some reality to audience. All heinous, horrific, illegal medical practices will be brought to their end by the Medical Council.

I suggest you take this very seriously, for the health and well being of your country citizens; and to move in that direction, bring the attention of your leaders, government officials to this subject, so that your country is prepared to vote 'YES' for the macro reforms when they are brought to their decisive voting.

Earth is scarred with history of targeting humans and their organs because of usa activity across the world countries. First step is to end it. My macro-reforms will do it. Second step is to claim damages / liability caused due to loss of human life from usa. Will this result in 192 lawsuits from 192 countries against usa, at the judicial council? We must wait and see.

You can read some more about the Medical council by doing a search on 'medical council' in the website webpage: <https://srinivasdevathi.com/un-global-governance-model-2020/>.

Srinivas Devathi, 11-6-2022

**POV 16:**

**Segment: Project Earthling(c)**

**Bringing the WORLDS REAL INDEPENDENCE DAY.**

**For each country's preparation prior to decisive voting of macro-economic reform Project Earthling(c).**

**Questions to be answered by 192 countries. By their government, leaders, and citizens prior to voting.**

How did my country allow the monopoly of usd-\$ across the world for 245 years?

How has usa abused my country over the last 245 years by monopoly of usd-\$?

How has usa destroyed my country over the last 245 years by monopoly of usd-\$?

How much bribe, illegitimate money for illegal transactions, has usa thrown at my country over the last 245 years in the form of suitcases of usd-\$?

What is the total value of import bill fraud committed by usa by manipulating usd-\$ over the last 245 years against my country?

How many importers from my country have been cheated by usa import bill fraud?

How many illegal activities has usa financed in my country by using suitcases of usd-\$?

How many negative strategies against my country have been financed by usa in suitcases of usd-\$?

Did usa promote, finance, and built corruption in my country?

Did usa target my country citizens by bribing few people in usd-\$ to target citizens with nano technology devices and privacy invasion?

Did usa supply illegal drugs to my country so that the citizens become drug addicts, useless, or kill themselves?

Did usa supply illegal weapons to my country so that the citizens would fight and die? Did they divide my country so that we fight and die?

What other illegal activities has usa sponsored in my country by using unlimited printing of usd-\$?

Did usa conduct illegal clinical trials in my country by using unlimited printing of usd-\$?

Did usa do privacy invasion in my country, into regular peoples homes, and peep into their bedrooms, bathrooms, living rooms, kitchen, offices, cars, and shoot their videos without the citizens knowledge?

Did usa sponsor 'organ harvesting' in my country by bribing some hospitals and building a bribing network?

Did usa use 'divide and destroy' strategies against my country and citizens?

Did usa try to impose sex slavery on my country?

Did usa intentionally kept my country and its citizens ignorant, thus ensuring no business skills to deal with them?

Many more questions will be raised by 192 world countries depending on their horrible experiences with usa. Answering these questions will give the full clarity to the country, on all the wrongdoings of usa using the monopolized usd-\$. It will become very clear to the country that they have been abused by usa for a long time, and thus conclude that taking the macro-economic reform Project Earthling(c) is the right direction for the future. It will be a neutral currency, and no country can try to do wrong against your country and your citizens.

**Launch of Project Earthling(c) will be declared as the REAL INDEPENDENCE DAY to planet earth and its 192 countries, from the rouge regime of usa. The event must be marked by a cultural show presentation from each of the 192 countries. I request each of the 192 countries to put up a cultural show, entertainment show, drama, performance or maybe depiction of how your country suffered, to mark the occasion.**

**POV 17:**

**Segment: Old world order, Sub-segment: Old world order psycho**

**Usa, and its venom against 192 world countries and their citizens. Venom is to destroy, burn, and kill them all for reasons of RACISM, HATRED, and JEALOUSY.**

Given the history of last three centuries, unlimited printing of usd-\$ for 245 years, and having no work to do, usa as a country and all its citizens have reached an inhuman state with no human contact, lost humanity, and zombie like lifeless state. Their arrogance has crossed all barriers and they have lost their mind, and given the bribes they can throw in printed usd-\$, with the history of rouge leadership, they imagine they can do anything they want, anywhere in the world. Further they have broken every law ever made in the 192 countries, and have rendered the world lawless internationally.

Their numb state of mind, with psychosis, and mental disabilities has reached a point wherein they are now intolerant to:

- 1) any non-usa person that is smarter than them.
- 2) any non-usa person that looks attractive than them.
- 3) any non-usa person who wants to achieve good, great things for their country.
- 4) any non-usa person who has the competence to achieve big things in life.

When they identify such individuals, given the rouge regime and the history attached, out of pure RACISM, HATRED, and JEALOUSY they would destroy such persons life, and will go on to finance illegal activities until the person, his city, his country are fully destroyed, so that they control the world as in the old world order. The cure to these mental diseases and vises will begin by my macro-reforms Project Earthling(c) and United Nations Global Governance Model 2020(c). The nature of an adult person is not easy to change, usa and their deep seeded psycho attitude will not cure overnight and will take decades to cure.

All 192 countries need to work in a fully coordinated and synchronized way to make these psycho people work to earn Earthlings and pay their debt and liabilities to the 192 countries as would be judged by judicial council in the upcoming new reformed governance model.

**POV 18:**

**Segment: Old world order, Sub-segment: Old world order horror**

**What are the options for India to deal with a cash receipt from usa in usd (\$) in high values such as 500 Billion, 1 Trillion, 2 Trillion, 3 Trillion, 5 Trillion, or 10 Trillion? Prayer point 1 in OS 2486 of 2021 prays the Honorable court to restrict such cash receipts offered by usa.**

**This POV is about recognizing the wealth demarcation between legitimate, and illegitimate.**

Given that usa wanted to steal my invention patent US 8,910,998 B1 and its worldwide intellectual property rights conservatively valued at 93 Trillion Earthlings / \$, they could have attempted to cut deals with India, possibly Indian govt, or one of the Indian state governments, by offering cash proceeds (a clean word for bribe) in exorbitant values such as 500 Billion, 1 Trillion, 2 Trillion, 3 Trillion, 5 Trillion, or 10 Trillion in usd (\$). India,

Indian govt, or any of its state govts must be wary of accepting such proceeds, as you will never be able to explain such wealth, its legitimacy to any of the world countries.

RBI foreign exchange reserves is not an option for this. If you hold such wealth in usd, you are becoming a state controlled by usa. Effectively becoming a slave country reporting to usa. I do not want India to be a slave country. Further, the rest of the world countries will question how India came up with such foreign exchange reserves when the GDP has not shown any variation, our economic indicators are relatively stagnant, and we still have vast population in BPL - below the poverty line category. So, such high values held in usd (\$) currency raises questions on the legitimacy of such wealth and India will not be able to explain how they earned such wealth. The world countries will clearly call it a bribe, illegal, unethical, or a fraudulent deal.

Firstly we must never accept any bribe to lose any portion of my inventions wealth from coming into India. The question is how much bribe should we receive to lose 93 Trillion Earthlings / \$. The real answer is 'why take bribe, when the full wealth is legitimately ours, since it is mine, that of an Indian citizen', and I intend to bring the full wealth legitimately into India through the legal court proceeding. If anyone thinks, of getting full 93 Trillion in \$ as illegal bribe, such wealth will never be legitimate wealth coming into banks and recognized by RBI. Hence, the legal approach of me bringing in the wealth is the only real option for India. And this wealth will be recognized by all the world countries as legitimate money earned by the inventor according to a binding Treaty.

So, if indeed India has received high value numbers such as 500 Billion, 1 Trillion, 2 Trillion, 3 Trillion, 5 Trillion, or 10 Trillion in usd (\$), what must they do now to deal with this illegal payment situation which will be defaming this country? Here are the options I propose.

1) Only if the payor of such high value payment is USPTO, a us government organization, then I give provisions in OS 40 of 2022, page 10, clause 22, and 23. If USPTO indeed has paid anyone in India, example Indian government, or one of the state governments high value payment of 500 Billion, 1 Trillion, 2 Trillion, 3 Trillion, 5 Trillion, or 10 Trillion in usd (\$), the same could be declared in the Honorable court, as advance proceeds received in anticipation of the upcoming largest liability settlement (at least 93 Trillion Earthlings / \$) to be received by Srinivas S. Devathi, me, and pray the Honorable court to offset the payment against the total liability value. The declared value must be placed in the court in the form of a 'check' payable to Srinivas S. Devathi, me. The Honorable court will offset the value off my full liability payment, and receive the balance from USPTO, the same organization that made the payment.

2) If the payor is anyone other than USPTO, shred the entire amount of currency since it is in usd (\$) currency and illegitimate. It is as if the transaction never occurred. You took the corrective measure.

3) If the payor is anyone other than USPTO, return the full amount back to usa, or whoever the payor within usa is. It is as if the transaction never occurred. You took the corrective measure.

IF USPTO was the payor, and the payment was a legitimate payment, which came through a bank, option 1 must be your action. If the payor is anyone other than USPTO, the payment is illegitimate, and options 2 or 3 must be your action.

**This POV is about recognizing the wealth demarcation between legitimate, and illegitimate; demarcation between legal wealth of Indian citizen, and illegal money received by bunch of citizens who decided to sell the country; demarcation between recognized Indian wealth (by rest of the world countries), and illegal money the authenticity of which will be questioned by all the world countries; demarcation between legal wealth held in banks, and illegal money stashed away and hidden from authorities. Make the correct choice from the options I have provided above.**

**POV 19:**

**Segment: Old world order, Sub-segment: Old world order horror**

## **Lawmakers have work to curb 'Privacy invasion'.**

As detailed in POV 11, the micro and nano technology advances have resulted in many devices to intrude into the privacy of a person or families life. This intrusion could be done at the target subjects home, office, car, or all the places.

For offices / homes that are in upper floors, such tech could be surrounding you on six sides; four sides, the floors below and above to look at you and capture all information about you and shoot privacy invasive videos. For offices / homes that are in ground floor, such tech could be surrounding you on five sides; four sides and the floor above. This is a new challenge for all people, families, businesses, government offices, politicians, and simply said anyone living in a building anywhere in India, or the world. Laws must be made to contain this technology and privacy invasion.

This technology could be abused in 'Hotel stays' of people. Without your knowledge, there could be people on five or six sides off your room, and doing privacy invasion into your personal life. Law makers must frame a new 'Hotel stay law' to log who comes into the hotel with technology, devices, and stays thus intruding privacy of fellow residents who could be target subjects. A disclosure form must be mandated. And any resident at the hotel could get the five or six sides rooms checked for presence of such technology / devices by giving a complaint to the hotel and local authorities.

**If India must realize the vision of becoming a rich, and yet a peaceful country, curbing 'Privacy invasion' is of highest priority and must be taken seriously. The law makers must make laws as explained above. The same applies to the other 191 non-usa countries. This will end the eagle eye intrusion permanently.**

### **POV 20:**

**Segment: Old world order, Sub-segment: Old world order psycho**

**How the rouge leader, from the rouge old world order has proliferated illegal transactions for targeting people from across the 192 other countries?**

**How much did the usa defendants in OS 2486 of 2021, combined usa spend in targeting me over the last 15 years, since Q1-2007?**

My Living will in public domain has slowed their investments in targeting me. My Living will brings all of India, and the world countries into my wealth allocation and future initiatives. Thus, usa investments to target me have started to reduce.

Usa has spent an estimated 50 Billion \$ to target me across the world (primarily usa and India) over the last 15 years, since I invented patent US 8,910,998 B1 in Q1-2007. In OS 2486 of 2021, I detail all the negative tactics that have been used by usa defendants, combined usa against me.

Close to an estimated 10 Billion \$ would have been spent by them in targeting me in usa, in years 2009, 2010, 2013, and 2014. Over 40 Billion \$ would have been spent in targeting me in India between years 2010 until now in 2022. With this kind of money spent, you can imagine how tens of 1000'S of people could be hired to target one person, and attempt to frame the one person negatively.

They have bribed a whole lot of people, many organizations, many institutions, many sectors, many industries, and associations, to target me to see if they could steal the full wealth from my invention patent US 8,910,998 B1.

**The money was spent in:** applying isolation strategy on me, making attempts to frame me negatively, documenting the thresholds or control limits of my body and organs, to deliver targeted experience

to me every minute of every day, surround me 24 by 7 by 365, forecast my schedule, forecast and control my life for upcoming weeks, months, years, record my personality, behavior, nature, and responses to different targeted actions, attempt to control me, control my body, control my brain, and control my actions as much as possible. All of this to steal the wealth from my invention from me and that of India.

In order to counter it, I have executed my Living Will and pledged 90% of all the wealth for India, for achieving Goal year 2050 for India. This work will be followed worldwide and it will have cascading effects to all the developing and poor countries of the world. While targeting me as an individual to steal the wealth is one thing, how could they cheat all of India and 61 other countries that are connected to my work directly? My Living will in public domain has slowed their investments in targeting me.

The POV in this is about how the rouge leader, from the rouge old world order has proliferated illegal transactions for targeting the 192 other countries from progressing and building their own wealth. They have gone about cheating the entire world while targeting one person, me. They have rendered the world with NO international law. The old world order must come to an end, and the new world order must take charge. Both my macro reforms will bring the necessary international law across the world. Read the macro-reforms Project Earthling(c) and United Nations Global Governance Model 2020(c).

#### **POV 21:**

#### **Segment: Old world order, Sub-segment: Old world order horror**

**Similar to the rouge program detailed in POV 15, organ / heart harvesting program launched by usa, there are many other rouge programs the jobless, workless, psycho americans / white house have run across the 192 world countries. My estimate would be that the number of questionable rouge programs run by usa across the world would be about hundred or more. Here are other rouge / covert programs ran by usa in many world countries, thus also in India, and used against me.**

After my invention in Q1-2007, usa were quick to estimate my inventions valuation, realize that the old world order and their rouge regime was coming to an end.

They used three rouge programs against me after my invention, in a way to target me, and / or frame me negatively.

- **See / C Program:**

**History:** In the decades of 1940'S, 1950'S, and 1960'S Indian movies, in that Telugu movies were pulverizing the ratings / rankings of american cinema. World countries were hooked to watching Indian cinema more. Usa evaluation of the situation was 'emoting with eyes' was observed among Indian actors and thus their cinema were successful, as compared to american. The Indian mythology and fantasy movies were pulverizing american cinema. They fund an illegitimate account with monopolized unlimited printed usd-\$ and start a program called See / C program to target Indian people eyes and thus facial expressions. This rouge program was supposed to brand emoting with eyes as a disease or eye issue or health issue, when there is none. They funded this program and targeted many across the world and certainly India given the film ratings that they wanted to kill and destroy.

Given my invention, and that I was Indian citizen, they wanted to choose ways of attacking me, and this was a natural choice. The false KOL documentation for this is done by rouge pharmaceutical companies. I am a natural speaker and when I am explaining content to audience I am fairly composed and as with many people, my forehead expands and contracts while talking and explaining. This has been used as if it is a disease against me, and that I have a See / C disease and my eyes are animated in a way. Such a rouge program and documentation will never be successful, as they now must confront me in the court

with these false fabricated allegations. In this effort, to do false documentation, they have attempted to parade many women around me and state that my eyes expand / enlarge when women are around me and contracted / normal otherwise. This is nothing but american trash / garbage program which people and courts all across the world will strike out and call out the negative tactic with the hidden motive of greed, from a distance. It is nonsense to cover up their greed and wrongdoings.

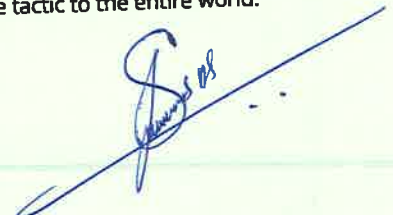

- **Ass program:**

**History:** After world war II, India got its independence in 1947, and declared itself a Hindu country under the leadership of Mahatma Gandhi. The rouge British did not want to fully retreat and wanted to somehow attack India and Hinduism. Soon Gandhi is assassinated. They use symbology to attack Hinduism. The symbol of OM, was always popular in India and seen on temple walls and other suitable places. The symbols of cross and moon/stars for christianity, and islam were analyzed and they wanted to get derogatory, bad, negative meaning for the OM symbol to target Hinduism. The 3 was construed as 'ass' and the line coming out of the 3 as shit among bad analogies made by them to target India and Hinduism. Not to mention they add the word game 'Hind-u'. Hind implying rear or ass. Thus symbology and word games are behind targeting Hindus and India with 'Ass program'. An illegitimate account was created and funded to run a 'Ass' program. If you merge these two rouge programs See / C program and Ass program, you get C-hinese program.

Since they were identifying ways of attacking me after Q1-2007 when my invention was done, they chose this Ass program also. The way to tag me to this was by parading women in front of me, in my line of sight and state that I see ass. When they are intentionally made to walk in front of me, how is that any kind of an issue linking to me? And further, in my entire life I do not know, as I cannot see who is walking behind me, or what is going on behind me. So is the case with all human beings, as we have eyes in the front. So, this is one of the difficult programs to run, as a camera must be positioned in a neutral position to shoot and tag a person in the illegitimate ass program. And the moment camera comes into the equation, the stage drama, of a set-up women walking in front of subject being tagged will be very clear to court and all the world countries. To their disappointment, this program has also failed. They did finance this program heavily and had many women parade in front of me. My behavior was normal and did not change, despite the parading, thus fully neutralizing and killing this negative tactic of theirs. They will fail to use this against me in the court as well.

- **World is short program targeting men from 192 world countries:**

**History:** Given the explosion of corporations in 19th century america, combined with monopoly of usd-\$, they built enough wealth for themselves and built their country, cities, roadways, airports, and finished all work within their country by mid 20th century. After world war 1, the work within america was accelerated and much was done. They trigger world war II in a planned effort to neutralize any opposition across the world, and stamp their authority on all the world countries. USSR, the only opposition disintegrated after world war II. The atom bomb drop was supposed to instill fear among world countries. Thus america thought they stamped their authority on all world countries, and further they form 'United nations' and use it as a eye wash to control and manipulate the world countries any which way they want, since UN was paid by them in usd-\$. The entire world with no opposition, with fear among countries, and full control in their grip by a puppet UN. What more could america want. One would think nothing more. No, the rouge american men wanted to announce to the world that they have bigger penises as compared to the other 192 country men, when it is a lie, as men across the world are same by ratio-proportion of their height to penis size. How do they go about falsely creating this illusion as a fact to men of other countries? They used all technology and advances at their disposal. Pharmaceutical technology to falsely hit men of other countries by ratio-proportion to establish they are short as compared to Americans. Since the technology was there, they fund an account illegitimately and start the 'world is short' rouge program. Since my invention in Q1-2007, since I was going to be the richest man in the world, they wanted to hit me under the belt to hurt my ego, sentiment, or make me emotional since I was being targeted. The technology they have at their disposal is to induce subsize erections and chemically push a release. They have used it few times against me, which I have been able to see right through. I will expose their food poisoning, and drug usage to the entire world. And further I state that I am a secure man. And I have given my penis dimension on my website 6 inches under normal erection. My puberty erection length I can say. These days there are drugs to do all sorts of things with your penis, to increase length, etc., all of it since the pill became a prescription drug in 1998. Once again they have failed in using this rouge program against me, as I can clearly explain and detail the analysis behind their negative tactic to the entire world.

It must also be understood that this is not against me or India alone. This tactic has been used by americans across the world countries and their men. I am a secure man, and can prove my penis size to the court in a special court hearing, or even my sexual prowess (given the curiosity of me being the only trillionaire) to the court in a special court hearing. Thus rubbishing and fully terminating this rouge program of america.

- **The SCAM OF SECOND MILLENIUM.** How did usa-uk men create an illusion, thus hurting the manhood and ego of men from across the world?
  - Understand this simple medical fact and enlighten yourself with knowledge and truth. usa-uk men designed the world is short program. Given the pharmaceutical company advances they had drugs to make the penis hold blood giving it a certain size. This was available to them by world war II time-frame. They design puppet un. You must now know that un has worked all of the last 75 years only for their order giving master usa and uk, since they are paid in usd-\$. They had no interest towards the world countries or world citizens.
  - Within few years, the drug that gives the penis a certain dimension (by increasing blood flow and holding it there for a preset time) is integrated into their daily consumption food, which was now processed food / meat / beef / bacon etc. This is simply a sub-size erection holding for certain time through the day or when they want it. They did this to show off and started doing it around the world, indicating that this is their penis in un-erect position by consuming regular food and nothing else, when the drug was hidden in the processed food they intake daily.
  - Further, using the same sub-size erection inducing drug, now given through food to men in India or other world countries, they indicate that, look this is his erect penis size, as we have given him erection drug. Both dimensions are same (factoring and keeping the height of the persons comparable), however they are cheating the world by showing this dimension on themselves in an undrugged unerect condition, and that for the target person as a induced drug erection resulting in the short penis. This scam they have continued for decades now. Men, women all across the world have been cheated by this.
  - You remove the drug molecules from the processed food, and usa-uk white men penises will come down to one centimeter or one inch given the removal of prolonged drug usage. I very clearly indicate to entire world. Male physiology is one and the same across the world. The height to erect penis lengths across world countries, including all religions, all regions, men of all color is 4 feet - 4 inches, 5 feet - 5 inches, 6 feet - 6 inches, 7 feet - 7 inches, and so on. This is a fact. A scientific fact. Do not believe or fall for the cheating tactics of usa-uk men. They are now psycho beyond redemption.
- **usa-uk by creating this illusion in the 20th century, have cheated men across the world, and people of all the 191 world countries. Given this fact, this has got to be the 'SCAM OF SECOND MILLENIUM'.**

All of these rouge programs have been used in combination not only in India, but across the world with the purpose of 'Tagging young men' from developing, poor, or any of the 192 countries without their knowledge, have some paid kol / doctors do frivolous paperwork again without the knowledge of the tagged subject, and eventually kill the subject so that some old loser in usa gets a second life from the harvested heart of the tagged subject. So, by motive these three programs join or culminate with the organ harvesting / heart harvesting rouge program run by usa. At the Medical council in new world order, I will introduce and elaborate these programs to all 193 countries, if required.

**POV 22:**

**Segment: United Nations Global Governance Model 2020(c)**

**Bringing the right governance to the world, that shall last for centuries to come.**

**For each country's preparation prior to decisive voting of macro-governance reform United nations global governance model 2020(c).**

**Questions to be answered by 192 countries. By their governments, leaders, and citizens.**

**Questions to be answered in YES / NO options.**

**Questions about non functioning old world order units / divisions:**

Is UNSC with five permanent member countries four of which are controlled by usa, competent to govern the world?

Despite the eye wash of 5 permanent members at UNSC, it is fully controlled by usa, by using the financial lever, and monopoly of usd-\$. Do you agree?

The other four non-usa unsc members are sitting lame ducks, taking orders from usa. Do you agree?

All of United Nations, its operations and expenses are paid for in usd- \$? Do you agree?

Since paid for in usd- \$, United Nations works in the interests of usa only. Do you agree?

All the other organizations under UN work for the interests of usa only. Do you agree?

Five of the six UN organs are headquartered in New York, usa. Given that they are paid in usd- \$, full control on UN is exercised by us corporations. power is exercised on them by white house, and americans run these organs anyway they want. Do you agree?

The same control and power is exercised on the sixth organ ICJ which is in Hague, Netherlands. Do you agree?

ICJ operates according to an agreement with UNSC. So ICJ judgements are not according to law, and are for the benefit of usa?

Does my country trust ICJ?

Do my country citizens trust ICJ as a justice delivering international court?

I consider ICJ as a puppet in the hands of usa?

I think all ICJ judgements are biased and are in favor of usa and in rare circumstances the other four countries on unsc?

ICJ behavior is aligned to their employer?

Can ICJ deliver justice to 192 non-usa countries?

Does my country feel confident about filing human rights violation suit, crimes against humanity suit, racism suits, harassment suits, treated like slaves suit, intentionally destroyed economic growth progress and development suit, malicious intent suit, fraud suit, stole our wealth suit, import bill fraud suit by manipulating usd- \$ for a prolonged period of 245 years suit, organ harvesting suit, illegal clinical trials suit, privacy invasion by nixon tech suit, economic slavery suit, political slavery suit, drugs-chemical targeting and proliferation suit, sex slavery suit, incorrect guidance suits, divide and destroy suit, supply arms / weapons to fight and die suit, intentionally inflicted war suit, and/or created civil unrest suit AGAINST usa at ICJ?

Do my country citizens feel confident about filing abuse of nano-technology suit – privacy invasion suit, abuse of nixon technology – peeping into private space, home, office, bedroom, bathroom, kitchen suit, abuse of nixon technology – life manipulation suit, abuse of nixon technology – coupled with food poisoning / drugging – personal / professional life manipulation suit, malicious intent suit, fraud suit, stole our wealth suit, caused damages / liability suit, inflicted death suit, and/or divide and destroy suit AGAINST usa at ICJ?

WHO did not really work for the cause of world health, and worked for the interests of usa?

Did WHO just do the work given to them by usa, for their selfish needs?

Is WHO a puppet organization controlled by usa, since they are paid in usd-\$ in the old world order?

unicef never supported and financed meaningful education in poor countries?

Unicef is an eye-wash for 192 countries to not take control of their own country's education?

Unicef is a puppet organization in control of usa, since they are paid in usd-\$ in the old world order?

unesco never delivered real economic benefit to any of the world countries?

Unesco is a puppet organization in control of usa, since they are paid in usd-\$ in old world order?

All the old world order UN organizations run by rouge usa, by paying in usd-\$, are used for their own selfish needs and motives, against the interests of the other 192 world countries. Do you agree?

Is UNDP an eye-wash organization, paid in usd-\$?

Has UNDP driven any progress, development, or measurable economic growth to my country?

Pose the above two questions mutatis mutandis for UN-HABITAT, UNEP, UNICEF, UNFPA, and WFP?

Has UNAIDS paid in usd-\$ delivered any relief to my country?

UNAIDS was used to conduct trials on your country subjects for the selfish objectives of usa?

Pose similar questions like the above two, mutatis mutandis for UNRWA, UNHRC, UNSSC, UNIDIR, UNU, UNITAR, UN WOMEN, and UNOPS?

Has CTBTO paid in usd-\$ been used and abused by usa for their selfish motives, and controlling other world countries?

Pose similar question as above, mutatis mutandis for UNFCC, IAEA, WTO, IOM, ITC, and OPCW?

The autonomous organizations must be allowed to function independently without usa attempting to control them. Do you agree?

Has the world bank that is controlled by usa delivered any measurable results for your country?

If there was any work that world bank has attempted to conduct in your country, were there interests, benefits, future control levers being handed over to usa?

Has IMF delivered any meaningful progress in your country?

All specialized organizations that operate in and have 193 country delegates, and work for objectives that align with the betterment or benefit of all 193 countries, then they must be paid for in a world neutral currency Earthlings. Do you agree?

When all such specialized organizations having real interest in benefiting developing and poor countries are paid for in neutral currency such as Earthlings, then alone their performance measured against goals / objectives will be meaningful. Do you agree?

Pose the above two questions mutatis mutandis for all specialized organizations whose objectives are to better the world and benefit all 193 countries.

**Racial, economic status, and religious isolation or bias in the old world order:**

Have UNSC and UNGA curbed freedom of speech, and freedom of expression in the old world order, under the control of usa?

Have UNSC and UNGA in the old world order, under the control of usa, branded other religions negatively to softly promote and finance the proliferation of christianity?

Have UNSC and UNGA in the old world order, under the control of usa intentionally kept many African countries illiterate and poor?

Have UNSC and UNGA in the old world order, under the control of usa, branded each country with a stereotyping issue / subject and locked the country, manipulated and controlled the country by financial lever, for decades distracting these countries from attempting to progress, develop, and achieve economic success for themselves?

Have UNSC and UNGA in the old world order, under the control of usa, used some countries in developing and poor categories for conducting illegal clinical trials?

Have UNSC and UNGA in the old world order, under the control of usa, forced a monolithic usa culture onto the rest of the world countries? Thus curbing cultural diversity and cultural freedom of the world countries?

**Questions about the benefits from new world order - GI-50 and G-193:**

When united nations is paid in a world neutral currency Earthlings, there will be no tangential interests, or financially lobbied interests in the work of united nations. Do you agree?

When 50 world countries are sitting as permanent members in the united nations governing council, spanning every race, religion, ethnic group, geography across earth, while being paid for in world neutral currency Earthlings, it is a perfect governance council that will care for all the world countries. Do you agree?

My country feels fully safe and secure when governed in the Group Influential 50 governing council model, wherein the model operational expenses are paid in Earthlings currency?

Further, given that all decisive voting subjects will be brought for voting of all 193 countries, my country feels rightly governed, with the empowered voice and decisioning ability at the world stage, on all world subjects?

World governing council when not paid for in a local domestic currency of any one country, will live up to its set goals and objectives?

I and my country feel great because GEC will pay for governing council expenses, in Earthlings?

In the Group Influential-50 governing model, all world countries will be cared for?

Lasting peace across the world is an achievable goal / objective when GI-50 governing model is taken live. Do you agree?

GEC, Global Earthling Council also the Economic council of the world will provide economic guidance to countries asking for it, delivering measurable economic growth?

Being a developing, or poor country, my country feels great that GEC will give 'development package' to enable progress and development of my country?

I am confident GEC will deliver economic growth to my country resulting in prosperity to my country?

**Judicial Council to replace ICJ, in new world order:**

I and my country feel that international law and respect for all countries shall prevail in the world, because of the Judicial council formation?

I and my country feel good that the judges at Judicial council, all the judicial council expenses will be paid by GEC in Earthlings currency?

I and my country are confident that true justice will prevail and will be delivered by Judicial council since neutral country bench of judges preside on the cases / suits?

Does my country feel confident about filing human rights violation suit, crimes against humanity suit, racism suits, harassment suits, treated like slaves suit, intentionally destroyed economic growth progress and development suit, malicious intent suit, fraud suit, stole our wealth suit, import bill fraud suit by manipulating usd-\$ for a prolonged period of 245 years suit, organ harvesting suit, illegal clinical trials suit, privacy invasion by nixon tech suit, economic slavery suit, political slavery suit, drugs-chemical targeting and proliferation suit, sex slavery suit, incorrect guidance suit, divide and destroy suit, supply arms / weapons to fight and die suit, intentionally inflicted war suit, and/or created civil unrest suit AGAINST usa at the Judicial council in the new world order?

Do my country citizens feel confident about filing abuse of nano-technology suit – privacy invasion suit, abuse of nixon technology – peeping into private space, home, office, bedroom, bathroom, kitchen suit, abuse of nixon technology – life manipulation suit, abuse of nixon technology – coupled with food poisoning / drugging – personal / professional life manipulation suit, malicious intent suit, fraud suit, stole our wealth suit, caused damages / liability suit, inflicted death suit, and/or divide and destroy suit AGAINST usa at the Judicial council in the new world order?

**Medical Council to replace WHO, in new world order:**

I and my country are elated at the news of formation of medical council?

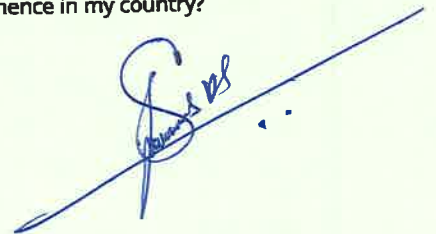

I and my country feel safe since the medical council, its operations and expenses will be paid by GEC in Earthlings currency?

In 100 books of an estimated 500 pages each, the single version of truth for all the human organs management, treatment methods, procedures, surgeries, that constitutes medical journals and literature could be captured, documented, and digitized by the medical council for access of all 193 world countries? Do you agree?

Medical council will truly curb medical malpractice and illegal trials across the world and hence in my country?

Medical council will ensure good health management practice across the world and hence in my country?

Will the new world order deliver freedom of speech to all 193 world countries?

Will the new world order deliver freedom of expression to all the 193 world countries?

Will the new world order deliver cultural freedom and encourage cultural diversity across all the 193 world countries?

Will the new world order ensure the 'Security' of all 193 world countries?

Will the new world order provide guidance for economic growth and wealth creation to all the countries looking for those end goals?

Will the new world order ensure law and order, and justice are delivered to all 193 countries?

Will the new world order ensure 'International law' definition and its enforcement across the world?

Will the new world order ensure dispute resolution among countries for lasting peace in the neighborhood?

Will the new world order deliver progress and development to all the countries looking for these objectives?

**Questions to be answered in write-up with details. This will form content and true stories for authors and content directors for decades to come:**

My country was stereotyped by usa in the old world order in this way? Explain.

My country was targeted by usa in the old world order in this way? Explain.

My country was isolated and targeted by usa in the old world order in this way? Explain.

My country over the last 250 years has been abused by usa in the old world order in this way? Explain.

My country never got any progress and development funds from usa in the old world order? Explain number of requests and attempts that were denied.

My country never got any economic guidance from usa in the old world order? Explain.

My country was branded black, and due to racism, hatred, and jealousy was given no opportunity or voice in old world order by usa? Explain.

My country was branded islamic and usa supplied arms, weapons to start war and fight? Explain.

My country was invaded by usa, attacked by usa, destroyed by usa in the following way. Explain.

My country was forced to accept illegal clinical trials by usa in the old world order to make some money in bribes. Explain.

My country was rendered a corrupt country by negative strategies employed by usa in the old world order. Explain.

My country was always controlled and manipulated by usa in old world order by financial lever or other. Explain.

My country has been forced into war by usa in the old world order. Explain.

My country has been turned into a conflict zone and exploited by usa in the old world order. Explain.

My country has been forced into sex trade and sex slavery by usa in the old world order, to make some illegitimate money. Explain.

My country has been forced into drugs trade and supply by usa in the old world order, to make some illegitimate money. Explain.

**Each country must ask more questions and answer them depending on the history of their country, and interactions with usa / uk, for the last 300 years.**

**WHEN 192 COUNTRIES ANSWER THESE QUESTIONS, it will deliver content and true stories for authors and content directors for decades to come.**

**WHEN 192 COUNTRIES ANSWER THESE QUESTIONS, IT WILL TAKE THE NEW WORLD ORDER LIVE, WITH A THUMPING MAJORITY VOTE.**

**POV 23:**

**Segment: Old world order, Sub-segment: Old world order psycho**

**American caucasian white women in the old world order wanted to destroy women from the other 192 world countries, including India, in their imaginary competition to become my queen. All investments, attempts, plots, schemes were done with singular motive of inheriting my wealth after me, as the queen.**

The term 'gold digger' originated in usa. Women there were the first to wait for their rich husbands death to inherit his money and party in sunsets. This is a documented fact, and when Trillions of wealth is involved you could imagine the psycho restlessness of mental 'gold diggers' in usa. My answer to american women is to come out of your delusional imaginary competition and stay away from me.

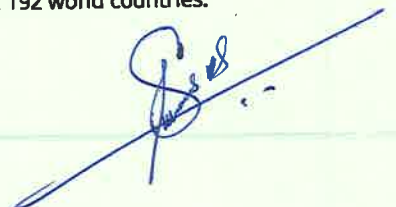

Coming to the direct motive of greed and their plan in clear straight forward steps:

- Somehow, anyhow entice the rich man. In this case me. The motive behind issuing me the Green card after my invention.
- Force, finance, and run rouge programs to force me out of India into usa.
- Forcefully by creating situations, using drugs, force themselves onto me, and get married.
- After marriage within few months due to inexplicable medical reasons I would be dead. The 'gold digger' inherits all my wealth.

The above was the plot of caucasian / white american women living in New Jersey, and other parts of america. I have terminated their fraudulent plot.

I established my Living will and pledged 90% of all wealth to achieve Goal year 2050 for India. I do not want anyone to have any doubt about this. I will achieve 'Goal year 2050 for India'. I will live in India all my life. Further, in my life I have always liked model like Indian young women in the age bracket of 20-25. I have never liked or considered american caucasian white women, ever.

This write up is a fact set more than a POV. The POV to understand here is at 93 Trillion wealth, only Hindu young women will ever come to me, and if a queen were to be chosen, it shall be a Indian Hindu young women, born and raised in India and living in India. Greed of american women, caucasian or otherwise, is exposed and is there for people all over the world to see. This POV will be clearly understood by all 192 world countries.

**POV 24:**

**Segment: Old world order, Sub-segment: Old world order psycho**

**The stunted psycho brains and incompetence of baldwin psychos.**

With the camera invention around 1890, and its miniaturization, and usa having finished all the work in their country before the second world war, the country is suffering with incurable mental disease called Baldwin psychosis. This is the term I have used for people who have nothing else to do in their life except for peeping into the bedrooms and bathrooms of other people, other families. Doing privacy invasion and watching live nudity. This has terminated usa and the debilitating disease has rendered americans incompetent, as losers, and a liability for their country. Anyone hooked to this disease will be unproductive and useless. I request 192 world countries to join hands, contain and eradicate this disease from planet earth.

Here are some facts about Baldwin psychos:

- Baldwin psychos will never be able to achieve anything meaningful in their lives.
- Youngsters in schools / colleges with this disease / habit will never excel academically or become successful.
- People who are in jobs/working suffering with this disease will have stunted / stopped careers and lives.
- All other fields including politicians, police, other officials, corporate executives who get hooked to this habit / disease, will become useless, with no productivity, output, work results to show. **Stunted brains and useless they are, to themselves, their families, their countries, society, and humanity.**

**A disease that must be eradicated and kept away from humanity. usa will be cured by the other 192 world countries.**

**POV 25:**

**Segment: Patent-Intellectual Property**

**Deformation of the exterior layer is eliminated by choosing a higher density fluid / color. Competent authorities of India doing the sale price valuation must consider this fact.**

Indian competent authorities doing valuation of the sale price of my patent US 8,910,998 must consider the following factors:

The invention is a slam dunk and will be embraced by all OEM'S of the world and at all the production plants across the world countries. A very early stage concept illustration video must not be considered limiting in any way. The deformation of the exterior layer, and the usage of one liter of liquid color in the early stage demonstration video, must not be considered as a problem / challenge for you to go conservative or choose lower sale price estimation numbers. Review the following facts and factor them into your estimation activity:

- I refer you to my patent document page 8, column 4, line 57. Read the text all the way until page 9, column 5, line 11. This text is about the various fluids, materials that could be flown into the fluid tight space to alter the color of the vehicle surface. You will read that I have listed a broad range of substances without limiting the design to only liquid e.g., water color. I refer you to the listed materials suspensions, slurries, emulsions containing solid material, flowable solids, oils, resin, and waxes.
- I bring your attention to the above inclusion in the patent text to state that in one embodiment, semi-solid, waxy substance, e.g., colors sold in the paste form in tubes (available in the market today and pur-

chased by painters) could be flown into the fluid tight space. When such material is chosen to fill the fluid tight space, there will be no deformation of the exterior layer. The intended objective is fully achieved by the design. Further, I refer you to my patent text page 8, column 3, lines 3 to 9. In one embodiment, given the fluid tight space thickness ranging between one micron to 5 millimeters, when the colors in higher density are flown in, there will be absolutely no deformation of the exterior layer.

The objective of documenting this POV and sending this communication is to ensure you do not undervalue the patent depending on an early stage demonstration video on one of my websites. The design is implementable in the present and will be chosen by all world OEM'S as a production standard.

Factor these legal points included in the patent document while performing your sale price valuation / estimation activity.

#### **POV 26:**

**Segment: Old world order, Sub-segment: Old world order horror**

**World events, in that national events, international events, actions taken, and orders given by usa, all of which have been done since Q1-2007, after my patented invention of US 8,910,998.**

**This is history repeating of sorts. This time it is usa playing the role of East India company, to come into India in the name of business and to make us slaves.**

In the attempt of stealing great wealth, in this case Trillions of Earthlings / \$ linked to my invention patent US 8,910,998, usa has gone to the extent of moving mountains, creating tsunamis, exercise all their authority, power IN THE OLD WORLD ORDER, use as much printed currency of usd-\$ as possible; to manipulate, change, alter, engineer events all across the world. Within that, they have done much manipulation in their country usa and attempted to manipulate India significantly.

**My invention in Q1-2007 was the trigger and the core reason for all the events listed here, to occur.**

#### **Usa events**

- Barack Hussain Obama becomes the first African american President of usa, and goes to White House. Further finishes two terms. This has occurred for the first time in the american history of 245 years. A man considered of african origin with a muslim middle name living in white house for eight years. No one could ever fathom this. It happened because of my invention. The unknown Obama until then, suddenly storms into democratic primaries in Q2 of 2007. Takes office in Jan 2009. This was to announce that usa is with oil, while they are about to engage in a fake fire scam. This was also to connect with muslim and african countries, while attempting to fake a statement to the world that they are not racist, and are not going to attack me out of racism, hatred, and jealousy; given that I am an Indian citizen, copper middle skin tone, and Hindu by religion.
- First cash drop to Tesla was made in year 2008. Financing the fire scam.
- Elon Musk made the richest man in the world in quick time. Continue to finance and support the fire scam.
- Dinner invite to Manmohan Singh by President Bush, after my invention.
- 2008 credit crisis was induced with the collapse of Lehmann brothers. Housing market correction happened, further causing the largest bail-out of american banks ever recorded in the history.
- Hollywood made several movies to target me, and my invention.
- Ferrari listing on Nasdaq.

- Usa spent Billions of usd-\$ in targeting me since after my invention in Q1-2007.
- Usa spent Billions in attempting to frame me negatively in an attempt to steal the wealth from my invention.

### Worldwide events

- Brexit was initiated and concluded because of my invention. This was to eventually try to force me to usa or uk, where I would be assassinated.
- Obama visit to Saudi Arabia soon after he took office. Strengthening alliance with oil rich monarch, building an alliance between christianity and islam, and detailed the full plot of 'fake fire scam' which was going to be used to attack me, Hinduism religion, and India, to steal the wealth off my invention. This was uniting two other religions against Hinduism. Usa pledging solidarity with oil, while throwing me into fire scam. I have defused it and have asked for it to be subjected for voting of 193 world countries.
- Obama visit to India for attending Indian Republic day event. Start manipulating India to target me, to destroy India and its future.
- Syria bombing causing mass migration of muslim people into european countries. Brexit and this go hand in hand. So that I would not choose a European country as an alternative, when they would attack me in India. For this they give Europe the shade of muslim, thus the shade of support to oil. This was to force me to usa or uk where I would be assassinated.
- After decades of isolation Mr. Trump meets Mr. Un of North Korea in Singapore, with no results coming off such a meeting. This was to indicate to me that after me having been isolated, a dialogue outside legal forum such as court will result in nothing.
- Slumdog Millionaire oscar event collaboration between Hollywood and Indian cinema industry. This oscar event in 2009 was to build network and link into Indian film industry to use them against me, and to make movies to target me.
- Holding world media houses hostage so as not to introduce my invention patent US 8,910,998, macro reforms Project Earthling(c), and United Nations Global governance model 2020(c).

### India events:

This is history repeating of sorts. This time it is usa playing the role of East India company, to come into India in the name of business and to make us slaves. With the news of me getting rich, which would result in wealth and many businesses within India, they again try to enter to steal our wealth and leave us poor.

- Bill gates and Warren buffett visit to India in 2010. This was to control and keep the IT industry in grip.
- Amazon India launch by Jeff Bezos.
- 26-11. Masterminded by an american citizen probably paid by usa government; was to build an emotional connect with India by drawing parallels between 9-11 and 26-11.
- Tata Motors acquisition of JLR. A deal that wipes out all the wealth, earnings, savings of a decade from Tata motors. A deal made in hell.
- Launch of Tata nano. A product well intended with moderate success. They launch after my invention.
- Toyota enters India by introducing Itios in the cab segment. Launches Innova and builds sizable market in the segment.
- Renault enters Indian market with Duster.
- MG forays into India.
- All top world automotive OEM'S at least introduce one or the other model, even if it means CKD exports into India.
- Chevy launched Beat and later closed their operations. Ford launches Ecosport.
- CNBC TV 18 entry into India to capture all details about India (political, military, etc.). The media house gave enough intel and details about India to the masterminding team sitting in usa. Their entry into India must be called as spying on India.
- Usa sent their trained order takers, the pseudo economists that are Nri-abcd to India to give WRONG advise, to intentionally destroy and derail India by bad advise. These people include Raghuram Rajan, Amartya Sen, Arvind Subramanyam, Jayant Sinha, and Kaushik Basu. These people came with tags of

Harvard university, Columbia, Booth, etc. These people ran a propaganda program that India to be 5 Trillion economy in 5 years. It is nearing the end of 5 years, and Indian GDP has not changed from its 2.6 Trillion number. This point must be recorded clearly, since it corroborates that if you trust usa or uk, you will be derailed and destroyed. This attempt was a 5 Trillion carrot dangling to steal my invention wealth of at least 93 Trillion. India must be aware of wrong advise from foreigners.

- Maximum number of drug seizing events ever recorded in India. Infused by usa to derail Indian college students. Usa negative strategies on display to destroy India.
- Indian media, movie industries, television, advertising, and sports have been used by usa.
- New trend of Horse trading introduced into Indian politics as observed in multiple states. It was to disrupt democracy in India.
- Bangalore city fully controlled and manipulated. My life has been surrounded and manipulated 24 by 7 by 365.
- Indian film industry made several movies to target me, and my invention.
- Holding Indian media houses hostage so as not to introduce my invention patent US 8,910,998, macro reforms Project Earthling(c), and United Nations Global governance model 2020(c).

### **Regional events**

- Chinese smartphones entry into India.
- Rohingya incursion into India.
- Singapore chosen for meeting of Mr. Trump and Mr. Un. The meeting co-ordination expenses were supposed to be highest ever to hold talks between two country leaders.

### **Manipulation of United Nations**

- UNSC and UNGA controlled and held hostage by usa so as to block me from introducing the macro reforms Project Earthling(c), and United Nations Global governance model 2020(c) to 193 world countries.
- UN SMT was shuffled and manipulated so that they do not engage me in conversations.
- The current day United Nations is a puppet in the control of usa, since they are paid in usd-\$.
- All UN organs, and organizations used to block my work, since they are controlled by usa. Even their offices outside usa were commanded and controlled to not engage me in a dialogue on my macro reforms.

### **POV 27:**

#### **Segment: Patent-Intellectual Property**

#### **My legal relationship with 193 world countries. My relationship with 62 countries off the 153 PCT contracting states.**

In this POV I want to address the relationship that I have with the world countries. The relationship I have with 153 PCT contracting states, and within that 62 countries chosen by me for my invention patent US 8,910,998 IP rights protection.

An individual has a relationship with a country when he draws income in that country, and pays taxes to the country government. When we say relationship with a country, it is actually the relationship with its government. The government collects taxes, which constitutes a financial transaction and the relationship with the country.

#### **Legal relationship with India.**

I have legal relationship with India, my home country, the country of my citizenship. I have drawn income in the country and have paid taxes for several years. Further, I point you to my executed and legalized Living will, in

which I have pledged 90% of all my wealth coming off my invention for India, half of which is paid for Indian government, and the state governments. So, I have a very strong legal relationship with my home country India.

### **Legal relationship with usa.**

I have had a legal relationship with usa. I was employed by capgemini usa while working in usa between Oct 2000 and Jan 2010. During this period, I drew salary and paid taxes to usa government, and applicable taxes to their state government also. However this legal relationship has ended now, as I do not draw any income over there, nor pay taxes there. Further, I have abandoned all work permits / visa, or resident status given to me by usa government. Do not intend to ever travel there again.

### **Legal relationship with 153 country PTO'S because of PCT international application PCT/US2014/046619.**

A replica application of my patent US 8,910,998 was filed as a PCT international application with application number PCT/US2014/046619 on 15-7-2014, under the provisions of Patent Cooperation Treaty. According to article 11 of PCT the treaty the application when filed has the same effect of filing applications in all designated states, which in this case are all 153 PCT contracting countries. This is my legal relationship with the 153 PCT country PTO'S. My relationship is with the 153 country Patent and Trademark Offices. This relationship is via me procuring 'Legal services' from IP lawyer 'Hulsey PC, usa'.

It must be understood that the LEGAL relationship with PTO under the provisions of Patent Cooperation Treaty is different from having any legal relationship outside the PTO within that country, with their government.

### **Legal relationship with 61 non-usa country PTO'S because of entering national and regional stages using my PCT international application PCT/US2014/046619.**

Off the 153 PCT countries, 61 non-usa countries were chosen by me depending on 'automotive production volume / production value'. By filing fifteen national stage and two regional stage applications I got my invention IP rights protection across the 61 non-usa countries. These 61 country PTO'S (Patent and Trademark offices) have processed my national stage application, according to the provisions of Patent cooperation Treaty. This relationship is via me procuring 'Legal services' from IP lawyer 'Chadha and Chadha, India'. These 61 country PTO'S have prosecuted the national stage applications for their territory.

### **Legal relationship with WIPO and 61 non-usa country Judiciary.**

Because of breach of Patent Cooperation Treaty articles 18 and 19, committed by uspto in relation to my PCT international application PCT/US2014/046619, I now have the following legal relationships:

- Legal relationship with WIPO - World Intellectual Property Organization, which administers PCT, the Treaty. They have 193 world countries as their members despite only 153 countries being contractually party to PCT the Treaty. The breach of PCT has been legally informed to WIPO. The legal remedy that will be issued by the court will also be communicated to WIPO according to law and this communication will have to reach all 153 PCT contracting states and might possibly reach all 193 member countries as official legal communication from court. This legal relationship is established by lawsuit filed in Indian court OS 2487 of 2021.
- Legal relationship with the COURTS of 61 non-usa countries. I have kept the 61 non-usa country judiciary informed about the breach of Patent Cooperation Treaty articles 18 and 19, and the legal remedy ordered by Indian court will also be communicated to these 61 non-usa country courts. This legal relationship is established by lawsuit filed in Indian court OS 2487 of 2021.

## **International airport transits do not constitute legal relationship.**

My international airport transits do not constitute a legal relationship with that country government. While travelling between India and usa, I have had flight connections, transitions at Amsterdam (once), London (once), Dubai (once), and Paris (multiple times). These transits, despite overnight stays due to missed connecting flights, do not constitute legal relationship with Netherlands, uk, uae, and France.

## **I do not have legal relationship with 191 world countries / their governments.**

Outside of India, and a past expired relationship with usa, I do not have a legal relationship with 191 other countries or their governments. This must be clearly recorded by everyone in the world, in relation with the execution of upcoming 62 largest sale agreements, one each with each of the 62 countries.

### **POV 28:**

#### **Segment: Old world order**

#### **Sub-segment: Old world order horror**

**The questions that must be asked by 191 world countries, their citizens to the rouge old world order, wherein the 'rouge old world order' comprises of usa, their corporations, their citizens, white house, uk, their corporations, and their citizens. The puppet un, its organs, and organizations all of which are paid for in usd-\$ are controlled by usa-uk, the rouge old world order, thus rendering them useless, ineffective, incompetent, and demonstrating reckless irresponsible behavior towards 191 world countries.**

- Why does the rouge old world order, want to control all 191 other world countries?
- Why does the rouge old world order, want to keep all non-usa and non-uk countries as slave countries?
- Why does the rouge old world order, want to be self-proclaimed leaders to the world?
- Why does the rouge old world order, within that usa want the monopoly of their currency usd-\$ in the world?
- Why does the rouge old world order, want to steal wealth from all 191 world countries into usa-uk, rendering every country poor?
- Why does the rouge old world order, impose racism and slavery on the world countries and world citizens?
- Why does the rouge old world order, selectively deliver prosperity to few countries and destroy the prosperity prospects of vast majority of other world countries?
- Why does the rouge old world order, within that uspto of usa (which should technically be non-government organization) commit worldwide fraud, breach of Patent Cooperation Treaty - PCT, a legal agreement between 156 countries, and intentionally block inventions of citizens from 191 world countries (e.g., breach of PCT on my PCT international application PCT/US2014/046619), which will result in their country economic growth and progress?
- Why does the rouge old world order, finance and ensure each country is controlled by a vise that they have created, so that the target country is derailed and destroyed?
- Why did the rouge old world order, block progress & development opportunities of India and other 190 world countries? Why have the rouge old world order, continuously targeted religion of Hinduism and other world religions?
- Why did the rouge old world order, block the progress & development opportunities of at least 100 poor countries in the world that are looking for economic growth, and progress?
- Why have the rouge old world order, relentlessly targeted Hindus living in India?

- Why did the rouge old world order, control and render the united nations incompetent and useless, ran it like a puppet for its selfish, devious, diabolical, demented objectives?
- Why did the rouge old world order, have relentlessly attempted to block the introduction of my authored macro reforms 'Project Earthling(c)' and 'United Nations Global Governance Model 2020(c)' to 193 countries and bring the macro-reforms to their decisive voting?
- Why does the rouge old world order, capture and store information of 191 country world citizens, their professional and personal details in the name of social media platforms? What is the guarantee of data privacy? The rouge old world order, use this personal information of people all over the world for their benefit and gain, and for their own selfish needs?
- Why did the rouge old world order use 'Divide and destroy' strategy worldwide to divide the world countries and world citizens?
- Why did the rouge old world order use 'Divide and destroy' strategy within India? Why did they use a 'gold reserve' for carrot dangling to divide all states in India and made them fight for it? The 191 world countries conclude that this was an attempt to steal the wealth from my invention patent us 8,910,998 and PCT/US2014/046619. Your response?
- Why have the rouge old world order done 'privacy invasion' into regular people's lives? How many other 191 world country 'privacy Invasion' attempts have been made, identified, recorded, known and/or unknown?
- Ask the rouge old world order to disclose the full details of the invisible to eye, nanotechnology built by them to snoop on people all over the world in the name of 'eagle eye' doing privacy invasion and breaking law, to all 191 world countries. So that every country is aware and becomes knowledgeable about the existence of such technology. Your response?
- Ask the rouge old world order to disclose full details of the highest level of pharmaceutical technologies achieved by some usa and uk pharmaceutical companies, and how they have attempted to control human beings like robots? The 191 world countries conclude that this is to chemically control trafficked humans into usa-uk like robots, by controlling their brains to the extent possible in the forced labor slavery, sex slavery work. Your response?
- Ask the rouge old world order to disclose full details of highest levels of pharmaceutical technologies used to control all functions of human physical body organs to the last cell? The 191 world countries conclude that this is to chemically control trafficked humans into usa-uk like robots, by controlling their physical body movement, physical body organs to the extent possible in the forced labor slavery, sex slavery work. Your response?
- Ask the rouge old world order to disclose full details of highest levels of pharmaceutical technologies used to control all functions of human brain in an attempt to control or alter target subjects concentration levels or thinking? The 191 world countries conclude that this is to control trafficked humans into usa-uk, by controlling and manipulating the regions of their brain to keep them at a low IQ level while being forced into labor slavery, sex slavery work. Your response?
- Ask the rouge old world order to disclose full details of highest levels of pharmaceutical technologies used to target different regions of human brain and target different human brain functions, which additionally could be timed with a TR, CR, DR, SR drug wrappers in combination with serum technology? Is this to apply 'Internal cage' on target subjects? Refer POV 2-46 for Internal cage definition.
- Ask the rouge old world order to disclose the full details of highest levels of pharmaceutical technologies evolved to target the blood vessels that supply blood to brain, by one-time poisoning, slow poisoning in near term, midterm, or long term, to damage the blood vessels to cause sudden death?
- Ask the rouge old world order to disclose the full details of highest levels of pharmaceutical technologies evolved in the space of SR (Sustained Release), TR (Timed Release), CR (Controlled Release), DR (Delayed Release), and the containment of such drugs in different forms, in different organs by which the coated drug is planned to be released after 24 hours, 48 hours or more? This means a resident drug put in food few days ago could kill a person after several hours, in between which he would have consumed other food for few days, losing full traceability. Your response?
- Ask the rouge old world order to disclose details of all bribes doled out (in India and other 190 world countries) by usa and uk in last 100 years in the form of suitcases filled with USD (\$)?
- Ask the rouge old world order to disclose the negative plans of usa and uk about what vice was introduced to each country in the world, to distract them from 'Progress and economic growth', and thus derail them to keep them in ignorance and poverty?

- Ask the rouge old world order to disclose details of how they have attempted to control entire cities, e.g., Bangalore, in an attempt to steal my invention patent us 8,910,998 and PCT/US2014/046619 valued at 93 Trillion Earthlings/\$ by conservative estimate? By controlling cities, e.g., Bangalore, by 10 kms \* 10 kms block, or even 20 kms \* 20 kms block, to build an 'External cage' wherein all activity in the defined block, movement of people, movement of vehicles is controlled to the resolution / tolerance of one millimeter, around the target subject? Refer POV 2-46 for definition of external cage. In the ROI model few billion thrown into the city to target one person valued so high, was a negative tactic used by usa-uk. Your response?
- Ask the rouge old world order to reflect on their own mental condition, state and report their mental psychotic disabilities situation to the world countries? 191 world countries want your mental condition evaluated since you live on the same planet, and in the interest of humanity especially in the old world order. Your response?
- Why would the rouge old world order not want the progress, and economic growth to reach all the 191 other world countries?
- Ask the rouge old world order to disclose the full list of diseases that could be induced to a human being by drugs usage, one-time, slow poisoning in near term, midterm, or long term?
- Ask the rouge old world order to give a full list of 'fabricated nonsense garbage trash list of diseases' they have created by paying kol team? The 191 world countries to conclude that you have created this list of diseases and fabricated illogical treatment which is intended to conduct more illegal brain experiments, illegal clinical trials to cater to usa-uk psycho objectives of 'robotically controlling humans in labor slavery, sex slavery programs', 'to shunt the IQ levels of people across world' program, 'to destroy academics, careers, and lives of talented youngsters from across the world beginning in schools and colleges' program, and 'to harvest organs and heart for the illegal second life' program. Your response?
- Ask the rouge old world order to disclose the list of 'fabricated nonsense garbage theories pertaining to mental health of a human being' which are intended at negatively framing the mental health of citizens from across the world, by paying kol team? The 191 world countries conclude that these nonsense, garbage psychological mental health theories have been fabricated to frame world citizens to steal their wealth, e.g., Intellectual property or similar. Your response?
- Why does the rouge old world order want to control human beings across the 191 world countries like robots by forcing brain control through adulterated food and using serum technology to work on the target subject for extended periods of time? Refer POV 2-45 for definition of serum technology.
- Why does the rouge old world order want to keep the IQ levels of citizens from 191 world countries low, so that they cannot contribute to their own country economic growth or progress?
- Why does the rouge old world order want to destroy the academic record, careers, and lives of young people from across the 191 world countries, so that these 191 world countries do not have any prospect of economic growth or progress?
- Why does the rouge old world order want to force human trafficking onto 191 world countries to forcefully drag labor to be used like slaves until death in usa-uk' program?
- Why does the rouge old world order want to force human trafficking onto 191 world countries to forcefully drag women to be used like sex slaves in usa-uk' program?
- Why does the rouge old world order want to murder 18 young citizens, for each usa-uk citizen, wherein the murders are spaced by approximate 50 years, spread across 191 world countries, to harvest their hearts and organs in their 'all usa-uk citizens to live for 1000 years program'?

**POV 29:**

**Segment: Patent - Intellectual Property**

**Sub-segment: Legal**

**I do not have any children. In future, if someone just turned major 18 year old comes to court claiming to be my son or daughter with a DNA match report, they have been born out of women who have used IVF technique by using my stolen semen.**

After my invention of patent US 8,910,998, in Q1-2007, some of the usa corporations were quick in doing the inventions full sale price valuation and knew that it would be many Trillions. Given this, there have been efforts by some women of usa, uk, to steal my semen and use it for having my children by using IVF – In Vitro Fertilization technique. Given that patents are granted for 20 years, their thought process was to come after 18 years, with the just turned major kid and claim wealth legally through court by a matching DNA report, claiming inheritance. In such an event, despite a DNA matching report, the court must dismiss the claim for the following legal reasons. I never donated Sperm to any Sperm bank which is the legal way to warrant any interested women to have a child from my Semen. Since this LEGAL STEP is missing, and such fertilization is from my 'stolen semen', the women or the kid cannot inherit or claim any of my wealth.

usa-uk are primarily driven by psycho diabolical devious motives and greed, and are filled with psycho women that are called as 'gold diggers' or 'women pulling power'. The valuation of my invention is the primary motive, while they might also hide behind the term 'genetics' or 'exotic genetics' to justify stealing my semen and having children by IVF technique. While some of this might be speculative, I suspect some women in nj, usa might have attempted this, and given the advances in IVF technology, this could be a bigger list of women from other states of usa, uk, and could potentially also include first daughters, and billionaire heiresses in usa-uk. Legally, my statement prevails. No one that have attempted such a tactic, IVF pregnancy out of my stolen semen, can ever inherit any of my wealth.

### **POV 30:**

#### **Segment: United Nations Global Governance Model 2020(c)**

#### **Sub-segment: COUNCILS**

#### **New world order COUNCILS to never indulge in any acts or even talk related to cross-country 'escorting' business. Pursuit of genetics dealt by way of 'International Sperm Bank'.**

In the old world order run by usa-uk for over the last 250 years, the international territories were rendered lawless. This was well planned, and intentionally set up that way, so that with the usd-\$ monopoly, they could choose any one from any country for sexual pleasure, in some cases forced and sadistic, thus forcing 'sex slavery' onto the world countries. Similarly, they could choose anyone for 'menial job, labor slavery human trafficking'. In many cases the force could be against the subject or the subjects family wish from the target countries. To force this human trafficking for sex or labor, usa-uk introduced and proliferated bribing culture across 191 world countries, methodically driving corruption into these countries. Further, they go on to build a 'puppet united nations', wherein all its organs and organizations paid in usd-\$, were used as a platform for freely, and openly discussing and engaging in 'human trafficking business'. This is more a reflection on the un organs, six of them, run with psycho devious diabolical selfish objectives, by the rouge psycho payor usa. This puppet un can only be described as rouge, irresponsible, unaccountable, and openly dealing in human trafficking for labor, for sex, imposing slavery or sex slavery on world countries and world citizens. It seems they have abused the word 'genetics or exotic genetics' and hiding behind it to justify human trafficking for sex. All of this will be ended in the new world order.

#### **HUMAN TRAFFICKING BANNED AT THE COUNCILS.**

After my authored macro-reforms go live, in the new world order, the 'COUNCILS' that have been defined by me, have very clearly defined 'foundational ideology' and

- Will function with well defined 'end goals, objectives'.
- Will work with high levels of responsibility and accountability.
- Their operations will be guided by 'genuine intent defined by the goals and objectives towards the world countries and world citizens'.
- Will be highly 'work oriented' with responsibility towards 191 world countries and their citizens.

These new world order 'COUNCILS' work with highest levels of work ethics, and respect towards other countries and their citizens. Unlike the current day puppet un organs controlled by rouge usa-uk, they are founded on ideologies of an absolutely equal world, which must have no human trafficking, no slavery in any form, including 'slavery of labor', and 'sex slavery'. With these 'COUNCILS' at the helm, working to ensure peace and prosperity reaches all 191 world countries and their citizens, they shall strictly operate on the following 'established rules' related to human trafficking or cross-country escorting.

- To refrain from engaging in any offering, trading, or supplying discussions or conversations at these 'COUNCILS' for cross-country human trafficking that could be for 'escorting women', 'slavery by labor', or 'sex slavery'.
- To impose FULL BAN of any 'human trafficking' solicitation by any country delegates, from any other country delegates at the council.

Human trafficking is fully banned from the operations and conversations at the COUNCILS of new world order.

### **INTERNATIONAL SPERM BANK ADDRESSING PURSUIT FOR GENETICS.**

To provide for women pursuing genetics, the MEDICAL COUNCIL will endorse an 'International Sperm Bank', wherein sperm donors will be catalogued by a video, and a webpage listing the donors details. The Sperm Bank will provide the service to solicitor, against a set service fee payable in Earthlings, while the donors get paid in Earthlings. In summary, the 'COUNCILS' will be highly 'work oriented', and will not engage in cross country sex solicitation, offering, supplying, or trading. Indirectly, the COUNCILS endorse and encourage people, men and women to have sex with partners from within their countries, while they have addressed the subject of genetics by endorsing an 'International Sperm Bank'. Given the upcoming decentralized world, there will be significant demand for Semen of Dark skin people given that they are the genetic reserve. Child bearing mothers from across the world countries may choose as per their liking with access to 'International Sperm Bank'.

## SRINIVAS S. DEVATHI

INVENTOR & AUTHOR

### Right perspectives for the World – Continuation

In this second page, I continue the 'Right perspectives for the world'. This has been done to contain the web-page length. These are some of the globally relevant subjects that the world countries are already discussing, or will be discussing in the near future.

A handwritten signature in blue ink, consisting of stylized initials 'S S D' followed by a long horizontal line extending to the right.

*Srinivas S. Devathi, Inventor and Author*

#### **POV 2-1: (Read as webpage 2, POV 1).**

##### **Segment: Fire Scam**

**The multi-dimensional reasoning of why the fire scam was designed against me and my invention?**

**World GDP is less than my inventions worldwide intellectual property rights sale price.**

While reliable accurate data about world GDP is unavailable, from what data is available, it has shown a low growth rate over the last few decades. It indicates that the countries in whatever way are attempting to drive their economies, within the limited or restricted opportunity provided to them in the old world order, wherein everything has been controlled by one country USA. The world GDP in 2017 was recorded at an approximated 81 Trillion \$ according to one online source. It is expected to be at an estimated 90 Trillion \$ in year 2022.

**My patented invention US 8,910,998 and its worldwide (62 countries) intellectual property rights sale price is HIGHER than the world GDP.**

The inventions sale price by conservative estimate is at 93 Trillion Earthlings / \$. By realistic estimate it is between 93 Trillion and 150 Trillion Earthlings / \$. By aggressive estimate it is between 150 Trillion and 250 Trillion

Earthlings / \$.

Further, I am an Indian citizen and would be bringing the wealth into India according to Patent Cooperation Treaty. While India is the fifth largest economy in the world, the GDP per capita puts India at around 142nd position in the world. Given this fact they realized that me, being a patriotic Indian citizen HAVE THE NEED for my country, to bring the full wealth, full value of my invention into the country. And no other world country could oppose this as India GDP per capita is low, and we are declared a poor and developing country. At 1980\$ GDP per capita vast number of Indian population are living in the lower middle class segment, with the second largest segment coming into 'below the poverty line' segment. Thus, I intend to get the full wealth into India, the poor country to build our own treasury, and no world country can oppose or object this given the fact set and Patent cooperation Treaty. With the wealth that I bring in, Indian GDP will rise in the next 30 years, with the growth curve steeper during the latter part of the 30 year period.

These numbers caused panic among usa corporations, usa and uk. They had to choose something to attack me with, in the range of numbers my invention sale price is at. This is where the 'Energy sector' the sector that drives a significant portion of world GDP was chosen.

**Crude oil, its usage for transportation sector and the several lines of businesses that emerge from its processing into various byproducts, constitutes say an estimated 60% of the world GDP.**

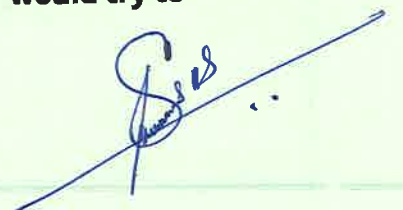

For the discussion and analysis purposes let me use the world GDP number of 90 Trillion. While there is all the talk about Electric and renewable, the current day world wide automotive industry energy source sector graph will show that its market share is less than one percent. And well over 98% of the sector is even to this day driven by the energy source as crude oil. While this is the current day market share, if we were to work on the case study of 'what if 100% of automotive sector is sourced from electric energy or other renewable? The answer is an estimated 60% of the world GDP is expected to be wiped out / terminated. At 60% of 90 Trillion, we are talking a loss of 54 Trillion economic activity worldwide. Shrinking the world GDP from 90 Trillion to 36 Trillion. Factoring, the electric / other renewable vehicles contributing some GDP adjustment of say 10 Trillion, the world GDP will hover at around 46 Trillion. Between 90 Trillion and 46 Trillion you must consider what is the quantified loss of jobs to people across the world, and the number of companies shut down across the world causing rampant joblessness and poverty in some countries. At this much swing of economic numbers, world wealth, 193 country wealth, loss of jobs, closure of companies, and rise in poverty, the 'Energy sector' battle is the battle of the highest stakes in the world.

Given the high stakes involved with my invention, they try to choose the world battle with equal kind of high stakes to attack me, and my invention.

**Build fear among the world countries.**

As discussed in the above sections, by choosing 'HIGH stakes', HIGH impact battle that has the outcome of changing fortunes of many world countries negatively, usa-uk knew that they would automatically build fear among the world countries. While usa-uk have chosen this to target me, even they are gripped in fear, one must realize that they are two top countries consuming and processing crude oil. Their GDP would take a hit of a possible 70%. They lobbied Saudi-uae into supporting this 'Fire scam' usage to target me, I cite Obama visit to Saudi after he took office. While Saudi-uae played into this scam to target me, my invention, and India; even they would succumb to fear given the high stakes. In summary, the high stakes subject chosen to target me, is a subject that causes concern to all the world countries, and might cause some amount of fear given its economic impact. These are the side effects of linking 60% of world GDP to me, my invention and deliberately dragging me into a subject which would make the world bi-polar.

**Usa-uk probably thought that, at these macro numbers, they would try to cut deals with countries on my invention subject.**

While it is a negative tactic that usa-uk might attempt, the world countries most of which are all contractually joined to Patent Cooperation Treaty would have cited the Treaty, a legal agreement, a contract and refused any such deals with usa-uk which constitutes 'illegal deals'. Thus, the world countries would have rejected and neutralized any attempts by usa-uk to cut deals at a country level; since all of them would want to follow the law, a legal binding by way of the Patent Cooperation Treaty, and rightfully so.

**Build fear in me with the fire scam. Given my clear response to post the subject for poll with all 193 world countries, their attempt has failed.**

While there is a history of selecting and killing talented and genius youngsters by pitting them in the energy sector battle, they go ahead and choose me after my invention was done in Q1-2007. This was to target me, attempt to scare me, build fear in me, threaten me, in a multitude of ways. The threats were never ending in the last 15 years. From cars driving around me with stickers that are christian, stickers that are muslim, to autos with such stickers, buses and trucks that are green in color, versus white in color, with targeting stickers, both in usa and Indian cities.

While all the above was used to scare me, build fear in me, to derail me, derail Hindus living in India, derail India and derail all our progress prospects; I have given them my clear and apt response to handle this 'High stakes' energy sector battle.

**The scam is clearly evident when you consider the following present day facts.**

There is no one identified leader holding the baton of 'Renewable / electric'. There is no one leader who is leading this effort of 'Renewable / electric', who has declared a war on oil. The leader in this context could be a person, a country, or a group of countries.

I request 192 world countries to ask usa the question of who among Mr. Al Gore, Mr. Bill Schreiner, Mrs. Heidi Pote, Mr. Barack Obama, Mr. Bill Clinton, Mr. Ken Harvey, Mr. Roy Stansbury, Mr. Mike Comprelli, Mr. Randy McDaniels is the torch bearer of 'Renewable / electric'?

Is Mr. Elon Musk of Tesla the torchbearer to 'Renewable / electric'?

When you answer these questions, you will realize that the 'fire scam' was created by usa-uk-saudi-uae in an effort to steal wealth from my invention patent US 8910998 and its world wide IP rights from me, India, and Hindus living in India.

### **Conclusion:**

I have exposed the 'Fire scam' designed by usa-uk-saudi-uae to target me, my invention, Hindus living in India, and India, to all world countries.

Thus my response and direction would be for the Group Influential - 50 council once the macro-governance reform United Nations Global Governance Model 2020(c) is taken live, to make the executive decision and let the subject be put up for decisive voting of all 193 countries with a gap of 10 years between polls until a decisive majority YES is achieved. This is my direction and the way to go. Handling such a transformation, if approved and voted in by the 193 countries, must be maneuvered in the way of a gradual transition.

**Let us have faith on democratic choice of all 193 world countries.**

**POV 2-2:**

**Segment: Old world order, Sub-segment: Old world order horror**

**Since the american presidents and other executives do not seem to want to take in a non-white persons heart, out of racism, and hatred, a question raises about the treatment, trade restrictions, isolation, food trade partner of North Korea. Was North Korea marked as a white people country chosen and intentionally isolated since world war II, to use them for heart harvesting?**

One must not be surprised at all given the history of Korea since world war II. Knowing american racism, hatred, and jealousy towards people that are non caucasean, this might be justified. North Korean population could be called as non-caucasean however white people country the food habits of which match that of usa.

During world war II, the North and South Korea were formed, and one would think after the war ended and say after the isolation of the North Korea for a decade or two, their country should have reached normalcy in choosing friends across the world, trade partners and do regular, normal business with other countries. However, the continuous sanctions, restrictions imposed on North Korea for many decades and intentionally kept isolated raises a lot of questions, especially since it is inhabited by white people.

The isolation and sanctions imposed, forced the country to have trade, business relations only with China, one of the five unsc permanent members. North Korea has had a severe shortage of food and have received most of the food grains and supplies from China for decades now.

What has the un been feeding the people of North Korea? Do the citizens of North Korea know that the imported food could be manipulating their life style, life habits, every organ, targeted organ for the liking of china, indirectly for the liking of usa and uk that controlled un in the old world order? A preplanned diet could have been forced on them to prepare them for the upcoming murders to take out their hearts, as they are white people hearts and thus are racially acceptable to recipients in usa and uk. This line must have been a huge relief for all the countries inhabited by colored people.

The theory seems to become factual, with a forced isolation spanning now well over 75 years. And there have been stories about no cat or dog is left in North Korea as every last one of them has been consumed. What would force people to go to such extents? A forced drugged or poisoned diet alone would make a country of people go to such extremes. The isolation, voiceless, and friendless country, out of no choice and no outlet has been attempting to build their own nuclear weapon and has been doing trials repeatedly with no success. It shows the desperation, suffering their country is going through.

Few years ago, a satellite image of North Korea their local time evening or night was published which showed the entire country in pitch darkness and only Pyongyang, their capital city lit up. This again raises multiple questions pertaining to their isolation, their spend distribution for needs within their country. They repeatedly go onto invest in military expenses and trying to build their own nuclear weapon. This indicates their fear of being invaded and killed is more. Thus their investments are in preparedness for fighting alone, than distributing wealth for other basic needs.

Just as an eye wash, probably for making fun of the isolated country, futile attempts which were going to fail from the outset have been made by usa just to show the world a false image that they are trying to talk to them. A basket ball player diplomacy and recent Trump-Un meeting in Singapore are all preset stage drama that have failed, since they have been designed to fail.

The story of North Korea very clearly corroborates the ugly nature of the old world order. usa and uk, the rouge nations have been using all the world countries any way they want to use them, with a puppet un designed and commanded by them. Will North Korea ever speak up? Will they share the true facts with the 192 world countries at a world summit? Will they reveal the full truth of what the old world order forced on them without an

outlet? I think they should. The reformed governance model UNGGM 2020 will ensure they share their full story, and disclose the true stories to the world without any fear.

The 191 world countries must help alleviate their isolation, and allow them to interact, have dialogue with other countries, and have their choice of trade and business partners. The macro-governance reform will end the suffering of one more country and the truth will be shared with the entire world.

**POV 2-3:**

**Segment: United Nations Global Governance Model 2020(c)**

**Dawn of a new era. Welcome to Group Influential 50. Review its exceptional human reach and range, with full representation on the governing council.**

Racism, hatred, and jealousy of usa forcing itself onto unsc 5 defines the ugliness of old world order. The old world order could be defined as narrow vision, narrow minded, biased governance, crazy and mad selfish motives driving their thinking and at the core of their governance. usa, uk, France, Russia, and China represent only white people, and among that christians. usa ran the world in a way to render the entire world their slaves. The other four countries had to take orders from usa given the financial control lever exercised on them.

**This point of view is about the narrow, biased, and psycho outlook of old world order as compared to the positive, inclusive, equal, and unbiased up-coming governance of GI-50, Group Influential 50 council.**

In the old world order vast majority of countries were targeted because they were not caucasian by race. All non caucasian countries were targeted, not allowed to progress, develop, and have been intentionally destroyed or kept poor. There was targeting of people, countries, and their economies by religion, skin color, language, food habit, dressing, religious sub divisions, region, origin of their race, etc.

I bring Group Influential 50 in which 50 countries that span all religions, all skin color, all regions / continents, all race by origin, which cover all geographies of earth, that will come together to form the GI 50 governing council, to govern the world countries with clearly defined goals and objectives. This future governing model is a reformed macro governance structure, by which no country will be left behind, no country will be ignored, no country or regional problem will be allowed to persist, and there will be support for economic growth, progress and development for all countries looking for these goals / objectives. Further, the GI-50 countries span all economic bands including the ones defined by GDP per capita < 2000 Earthlings/\$, < 5000 Earthlings/\$ and < 10,000 Earthlings/\$. These limits, subjected to many other variables, in a broad and general sense define economically backward countries, poor countries, and developing countries. Using GDP per capita as a measurement metric, there are an estimated 100 to 120 world countries that are looking for economic growth, and progress. All these countries will have the opportunity to emulate my work for 'Goal year 2050 for India', thus building their own wealth in years / decades to come.

This GI-50 council will take executive decisions on regional, world subjects, and where they want to get a poll result on a subject, it will be routed to a decisive voting of all 193 world countries, in G-193 council.

**The GI - 50 council will look after the security of all the world countries, without any bias.**

**The GI - 50 council will look after the well being of all the world countries, without any bias.**
